A PAPER FOR ALL THE PEOPLE

VOL. I. PORT ANGELES, WASHINGTON, THURSDAY, OCTOBER 10, 1935 No. 43

Caused by Bite Only

Lest many dog owners be needlessly alarmed because their pets evidence any one or more of these symptoms, which are also symptoms of other less dangerous ailments, it must be borne in mind that rabies is caused by a specific germ. No other germ is like it, asserts a writer in the Los Angeles Times. It is introducde only through the bite of an afflicted animal which inoculates the susceptible through the broken skin with its virus-laden saliva. The animal doing the biting must necessarily be mad during the time of biting in order to transmit the disease. It is remotely possible for the germ to enter the system of a dog or human through an open cut in the skin if licked by the tongue of a rabid dog. Nothing can cause rabies except its own specific germ.

Relics From Ur

Three inscribed terra cotta cones found in Iraq or Mesopotamia, that ancient land that had seen centuries of civilization when Europe was still peopled with barbarians, are on exhibition in the Smithsonian Institution. They were found in the city of Ur where Abraham was born some 2,000 years before Christ. But even then these cones were old. They were placed in the walls of a temple built by King Libit-Ishtar who preceded Rim-Sin, ruler at the birth of Abraham, and their inscriptions are devoted to preserving the memory of this old king. But while the inscriptions speak mostly of the ancient ruler they also corroborate parts of the Bible. They mention cities spoken of in the Book of Genesis the existence of which had been doubted.—Pathfinder Magazine.

World's Series Net Each Player $6,831

Goslin's hit in the ninth inning of Monday's world series game was the most precious in the history of all baseball. It gave the Tigers a world's championship after six attempts; it gave the Tigers an extra cut of $58,071 in the record players' pool, and it was worth $2,227-.30 to each Tiger player. Each Tiger will receive $6,831.88, divided into wenty-five and half shares.

It was the seventh "million.dollar" series, tatol receipts reaching $1,173,794 the largest for six-game series.

How Animals Use Ears

Ears do triple service for animals. First, they protect the delicate inner machines from injury as by insects, dust, etc. Second, they serve as sounding boards, collecting and increasing the sounds that come to them, bringing minute by minute what a wild creature needs to know in a world which has more enemies than friends. Third, by their changing positions, they may act as a warning to other animals that danger is suspected or actually threatened.

Simmons-Porter Match Arranged

A demand for a match ever since the first appearance of "Tiny" Simmons in this city will be offered as part of a double main event in this week's wrestling show, Friday night at the Dragon A. C. hall.

Simmons will take on Tex Porter one of our home guards in the main bout. A speedy and clever man, he is calculated to give Porter one of the busiest evenings the local man has experienced in Port Angeles.

Art English and Joe Kirk, two rough scrappers, are mixing in the other half of the double main event.

Al Pinkerton of the Fibreboard Products mill, will meet Howard Myers of Port Townsend in another event and there may be an added feature.

Reports from London that one foreign newspaperman killed in Addis Ababa and others severly beaten by a mob of Ethiopians, staging an anti-foreign demonatration.

LOCALS

After recovering from an operation for appendicitis Jack Eldridge returned to his work as chief deputy county auditor.

Second of a series of six card parties sponsored by the Angeles Grange will be held Friday night at Pomona hall, fair grounds.

The ladies of the Catholic Social Club will sell baked foods in the Angeles Furniture store Saturday, October twelfth.

A prize baby show and baby welfare is to be conducted at the High school auditorium on October 28, by the Eagles Auxiliary.

Fire Chief Clay Wolverton reports that the total fire losses for this city during the past nine months were only $2,100.30. This is remarkably low in view of the fact that the department answere 120 calls duaing the nine months period.

How X-Ray Has Aided Science

The Public Health Service says that the invention of the X-ray is of three-fold importance to the medical profession. It has made possible the examination of fractured bones to insure proper methods of healing; the examination of internal organs such as the stomach and lungs, and consequent increase in knowledge as to the position and function; and finally, the rays themselves have a certain medicinal and therapeutic value, as in the treatment of skin cancers.

Treasurer Authorized To Take Property

Immediate seizure of personal property upon which taxes are delinquent has been started by County Treasurer W. A. Baar and assistants.

Automabiles upon which the tax in delinquent will be seized whereever found. These csrs will be towed away and stored and if not redeemed will be sold to the highest bidder, according to requirements of the new state tax law.

If Owners of personal property siezed by the county treasurer desire to redeem it they must pay the added costs and penalties that start to accumulate as soon as the article is seized.

The new law gives the county treasurer the right to seize the property in question wherever found. Treasurer Baar is making a complete check-up of automobiles and expects to accumulate a large number of them within the next few days. Other personal property will be seized wherever found, he declared.

Car owners, if they find that their machine is missing from its accustomed parking place, should call up the county treasurer and find out what it is all about.

England and France again ask Mussolini for peace terms.

WOLTEN'S PAY'N - PAC'IT

For FRIDAY, SATURDAY & MONDAY

NOTICE
To Tax Payers

By paying your delinquent taxes for the year 1932 and all prior years will save you many dollars in interest. No interest will be charged if paid by November 30, 1935. If not paid by November 30, 1935, the interest will revert back to the year in which they become delinquent at the rate of ten per cent per year.

THE SECOND HALF OF YOUR 1934 REAL AND PERSONAL TAXES MUST BE PAID BY NOVEMBER 30, 1935, TO AVOID PAYING INTEREST.

If you owe any delinquent personal property taxes; do not be surprised if you find your car in some garage under lock of the Treasurer, who under the present law is compelled to distrain all personal property and offer same for sale to the highest bidder to satisfy said tax lien. If it becomes necessary for the County Treasurer to distrain on personal property, additional costs will accrue and must be paid by the owner.

