WONDERFUL CLALLAM

Her Resources Get Another Excellent Write-up in a Promising Seattle Magazine.

Port Angeles and Clallam county their industries and resources received the following brief summary in an article written by Horace White, secretary of the Commercial club. The write-up was published in the current is ue of The Coast, of Seattle, a magazine of growing importance, together with the illustrations and the excellent article on the lakes, prepared by the Coast people for the Puget Sound Navigation Co.:

Clallam county, Washington, is the most western point in the mainland of the United States, and is located on a peninsula touching the Pacific ocean, the strait of Juan de Fuca and Puget Sound. It has an area of about two thousand square miles and a population of over seven thousand. The country is principally mountainous and densely covered with timber, which consists mainly of fir, cedar, spruce and hemlock, with many acres of larch, Alaska cedar and white pine in the Olympic mountains. The soil is a rich alluvial and adapted to agricultural, pasturage and fruit land. Numerous small streams flow from the mountains into the salt water along which lie fertile valleys which extend into the foothills up unto the very mountains' base. Flourishing crops of all kinds of Western Washington products are here raised. There are many very fine farms in the country and a vast area still awaiting development. The principal industries are lumbering, fishing, dairying and agriculture. Large numbers of halibut are caught off the coast at Cape Flattery and food fish, including shell-fish, are abundant. The climate is the most delightful in Western Washington, there being less rainfall and warmer temperature than at other places in the winter. A fair quality of coal has been discovered in the county, and gold, silver and other metals are found in the mountain fastnesses. Taking its scenery, natural advantages, climate, resources and topography into consideration, Clallam county is a veritable garden spot of the state of Washington. Port Angeles is the county seat. Other flourishing towns are Dungeness, Port Williams, East Clallam, Crescent, Pysht, Quillayute, Sequim and Tatoosh.

In Clallam county the Olympic mountains extend from the south up through the center and leave a strip of exceedingly fertile and tillable soil along the coast line, where are located the settlements and towns. In the mountains are many lakes and most delightful summer resorts, where is most excellent hunting and fishing amidst the great areas of timber and grass lands which are the finest in the world. The scenery charms the eye with its beauty and the wildness of it all entrances the soul. At the present time in the western part of the county great activity is being manifested where the timber reserve has been opened by homesteaders taking up claims and it is estimated that within the past twelve months over a thousand different claims have been taken up. Indeed, through the efforts of enterprising and active business men, who have organized and maintain a commercial club at Port Angeles, a steady growth is evidenced all over the county by the addition of farmers, loggers, mill men and other enterprises. At the present time several shingle mills, a salmon cannery, a brewery, saw mill and several new logging camps have been added to the county's industries.

Especially noticeable among the latent advantages of this county is the opportunity for water power offered by the Elwha river, which when taken advantage of will offer unparalleled opportunities for the establishment of mills and factories. We present a view of the canon or the Elwha thirty feet wide and one hundred feet deep five miles from the harbor of Port Angeles which will develop at lowest water 100 6 horse power per foot head. When the river is in normal condition about 10,000 horse power can be developed.

Other features of the present growth of the county's interests are the building of the Port Angeles & Eastern Railway, which will run from Angeles along the coast line and connect with other roads at Olympia, and which gives promise of being built within a year; also, the Port Angeles Western Railroad, which will extend westward from Port Angeles along the coast line and connect with the Northern Pacific at the Quillayute river. Surveyors are now at work upon the last named road, and all preliminary work is rapidly progressing to consummate its completion. John Cain, of Port Angeles, has interested Eastern capitalists in the project, and money, it is said, has been provided for its building.

Among the latest institutions added to Clallam county's commercial trade interests is a Morgan stock farm, established this year by Dr. S. W. Hartt, of Port Angeles and E. D. Hines, owner of the Fordaway stock farm at Pittsburg, Vt.