No Real Property Sale Will Be Held Until May 31, 1936

W. A. BAAR,
Treasurer of Clallam County.

Speeches by President on Western Trip

TRAVELING rapidly to the Pacific coast for some fishing, President Roosevelt delivered several important addresses. The first was at Fremont, Neb., where he spoke to about 15,000 farmers and was enthusiastically received. Mr. Roosevelt set forth the chief accomplishments of the administration to date, and challenged his opponents to do better. He defended the legality of the New Deal doings and made it plain that he would continue to carry on experiments for the welfare of the people. Defining his idea of constitutional government, he said its true function is to promote the general welfare, not by interfering unduly with individual liberties, but by bringing to the aid of the individual those powers of government which are essential to assure the continuance of the inalienable rights which the Constitution is intended to guarantee. It is democracy in the good old American sense of the word."

President Roosevelt

Coming to the AAA, in which his hearers might be supposed to be most vitally interested, the President asserted that "agricultural adjustment is an expression in concrete form of the human rights those farmer patriots sought to win when they stood at the bridge at Concord, when they proclaimed the Declaration of Independence, and when they perpetuated these ideals by the adoption of the Constitution."

No matter what attempts may be made to tear it down, "the principle of farm equality expressed by agricultural adjustment will not die," the President told the crowd.

The AAA has made "honorable history," the President declared, and as a result smoke is pouring from chimneys again and workers without regular jobs are obtaining employment.

He served notice that it is the purpose of his administration to "use every square mile of the United States for the purpose to which it is best adapted." Nature must be harnessed instead of despoiled," he asserted.

A Boulder Dam the President assisted in the dedication of the great project and delivered an address in which he announced that government spending for employment purposes was nearing its end and that now private industry must take up the burden of decreasing the army of the unemployed. He defended the administration against the charges of "boondoggling" and said its efforts "meet with the approval of the people of the nation." He touched only lightly on the power question. Secretary Ickes, who also spoke, said Boulder Dam should be re-named Johnson Dam, in honor of Senator Hiram Johnson.

Again at Los Angeles in the Hollywood Bowl and at San Diego the Chief Executive delivered addresses, and then he went fishing.

Illinois Republicans for Knox for Presidency

COL. FRANK KNOX, publisher of the Chicago Daily News, is now an accredited candidate for the Republican Presidential nomination, for he has received the indorsement of the Republican state central committee of Illinois. Colonel Knox has been in a receptive mood for a long time and has traveled all over the country making speeches. In various unofficial straw votes he has been placed second, only Senator Borah being preferred to him.

Col. Frank Knox

Addressing the Illinois central committee, Colonel Knox said: "I have been from the Atlantic to the Pacific and from West Virginia on north, and everywhere I find that the Republicans not only think that they will be victorious but they have a deep sense of responsibility to rescue the country from the hands of socialists."

Budget Summation Shows Reduction in Deficits

IN A "budget summation" given out at Washington by order of the President it is shown that the federal government deficits will be reduced by more than a billion and a quarter from the original estimates, because economic conditions have grown "decidedly better" and tax receipts are higher than was expected. The estimated deficit for the current fiscal year will be $3,281,000,000.

"The prevailing rate of recovery," the President said, "points to the speedy decline of federal expenditures for emergency activities."

Unless the AAA's processing taxes are knocked out by the Supreme court, he argued, the government "will not need new taxes or increased rates in its existing taxes to meet the expenses of its necessary annual operations." This will be true, he said, despite "erroneous and gloomy predictions" that "heavy increases in taxation will be required to balance the budget and retire our public debt."

Van Sweringens Recover Railway Empire

VAN SWERINGEN brothers have regained control over the vast railway and real estate empire they built and lost to New York bankers. At the height of the boom this was valued at $3,000,000,000. It was taken by a banking group when the Van Sweringens defaulted on loans of $48,000,000 and put up at auction. The brothers regained control for $3,121,000 by bidding in the majority stock of the Alleghany corporation, holding company for all but one of the so-called Van Sweringen roads, including the Chesapeake & Ohio, Pere Marquette, Nickel Plate, Missouri Pacific, and Chicago & Eastern Illinois, and the Van Sweringen corporation through which the brothers ruled their vast real estate possessions.

Two lots of miscellaneous securities were bid in by a New York stock firm for $1,682,000. The loss of the banking group on the deal totaled about $45,000,000.

War in Ethiopia Growing Nearer Day by Day

ITALY having rejected the peace plan proposed by the League of Nations committee of five, and Ethiopia having accepted it, the committee reported to the league council that its efforts to solve the problem were futile. The council thereupon held a public meeting and adopted unanimously the recommendation of its president, Enrique Ruiz Guinazu of Argentina, that it proceed under article 15 of the covenant, drafting a report and recommendations for settlement of the Italo-Ethiopian embroglio.

Anthony Eden

As they did once before, the Italian delegates walked out of the meeting, and a spokesman explained that this was because they "would not sit at the same table with Ethiopia."

In a secret session the council drafted its report and framed its recommendations; but it also asked the committee of five to reconstitute itself so it would be ready to take advantage of any opportunity for mediation that offered in the near future.

A feature of the council's session was an address by Capt. Anthony Eden, British minister for league affairs. Conversations in Rome between British Ambassador Sir Eric Drummond and Premier Mussolini had led some to think Great Britain was weakening, but Eden announced his government was "steadfastly determined to abide by its policy" as previously declared.

Eden's attitude was supported by Peter Munch of Denmark and Maxim Litvinov of Russia.

Emperor Haile Selassie wired the league requesting that in view of the "increasingly provocative attitude of Italy" neutral observers be dispatched to Ethiopia to establish responsibility in case a clash occurred.

The Ethiopian ruler notified the league that he could not delay general mobilization much longer, in view of the "increasing gravity of Italian aggression," but he decided to wait a little longer for action by the league before calling to arms his warriors.

Mussolini, who asserted he expected Ethiopia would soon assault Italy's colonies, proceeded to put 250,000 troops in east Africa. Nearly every day vessels left for Eritrea carrying large bodies of soldiers. On one of them went Prince Adelberto of Savoy, cousin of King Victor Emmanuel. In addition to the Italian troops, Mussolini will have half as many native fighters from Eritrea and Somaliland. The duce intimated he would quit the League of Nations if it took any action against Italy, but he also offered to negotiate an accord with Great Britain.