A noticeable activity is now manifested in tourists and pleasure seekers going through to Port Angeles to Lake Crescent and Sutherland, and also of people who take advantage of the renowned Solduck River Hot Springs near the lakes, as a health resort. Theodore A. Moritz is now conducting the Hot Springs, with his postoffice address Fair-

MARCONI MEN NOW TALK.

Experts of That Company Visit the Cape on a Tour and In Seattle Talk of the System.

If there is business enough in sight to justify it, a wireless telegraph system will be established between Cape Flattery and Seattle, says the P.-I. Representatives of the Marconi Wireless Telegraph Company are now in the city investigating the matter. The line, if established , would be used almost exclusively by shipping men to report ships in and out, though on the Atlantic coast wireless telegraphy is used by passengers to send messages to friends on shore.

An agent and party has visited the cape and Richard Pfund, engineer for the company, says that on on that on his return from Alaska, where he goes to establish a system for the government, it will be definitely decided about the line to the cape. If the line is established the San Francisco liners and the Oriental ships will be equipped so that messages can be sent from the vessels to the stations.

Speaking of the expedition to Alaska Engineer Pfund says:

"The line we propose to establish is not in the nature of a test at all. It has been thoroughly demonstrated that the system is a success, and we are going to Alaska merely to fill a contract made with the government. We will establish three stations—one at Fort Gibbon one at Bates' Rapids and an intermediate station. The stations will consist simply of a pole 250 feet high, with insulated wires running to the ground. We will take four poles and splice them together to get the required height.

"At the foot of each pole we wi l have a two-horse power engine to run the dynamo, and after we get the stations completed a soldier from the signal service will be stationed at each point. But one man is necessary to run each station so that after the line is completed the cost of operation will be very small.

"The government has had great difficulty in keeping up telegraph lines in that country. Were a line built between the two points we intend to connect it would take six thousand poles, and there is something happening to the wires all the time. The government has tried laying cables in the rivers up there but finds that when the ice breaks up the cables are torn out.

"Wireless telegraphy is just in its infancy at this time. We can sedd but fifteen words a minute, which is much slower than the regular telegraph, but with our system there is no such thing as wires being down or not working. We hope to have the line in operation by the first of October."

The Same Old Story.

J. A. Kelly relates an experience similar to that which has happened in almost every neighborhood in the United States and has been told and re-told by thousands of others. He says: "Last summer I had an attack of dysentery and purchased a bottle of Chamberlain's Cholic, Cholera and Diarrhoea Remedy, which I used according to directions and with entirely satisfactory results. The trouble was controlled much quicker than former attacks when I used other remedies." Mr. Kelly is a well known citizen of Henderson, N.C. For sale by C. E Nailor & Co.

Clallam Bay Record.

There is rumor that the Kellogg Bros. are going to put in a shingle mill at the Sekiou soon. As they have sold their mill site at Ballard to the Stimpson Mill Co., there may be some foundation to the report.

Council Notes.

The only business of importance to come before the council Wednesday evening was the re-electian of A. H. Gould to fill a vacancy caused by his own absence. In law a councilman being absent from three consecutive meetings without leave loses his seat. Mr. Gould had been away on a leave of absence, but failed to get back within the prescribed time, hence the necessity of electing him to the vacancy caused by himself.

Finance commitee reported that they had examined the financial report to June 30, and found same correct.

Major R. R. Harding in a communication stated that in his opinion he was not qualified, on account of not being a duly elected justice of the peace, to fill the office of police judge, and therefore tendered his resignation to take effect at once.

On motion Mr. Harding's resignation was accepted and Justice of the Peace Penniman was elected to fill out the unexpired term.

A petition from R. H. Kidd asking for permission to erect a wooden awning in front of his place of business on Front street was read and on motion permit was granted.