The British asked France to define its attitude should any nation attack the empire, and soon after Sir Samuel Hoare replied to France's questions regarding the British attitude toward possible trouble on the continent. The foreign secretary assured France that Great Britain would always support collective action against any aggressor.

High Cost of Living Is Subject of Inquiry

OBEYING the instructions of the President, the federal trade commission has begun a survey to determine why the cost of living is mounting so high. Several members of the commission's staff started the investigation in Detroit, where the housewives staged a meat strike some weeks ago. Other members of the staff will take up the work in Chicago, and later the inquiry will be carried on in other centers. The agricultural income especially is to be investigated in the Middle West.

Senator Lewis, Ill in Moscow, Is Recovering

THE many friends of Senator J. Hamilton Lewis of Illinois were glad to learn that he was recovering from the attack of pneumonia that laid him up in Moscow for several weeks. For a time it was feared the illness would have a fatal outcome because the senator's heart was weak. Late dispatches said he was able to take nourishment but the physicians could not tell how soon he would be in condition to travel.

Ernest P. Bicknell of Red Cross Taken by Death

ERNEST P. BICKNELL, for 27 years prominent in the American Red Cross, died in Washington at the age of seventy-three soon after his return from Hawaii. He was vice chairman in charge of insular and foreign operations of the Red Cross and directed relief of the San Francisco earthquake; floods in the Ohio and Mississippi rivers; the Cherry and other mine disasters; forest fires and many catastrophies abroad, including the Messina earthquake in Italy.

Florida Narrowly Escapes Another Hurricane

ANOTHER fierce hurricane from the Caribbean swept across the middle part of Cuba, causing more than a score of deaths and doing vast property damage, and then seemed to be heading directly for southern Florida. The residents there made all possible preparations for safety, but the storm suddenly veered and roared off to the northeast over the Atlantic.

Soft Coal Miners Win; Strike Is Ended

SOFT coal miners were victorious in the negotiations for a new wage agreement, and resumption of work in the mines was promised for October 1. The men were out on strike for eight days. Operators yielded to the union demands when they learned that relief officials would aid the strikers.

American Legion Elects Ray Murphy Commander

AMERICAN Legionnaires in convention in St. Louis adopted with shouts of approval the resolution for active opposition to "nazi-ism, fascism, communism and other isms contrary to the principles enunciated in the Constitution." Still cheering, the delegates followed that up by asking the withdrawal of United States recognition of Russia.

The veterans recommended recent legislation for national defense and called for a larger army, continuation of the officers' training camps, the C. M. T. C. and R. O. T. C. in schools, and for a navy equal to any in the world. They asked all nations to work for world peace, and approved the neutrality resolution of the last congress.

Cleveland, Ohio, was awarded the 1936 annual convention after four ballots. The national American Legion band championship was won by the Chicago Board of Trade post musicians, Franklin post was second, Omaha third, and Mineral Springs, Texas, fourth.

At their final session the veterans elected J. Ray Murphy of Ida Grove, Iowa, national commander, and passed a resolution demanding immediate cash payment of the soldiers' bonus. Vice Commanders chosen were: Raymond A. Gales of Virginia, W. E. Whitlock of South Carolina, Whitney Godwin of Florida, Oscar Worthwine of Idaho, Lou Probst of Wyoming.

Mrs. Melville Mucklestone of Chicago was elected president of the American Legion auxiliary.

Williams Says Business Must Share With Workers

AUBREY WILLIAMS, first assistant to Relief Administrator Harry Hopkins, said in an interview that the unemployment problem will not be solved by a business pick-up unless industry "shares increased business with the workers." He asserted that the present gain in business has put few more people to work, and explained this fact by attributing it primarily to increased efficiency which permits employers to produce more goods than before with fewer employees.

Aubrey Williams

Williams said there had been a drop in the number of people on relief, but he attributed this largely to a "hard-boiled" policy under which the rolls were combed of ineligibles.

WASHINGTON NEWS ITEMS OF INTEREST

Brief Resume of Happenings of the Week Collected for Our Readers

Seattle — The Washington state board of pharmacy has appointed as inspector Reed N. Bement of Seattle, who will assume his duties at once.

Spokane — What is designed to be the first Roosevelt-for-President club in the state is being organized at Spokane under the leadership of Elwyn Daniel, democratic county chairman.

Yakima — Yakima county commissioners have reduced the school levy for 1936 from 2½ mills to less than 1 3-4 mills and allowed only $58,000 in their budget for county schools next year, compared with $83,000 in 1935.

Olympia — President Roosevelt has approved an allotment of federal funds totaling $297,986 to be used by the Works Progress administration in Washington. To the federal funds will be added $34,064 by sponsors of projects.

Pullman — Two carloads of fine beef stock will be shipped from the Washington State college here to the Pacific International exposition. Shorthorn, Hereford and Angus cattle, bred and fitted by the animal husbandry department of the college, will be included.

Seattle — Prosecuting Attorney Warren G. Magnuson states that a guilty conscience drove Mrs. Nellie Wood, 56, to his office to repay $205 of the $241 he said she had obtained in relief funds. Magnuson said the woman told him that in paying back the money she had so depleted her own funds now she and her 86-year-old mother must go on the relief rolls.

Spokane — Fear that her husband was about to desert their beer business in favor of the dairy business, said Deputy County Prosecutor Carroll today, caused Mrs. Lucille Smith, 28, to shoot her husband Ray, 35, in the back at their home near here. Smith was in a hospital in a serious condition while the wife was held in the county jail on an open charge.

Aberdeen — Aberdeen is assured of the lowest tax levy in 21 years and one of the lowest in all its history. With valuation figures just received and the budget finished, the 1936 levy was estimated at 61.21 mills, as against 86.60 mills this year and 116.1 for 1934. Levies throughout Grays Harbor county also were substantially reduced. Hoquiam will pay slightly under 72 mills as against 85.20 this year.

Olympia—Urging increased efforts toward reforestation and forest road building, John C. Kuhns, Snoqualmie national forest supervisor, in a special report to the state planning council revealed Washington has available only a 16-year supply of timber. Only 100,000,000,000 board feet of the state's 270,000,000,000 total stand of timber is accessible and merchantable under present logging and milling practices, Kuhns reported. Figures compiled by the Unted States forest service show the average annual cut is nearly 7,000,000,000 board feet, with the average annual growth slightly more than 1,000,000,000. Forests thus sustain nearly 6,000,000,000 board feet depletion a year.

Seven Cars of Pears Shipped

Creston — The packing of d'Anjou pears has been completed in the Peach district and four cars have been shipped by E. A. White and three by Bailey & Snook. The crop was larger than last year.

Bee Sting Kills Bride

Tacoma — Stung by a bumblebee, Mrs. Nellie McFadden, 21-year-old bride of three months, died within 20 minutes while being removed from her suburban home at Spanaway to a Tacoma hospital.

Giant Sunflower Grows

Benjamin S. Powell, Castle Rock, Wash., who says he has seen the boasts of other gardeners in The News-Telegram, asks if anyone can beat his sunflower which measures 13½ feet in height. The flower is 23 inches across.

Apple Harvest Is On

Hunters — The apple harvest has started in the Hunters Land company's orchards here. The fruit is being packed by a large crew supervised by the Ryan Fruit company and trucked and stored in the company's warehouse at Davenport. Many Indians and whites are here on the work.

Salmon Being "Milked"

Centerville — Washington state hatchery officials are now busy at work catching and stripping spawn from salmon caught at salmon traps on the Wind river, Little White Salmon and Big White Salmon river, with the eggs of the salmon taken to hatcheries. Fishing is now closed for salmon one mile below the traps, but one may fish for trout within 400 feet of the traps.

GOLDEN PHANTOMS

Fascinating Tales of Lost Mines

by Editha L. Watson

©W.N.U.

THE CURSE OF GOLD

IN "THE olden, golden days of '49," there were five or six men from Indianapolis, who went West and worked together on shares. They were mining on the San Joaquin river, and had not found any great wealth to spur them on. One day Charles Tooker, one of their number, went out to hunt herbs for medicine, and in his wanderings about he dislodged a boulder and uncovered a nugget which weighed fully 90 pounds, and was nearly pure gold. No other gold was to be found near the place.

Tooker wanted to keep this wonderful treasure for himself instead of sharing it with his comrades. He concealed the nugget where it lay, and went back to camp with the herbs and without saying a word about his golden find.

In spite of himself, he could not act exactly natural. He remained with the party for a month, trying to avert suspicion, but the spell of that great lump of gold was on him, and the other men wondered what was ailing him. At last he could bear the suspense no longer. He had bought a mule from an immigrant, and one night he took the animal to the place where the wonderful nugget lay, dug it out, loaded it on the mule, and set out for other parts.

Two of the men at his camp, who had been suspicious of his actions, had followed him. They saw with bulging eyes the wonderful lump of gold—at last they knew what had been on his mind! They were justly resentful that he was trying to get away with the gold instead of sharing it as was agreed, but they were not quite sure what to do, so they trailed on behind him. They followed all night, and at daybreak they came up in time to fight against a couple of outlaws who set upon Tooker, hoping to rob him of whatever treasure he might have. They succeeded, too, and left Tooker and one of his former friends dead as they hurried away with the laden burro.

The other man returned to camp, aroused his friends, and told them the story. Immediately they armed themselves and set out on the trail of the thieves, catching up with them as they were camped at night. In the ensuing fight two more of the Indianans were killed, and one of the outlaws. The remaining desperado hid the nugget and escaped; he went to San Francisco and lay low.

After six months, this man felt that it would be safe to go back for the nugget. Instead of making the trip alone, for he knew only too well the perils that lurked in wait for lone travelers in that rough country, he got together a party for the purpose of retrieving the gold, and they were to set out together. Two men in the expedition, however, who knew where the monstrous nugget was buried, rode ahead, found the gold, loaded it on a mule, and hurried off. They had a day and a half start on the rest of the party, so they took the stolen treasure 40 miles away to a small mining camp, buried it there, staked a claim over it, and went to work like honorable citizens and honest miners. For six weeks they kept up this pretense; at last, feeling that the trail was clear, they dug up the great lump of gold and went their way. Where they went, and what became of them, we do not know.

The next time the nugget was heard of, it was in the possession of three miners, who joined a large immigrant train and showed it to the travelers. They found it, they said, in the Hot Creek mountains of Nevada. After going for some distance with the immigrants, the miners and their treasure left.

Only the nugget, if it could talk, could relate the adventures through which it passed. It again dropped from all knowledge, only to be recalled again by a half-breed Indian at a military post in Colorado. He knew where it was, he boasted, even, in the simplicity of his heart, giving directions for its finding, and a sergeant and two privates deserted and went to see if he were right.

The cache was 50 miles away from the post, but the three men reached it, found the nugget, and headed for Kansas with it. They had been followed by other soldiers with orders for their arrest, and the party came up with the two privates at last, but too late, for they lay dead on the trail. The sergeant had killed them for the gold, and had fled onward with it.

Strangely enough, in spite of the fact that the deserter and murderer was hunted by the government as the criminal he was, he was never captured. The fact that the nugget apparently passed into the possession of Indians may perhaps suggest the reason why he was never found.

And there the story rests. The wonderful, accursed lump of gold had done all the damage it could, for only white men are so quick to murder for the sake of gold.

NONE OTHER COMPARES TO OATMEAL

in one of the most important things to children — precious Vitamin B for keeping fit. Mighty few cereals have it.