Following claims were ordered paid:

Maintenance of poor, July	$18 00
J. A. Smith, express charges, etc.	10 75
D. S. Allen and men	63 30
B. Chamber, et al	4 00

It appearing that Councilman Gould had been absent from council for three or more consecutive meetings after the expiration of his leave of absence, it was moved by Councilman Grubb that his office be declared vacant. Motion prevailed.

On motion council proceeded to elect a councilman for the fifth ward. Vote resulted A. H Gould 4; J, E. Beam, 2.

Councilman Bowman reported that road on C Street passed close by sawmill with the result that horses passing were frightened by the issuing steam, and proposed that one of the neighboring streets be opened up for travel. Matter referred to street committee for report.

On motion the street committee was authorized to employ an engineer to assist in plan of repairing Lincoln street sewar.

Council then adjourned.

It has been called to our notice that members of the court house ring, fearful lest the people should rise up in their might and smite them in their grand "swapping" office act, have industriously circulated among certain Democrats and in an endeavor to swing them into the ring ranks have deliberately lied to the effect that the Democrats of the county are not going to hold a convention this year, and offer as proof that no call has yet been made for even a meeting of the County Central Committee. Of course there are few who could be gulled by such rot as this, but let none be so imposed upon. The Democrats have no "slate" to crowd through and the chairman and secretary of the county committee are not tools of any candidate, who can at will, induce them to prematurely move in the matter. The committee will be called together in due time and the date of the county convention fixed in regular order, and a ticket will be named by the Democrats of the county, not by a half dozen ringsters.

WHY not harmonize with the Republican party and be done with it?

READ the Declaration of Independence before you decide it out of date.

DEMOCRATS will carry Spokane county this fall because of the success of the Wilson faction.

TAKE a look through the histories of your boyhood days; they are less biased than the modern books.

WHEN the Republicans in Congress repeal one of the trust-fostering tariff laws, the people will have more confidence in their anti-trust speeches.

WHEN we read of the awful storms, losses of crops and starvation and thirst of cattle now prevailing in various eastern states, how glad we are that we live in a country where crop failure and devastating storms are unknown.

WHEN the ringsters decided on an early convention in the interests of the ring candidates who had full notice they did not publish a call giving the various committeemen due notice. They arranged so only a certain few could attend and then of course had everything their own way, as far as setting the date was concerned at least.

BECAUSE the ringsters have seen fit to debar the citizenship of the Republican party by calling the convention six weeks earlier than the latter wished it, and six weeks earlier than is customary, is no reason why Democrats should act likewise. The state convention is called for Sept. 16th and the Democrats will meet in county convention in plenty of time. A call will probably be made next week.

Sherman, Clay & Co., the largest and oldest Music House west of Chicago, have already placed samples of their world leading High Grade Pianos in many prominent homes in Port Angeles; they desire to thank those appreciative citizens for their patronage and to intimate to the citizens generally its readiness to deal so liberally that every home having use for a Fine Piano may secure one at once. Roads of Mississippi.

Dr. J. A. Rowan, a prominent physician, has the following to say about the roads of the state:

"From my experience as a country physician in traveling over the roads I am convinced that the present system of working roads in Mississippi is a farce. The inexperience and apathy on the part of overseers and the indifference on the part of hands should convince any ordinarily intelligent person that new methods will have to be adopted. The contract system, with improved implements, is the remedy. In my opinion broad tired wagons would do much toward keeping roads in good repair, and our legislature should enact a law requiring the narrow tire to be replaced by the broad after three or four years or one allowing parties using them a credit on their road tax. I often go double the distance over our best roads rather than go half as far over the average, saving time and comfort thereby. The people will have to be educated along the lines of better roads, and new methods will have to be forced upon them."

What Good Roads Mean.

Good roads mean to us both profit and pleasure. They will enable us to own better vehicles and take pride in them. They will help the churches and schools in every locality. Good roads mean a saving of time, the value of which, as a whole, can hardly be estimated. They will increase the average life of our vehicles probably a third and the saving of wear and tear on our teams probably more, to say nothing of the increased loads that can be hauled with the same teams.