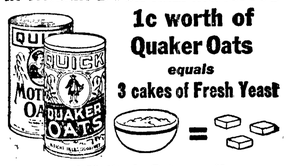
● Many are nervous, poor in appetite, system out of order, because their daily diets lack enough of the precious Vitamin B for keeping fit.

Few things keep them back like a lack of this protective food element.

So give everyone Quaker Oats every morning. Because in addition to its generous supply of Vitamin B for keeping fit, it furnishes food-energy, muscle and body-building ingredients. For about ½c per dish.

Start serving it tomorrow for a 2-weeks test. Quaker Oats has a wholesome, nut-like, luscious appeal to the appetite. Flavory, surpassingly good. All grocers supply it.

IN VITAMIN B FOR KEEPING FIT . . .



1c worth of Quaker Oats equals 3 cakes of Fresh Yeast

Quaker and Mother's Oats are the same

So That's Talent

A talented man is one who dyes his mustache and leaves a white hair here and there.

Test a Coleman LAMP 10 DAYS in YOUR HOME

USE one of the New Coleman Lamps 10 days right in your own home. Prove to yourself, by test and comparison with any other type of light, that the Coleman meets every lighting need in your home with its 300 candle-power "live" pressure light that protects your sight. This offer is secured by a Money-Back Guarantee through your dealer. Just send a postcard asking for Test Certificate, giving name and address of your hardware or house-furnishings dealer, and we will send you a Test Certificate to present to your dealer.

Quick, Complete Pleasant ELIMINATION

Let's be frank. There's only one way for your body to rid itself of the waste matters that cause acidity, gas, headaches, bloated feelings and a dozen other discomforts—your intestines must function.

To make them move quickly, pleasantly, completely, without griping. Thousands of physicians recommend Milnesia Wafers. (Dentists recommend Milnesia wafers as an efficient remedy for mouth acidity).

These mint flavored candy-like wafers are pure milk of magnesia. Each wafer is approximately equal to a full adult dose of liquid milk of magnesia. Chewed thoroughly in accordance with the directions on the bottle or tin, then swallowed, they correct acidity, bad breath, flatulence, at their source and at the same time enable *quick, complete, pleasant elimination.*

Milnesia Wafers come in bottles of 20 and 48 wafers, at 35c and 60c respectively, or in convenient tins containing 12 at 20c. Each wafer is approximately an adult dose of milk of magnesia. All good drug stores carry them. Start using these delicious, effective wafers today.

Professional samples sent free to registered physicians or dentists if request is made on professional letter head.

Athletes Are All Slaves to Ol' Man Jinx

THE figure "2" is all Gene Sarazen needs to keep him happy, no matter how many black cats are wandering around. He was born in 1902, became a caddy in 1912, won the P. G. A. and the national open in 1922, triumphed in the British and American opens in 1932 and believes that he cannot lose a match started on the second, twelfth or twenty-second of the month.

The day before he met Jess Willard a gypsy fortune teller informed Jack Dempsey that he could not lose. He still believes that had a great deal to do with his winning the title. On the other hand, Willard feels that he might have done much better if a black duck had not fallen dead at his feet while he was taking a walk that day.

Dempsey

Any race fan will tell you that if you tear the corners off your program you will have good luck, because the jinx has nothing on which to light.

If the weeds in the marshy area in South Jersey turn jet black in the fall, Princeton knows that it will beat Yale in football.

Gar Wood, the speedboat champion, insists that two Teddy Bears must trail at the stern of his boat during a race.

A pair of baby shoes tied to the steering wheel was all that Pete DePaola needed to convince him that he could win an automobile race.

A small ivory goat, presented to him by his godmother must be in his pocket before Lester Stoefen can have any luck in a tennis match.

No matter how good his arm feels, Red Lucas knows that he will be knocked out of the box any day when he fails to step over the foul line right foot first.

No matter where he is, Barney Ross sends for his favorite Chicago barber to cut his hair. It's expensive, but Barney's a champion.

George Dempsey, the six-day bicycle rider, has different ideas about his hair. He will not permit it to be cut during a race or four weeks previous to one.

Whenever Pepper Martin is in a batting slump he chases the jinx by changing room-mates.

Jockeys are like other people. They enjoy seeing their pictures in the papers but they seldom will pose for one before a race.

Horses also refuse to take chances. Monarchists, a great thoroughbred of many years ago, would not run unless his jockey wore a coat over the bright silks.

Some athletes gnash their teeth at fate, but Jim Barnes always found better use for his molars. He used them to chew a lucky sprig of purple clover, just as Johnny Dundee used to trail success in the ring by gnawing at a match stick.

When the Louisiana Lottery was running you could win a fortune if you played No. 6 after seeing a stray dog. No. 14 was the one to put your money on if you glimpsed a drunken man.

* * *

Things Box Score Never Told Me

Travis Jackson says that Hack Wilson was the toughest slider of all the men he ever tagged. He always was thankful that Hack, who waited until he was almost on the bag before coming in feet first, did not use sharp spikes. . . . Dick Bartell's pet sliding aversion was Riggs Stephenson, the former Alabama football star, who often played football while coming into the base. . . . Both of them say that the best thing about Pepper Martin is that he usually slides head first.

Casey Stengel's first manager told him that he never would make good because he packed too much weight around the hips. . . . The Pittsburgh dugout is the hottest in the National league, the sun shining into it all afternoon. . . . Jack Doyle, who sets the prices on most sports events, has been to the races only three times in 30 years. . . . Soldiers at Fort Hamilton claim that the ring there is the largest in the world.

FRANKIE FRISCH comes sliding into the bag while the baseman stands there, ball in hand, waiting for him. In the dugout some player yawns and turns to his team mates.

"There goes Frankie again, making that old college try," he remarks in tones of supreme disgust.

Where the term originated I do not know, although it is obvious that it is an expression of the professional athlete's scorn for the player who does not get paid for his work. But I do know that it has become baseball's most overused term of disapproval for the player who, presumably for the sake of being theatrical, attempts to make some play that cannot be made.

Also I know that the increasing number of big timers who regard anything out of the ordinary as "the old college try" is one of the reasons why the sport lacks a very real part of its former fascination for the fans.

That Frisch lasted so long as one of the highest paid players in the game may be attributed largely to the fact that he is possessed of the spirit which drives him into making that "old college try," even though his legs may rebel against such exertions. Certainly it also is the reason why the old Orioles, who had such scant esteem for most collegiate notions, remain famous 40 years after the days of their active glory.

Frisch

Indeed this fierce impulse to lead forlorn hopes, to refuse to admit that any shoestring catch is impossible until a muscle straining effort to accomplish it has been made, is one very important reason why there are any stars to applaud today. It is a fact that makes up for the occasional athlete who may, as the dugout critics so often yelp, go through the motions merely to show off.

It was the spirit which compelled him to try the impossible which made Ty Cobb the great player that he was when men of perhaps equal speed and keenness of eye were serving a dull span in the big show. In spite of the toll taken by time during his last months as a player Babe Ruth had this spirit, too. Earle Combs, so often so badly shattered in the service of a cause, had it.

"Old College Try" Is Mark of Star

Lou Gehrig, Casey Stengel, Sherry Magee, Chief Bender, Rabbit Maranville and—but there is no need to call the roll. Search through the list of all time greats yourself. You will discover that, almost without exception, each of them was possessed of that fierce impulse to deny that anything was impossible when victory was in sight.

Obviously, I am not suggesting that a player should sacrifice all regard for life and limb merely to provide a spectacle for the customers. The memory of Johnny Grabowski diving head first into a concrete floored dugout, of Greasy Neale crashing so hard against the right field wall at the Polo grounds that he had to be rushed to the hospital, of Frank Bowerman, Christy Mathewson's old catcher, splintering a timber several inches thick by the force of his impact while chasing a foul, would prevent me from requiring murder for my 50 cents.

Yet I am wondering how many younger players and fans realize how firmly this now scornful expression "the old college try" is bound up with all that is best in baseball. I am wondering how many of them realize that, by and large, it really is the same spirit which makes a Frisch, a Combs, a Joe Moore, a Ruth, a Greenberg or a Cobb stand out far above their humdrum fellows. I am wondering how many of them really understand that the refusal to quit chasing a fly ball until it has hit the ground and the run has been scored must still go far toward determining the winner whether among men or among teams.

Greenberg

Probably, though, the number is large. Indeed, the more you think about it the more you suspect that "the old college try" was given its present meaning because of somebody else's inefficiency; that lazy men, anxious to cover their own defects, endeavored thus to express their jealousy of stiffer marrowed fellows.

I recommend that thought to the next occupant of press box or dugout—I do not include the stands because the subject is far better understood there—who feels called upon to sneer when Joe Vosmik takes a nose dive in the outfield or when Pepper Martin comes swarming into a well-blocked base?

If that is the "old college try," and I have mentioned that the two things seem much the same to me, it is by far the most important contribution of any campus to any sport.

COMMENTS ON CURRENT TOPICS BY NATIONAL CHARACTERS

REPUBLICANS COULD

By COL. WILLIAM J. DONAVAN
Prominent Republican.

THE Republican party could reduce Federal payrolls materially without injuring the service. It could return direct relief to local and private agencies. It could stop the absorption of credit and capital for public plans and programs, many of which are dead before the final bill can be paid. To sum it up, the Republican party could steer this government back into those channels of personal liberty, home rule, states' rights and balanced authority which have been demonstrated as dependable.

The Republican party can take a definite, uncompromising stand for those principles, standards and traditions which have made this country what it is and which cannot be ignored without changing it into a different kind of country.

CANADIAN RECOVERY

By R. O. McCULLOCH
Insurance President.

AS YOU know, at the present time we have cheap money, and there is a great shortage in heavy goods equipment. With low interest rates and a renewal of confidence, the stage is set for a complete recovery and the end of the depression. Great Britain is an outstanding example. She balanced her budget and confidence was restored there, with the result that there is prosperity in Great Britain, and her unemployment has been reduced by more than a million. Canada is a young country which offers great opportunities. Our natural resources are practically unlimited, and we have a virile people. I am convinced that we are on the threshold of business expansion greater than we have ever seen.

SILVER IN CHINA

By JAMES A. MOFFETT
Federal Housing Administrator.

STRONG international propaganda is striving to place the Washington silver policy in the position of ruining China. The depression existing in Shanghai, suicides, reduction in birth rate, floods, crop failures and practically everything detrimental which may occur seem to be blamed on Uncle Sam and silver.

My impression is that China, as a whole, is not as badly off as many would have us think. Generally, it is better off than a year ago.

Shanghai presents a totally different picture, suffering from the collapse of a real estate boom which was artificially developed when silver went down, and quite out of line with the fundamentals existing.

PARTY DEFENSE

By JOSEPH T. ROBINSON
Senator From Iowa.

THIS administration is being subjected to intense criticism, which is understandable considering the approach of next year's election.

Our President has been charged with everything from communism to despotism, and yet you cannot pick up a daily paper that does not reflect a rise in the stock market, an increase in profits, a resumption of dividends; in fact, every manifestation that tells of a country bound back to prosperity. . . .

It is my belief that when history writes its review of the legislation of this congress it will be made clear that the laws enacted were for the greatest good to the greatest number.

RADIO'S FUTURE

By GEORGE H. PAYNE
Federal Communications Commissioner.

THE radio in this country is practically entirely in the hands of those interested solely in its commercial aspects. . . .

No matter how honest may have been the original thought, there is fundamental danger in the idea, more or less casually advanced, that the broadcasting business constitutes a fifth estate in our government.

It is because the people, through their government, will not tolerate the creation of a fifth estate that they have, in the exercise of their sovereignty, taken over the control of the air and have passed the law regulating the use of the air.

SOCIALISM, COMMUNISM

By ALFRED E. SMITH
Former Governor of New York.

IT IS a great mistake to say we have a property or privileged class in this country. Lincoln said property is only the fruit of labor.

We have false prophets nowadays, but we do not call them that. We call them demagogues.

Socialism and communism stand in violent opposition to everything we call Christian and to everything we call American. I for one don't think that they will get very far in this country.

WNU Service.

ANTS ATTACK BEASTS

Vast swarms of ants in the Amazon forests of South America attack jaguars, alligators and large snakes, overwhelming them by sheer weight of numbers.

Let Me Think

It is a question whether evolution will produce a majority of good thinkers. How do you go about it to make a thinker?

LONG TRIP FOR A MEAL

So scarce is food among the Central Australian aborigines, whose oases are absent, that it is no uncommon thing for a woman to cover 10 to 20 miles in the endeavor to get enough food to supply the needs of her family for a single day.

Responsibility

More "rights" you have, the more responsibilities.

Calumet Baking Powder is selling at New Low Prices

"No more 'by-guess-and-by-golly' baking!"

Says Mrs. Owen H. Fleming, of 1255 Judson Ave., Evanston, Ill.

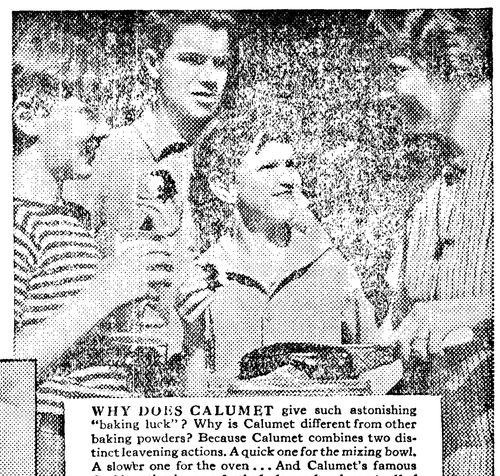
MRS. FLEMING, of Evanston, Ill., was one of the first to hear the grand news: *All Calumet prices are lower!*

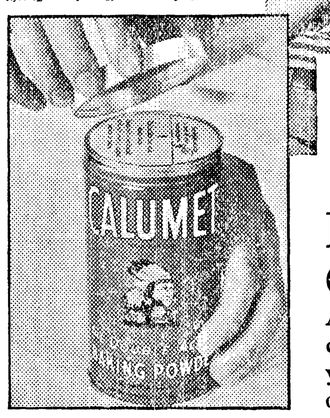
"No need for any woman to take chances with her baking now," says Mrs. Fleming. "Now that Calumet's selling for the lowest prices in its history, it means that the very best can be bought at a bargain."

Ask *your* grocer for Calumet!

• • •

A SIMPLE TWIST... *and the Easy-Off top lifts off. No spilling, no broken finger-nails!*





WHY DOES CALUMET give such astonishing "baking luck"? Why is Calumet different from other baking powders? Because Calumet combines two distinct leavening actions. A quick one for the mixing bowl. A slower one for the oven . . . And Calumet's famous double action is so perfectly *balanced* and *controlled* that it produces perfect leavening—every time.

Now! Big New 10¢ Can . . . Calumet, the Double-Acting Baking Powder, comes in two convenient sizes. The new-size can is yours for a dime . . . the regular price of the Full-Pound Can is now only 25¢.

DIZZY DEAN nabs a runner!

Boys! Girls! . . . Get Valuable Prizes Free!

Dizzy Dean Winners Membership Pin. Solid bronze, with red enameled lettering. Free for 1 Grape-Nuts package-top. In ordering membership pin, be sure to ask for Prize 301.

Dizzy Dean Lucky Piece. Just like Dizzy carries—with his good luck motto on reverse side. Free for 1 Grape-Nuts package-top. In ordering lucky piece, ask for Prize 303.

Join Dizzy Dean Winners—Carry Dizzy's Lucky Piece!

Send the top from one yellow-and-blue Grape-Nuts package, with your name and address, to Grape-Nuts, Battle Creek, Mich., for membership pin and copy of club manual, containing list of 37 nifty free prizes. And to have loads of energy, start eating Grape-Nuts *right away*. It has a winning flavor all its own—crisp, nut-like, delicious. Economical to serve, too, for two tablespoons, with whole milk or cream, provide more varied nourishment than many a hearty meal. (Offer expires Dec. 31, 1935. Good only in U. S. A.)

One thing that will be beneficial to the Ethiopians during and after the war is that Italy's working soldiers following fighting troops, are building modern roads with rock foundations between the conquered towns.

Indians of Early Ohio Believers in Witchcraft

The Indians of Ohio, firm believers in witchcraft, generally attributed sickness and other misfortune to this cause, and were in the habit of murdering those they suspected of practicing it.

When a redskin became so sick he was in danger of death, it was usual for his tribesmen to place him in the woods alone, with no one to attend to him except a nurse and a doctor, such as they were. According to the rules, no one was allowed to visit the sick person except those who provided him with medical attention.

Although visitors of the sick were thus restricted, when the person died, anyone could attend the funeral, at which there was usually lamentation that would put to shame some of the hysterical carrying-on of today.

More peculiar was the manner of burial. For instance, in the lid of a coffin made for a Shawnee chief holes were drilled over his eyes and mouth to let the good spirit pass in and out.

Over the grave they laid all sorts of presents in the belief that these would be taken by the good spirit during the night. And sure enough these trinkets had all disappeared during the night, removed by the hand of an "evil spirit clothed in human body."—Cleveland Plain Dealer.

Mackerel, a Kin to Tuna, One of Athletes of Sea

The mackerel is related to the famed tuna, although it seldom exceeds four pounds in weight. But, like a tuna, says the Montreal Herald, it is a clean cut, clean living fish, and it might be called one of the athletes of the seas. Its muscles, which are the edible part, are very well developed, and tend to be somewhat firmer than those that are found in less active fish. It is this development which produces the firm texture of mackerel, and it is also responsible for the slightly darker appearance of the meat. It seems that nature made the active muscles a little darker in color than the non-active; thus we find that the domestic fowl, which does not do much flying, has white breast muscles, whereas the pigeon, which is famed for its flight, has dark breast muscles. A domestic rabbit has white flesh, a wild rabbit has dark flesh. Similarly such fish as the salmon, trout, tuna and mackerel, which are very active and powerful swimmers, tend to have a darker flesh.

The Indians and aborigines used to think that in order to be strong and brave one must eat animals that were strong and brave.

The Electromagnet

Andre Marie Ampere, of France, discovered, among other phenomena, that parallel electric currents in the same direction attract each other, while those in opposite directions repel each other. He announced his belief that the properties of a magnet are primarily due to the action of electric currents. In 1820, with Argo, he magnetized steel needles by placing them in a helix of wire carrying an electric current. In 1825 William Sturgeon produced the first electromagnet worthy of the name. He bent a core of soft iron into the form of a horseshoe, varnished it to provide insulation and then wound it with a loose spiral of bare copper wire. His magnet could lift nine pounds, or about twenty times its own weight. So began the development of a device that was to play an important part in the progress of the art of electrical communication.

Source of Khiva Rugs

Khiva rugs come from the Soviet republic of that name, in Asiatic Russia. Khiva also is the capital. In America, travelers returned with rugs bought in this strange city, and eventually they were given the name "Khiva." Though the region is divided by natural barriers from China and Tibet, the influence of the Far East is strong, its symbolism apparent in the art. The so-called "octagon" design belongs to this region. Originally, the Chinese employed this design with each division presided over by its animal and bird deities. Eventually, however, the designs evolved into a pattern of light and shade, and today it is very rare that even a suggestion of the animal or bird figures appears.

Messages Without Wires

The radio or "wireless" telegraph was first used commercially less than half a century ago. Yet the research which led to this service began as early as 1842, when Joseph Henry demonstrated the oscillatory character of Leyden jar discharges and detected the impulses in isolated receiving circuits several hundred feet away. In 1879 D. E. Hughes found that such a discharge would cause iron filings, though not physically connected with the jar, to "cohere," but failed to appreciate the importance of his discovery and did not then publish it. In 1887 Heinrich Rudolf Hertz produced and detected electro-magnetic waves, since then known as Hertzian waves. Upon these foundations Marconi developed the wireless telegraph. To these pioneer efforts, other engineers and scientists have added long years of labor in order to create the far-reaching systems of radio telegraph and telephone facilities which serve the world today.

Measuring Length of Golf Hole

The usual and accepted method of measuring the length of a golf hole is on an air line from the middle of the back to the center of the green. The air line simply means that it is measured across natural depressions, instead of following the ground contour. On a dog-leg hole the fairest method would seem to measure the line which would mormally be taken by a standard golfer in playing the hole, i. e., put a peg in the middle of the fairway at what might be called the angle point of the hole and then measure from the middle of the back tee to the angle point and to the center of the green.

Cause of Stuttering

Stuttering usually is not caused by a defect in the organs of speech but by a highly nervous state which interferes with them. Persons so afflicted can always whisper and sing and even speak normally at times. Some become so nervous that they "stutter" in other ways. A musician may sound the same note and a typist may hit the same letter several times spasmodically before going on to the next one.—Collier's Weekly.

Presidential Succession

The order of succession established by acts of congress in 1886 provides for the secretary of state to succeed in the event of the death of both the President and the Vice President; after him, in order, are the secretary of the treasury, secretary of war, attorney general, postmaster general, secretary of the navy, secretary of the interior. There is no provision for the election of a new President to fill a vacancy. The retiring President remains President until his successor has been inaugurated.

COMPLETELY MODERNIZED AT A COST OF 150,000.00

hotel GOWMAN

ALL rooms now with bath . . tub, shower, or both. The homelike atmosphere . . the *Personality* . . for which it's famous, plus delightful newness! Rates from: Single, $2.; Double, $3.

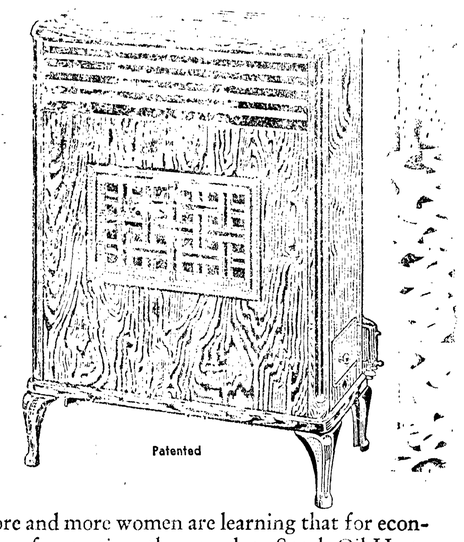
FOR BEAUTY—FOR ECONOMY FOR SAFETY

SPARK PATENTED OIL BURNING CIRCULATING HEATER



More and more women are learning that for economy of operation, these modern Spark Oil Heaters far outclass any of the old-fashioned methods of heating. The beauty and efficiency of the Spark are well known, but you'll have to use one in your own home for a few months to realize how it cuts down your fuel bills. And think of the comfort and convenience of it! Clean, healthful, circulating heat, and cheerful, cozy radiant heat—all at the turn of a valve!

$59.50 To $112.50 Not Installed

Nothing Down Payments as low as $5 a month under E.H.A. Plan

THE CITY FUEL CO.

...but, after all is said and done, it's the cigarette itself that counts

...the question is, does it suit you?

Now, when it comes to a cigarette that will suit you . . . you want to think whether it's mild, you want to think about the taste

That Chesterfields are milder and taste better is no accident . . .

The farmer who grows the tobacco, the warehouseman who sells it at auction to the highest bidder, every man who knows about leaf tobacco will tell you that it takes mild, ripe tobaccos to make a good cigarette.

In making Chesterfields we use mild ripe home-grown and Turkish tobaccos.

Outstanding
.. for mildness
.. for better taste