Good roads will be a benefit to everybody except the wagon shops and carriage makers. — Cor. New Orleans Times-Democrat.

HAY FEVER

Time seems most untimely when he brings a woman to the turn of life. Life is or should be at its ripest and best for her, and she approaches this change with a dread of its effect born of her knowledge of the sufferings of other women at this season.

There is not the slightest cause for fear or anxiety at this period if Dr. Pierce's Favorite Prescription is used. It gives health of body and cheerfulness of mind, and by its aid the pains and pangs of this critical period are prevented or cured.

Dr. Pierce's Favorite Prescription is woman's medicine with a wonderful record of cures of womanly diseases. Diseases that all other medicines had failed to cure, have been perfectly and permanently cured by the use of "Favorite Prescription."

"I feel it my duty to write you as I have received so much benefit from the use of your medicine," says Mrs. Lizzie A. Bowman, of New Matamoras, Washington Co., Ohio. "I have taken four bottles of 'Favorite Prescription' for female weakness and change of life. Before I began taking it I could not do anything. I had such pains in my head and in the back of my neck that I thought I would lose my mind. Now I can work every day. I recommend 'Favorite Prescription' to all females suffering in the period of change of life. It is the best medicine I have found."

"Favorite Prescription" has the testimony of thousands of women to its complete cure of womanly diseases. Do not accept an unknown and unproved substitute in its place.

Keep the bowels healthy by the timely use of Dr. Pierce's Pleasant Pellets

COMMONER SAYINGS.

The "reorganizers" failed to show the Missouri democrats.

By all means get together, but let it be done on democratic principles, not upon appetite for office.

Of course the disastrous floods will be laid to Providence, but all good weather is claimed by the g. o. p.

The figures prove that the "shadow of predestined defeat" began to grow in the immediate vicinity of 1894.

Are we to understand, Admiral Dewey that American lives were sacrificed to Spanish pride and naval complacency?

Two days before the president told what he was going to do to the trusts congress adjourned without having done a thing to them.

Perhaps they call the beet sugar industry an infant because the most of the work in the beet fields is done by little boys and girls.

President Roosevelt said a few words in denunciation of the trusts and then took lunch with Mr. Frick of Homestead riot and steel trust fame.

Law officers raise a great outcry when a few bandits hold up a railroad train, but remain perfectly quiet when a railroad corporation holds up an entire state.

An Indiana democrat complains because the party did not have a big campaign fund in 1896 and 1900 and blames the editor of The Commoner for it. Well, we could have collected as much from the trusts as the committee did in 1892 if we had been willing to mortgage the party to the trusts as it was mortgaged in 1892.

No one can read the republican speeches delivered on July 4th without recognizing that it was easier for the revolutionary patriots to assert their inalienable rights when those rights were attacked by others than it is for present day republicans to respect the same inalienable rights in others when there is a profit in invading those rights.

Neah Bay.

A representative of the Marconi wireless system made a trip to Tatoosh island one day this week looking up a site for a tower, the agent says they will establish a station near San Francisco and probably one at the entrance to the straits.

Morse & Land will probably get the contract to erect a tower on the main land and one on Tatoosh island to support the over head wire to be strung by the W. R.

The line party is making fair progress with the construction of the new line, it will go by the way of Wastch prairie then up the coast to the cape.

A WONDERFUL WORK.

To be a man who can excel one hundred thousand men in any one line is good; to be one in a million is better; but to be the only living man, (and the second one in the world), who has drawn a perfect single line picture, is wonderful! This Mr. Fleming, author and illustrator of "Around the Pan," and "Around the Capital" ($2.00 books) has done in his drawing of McKinley. Price on best Japanese paper, $1.00.

His "Around the Capital," containing one hundred and fifty full-page Washington life pen and ink sketches and five hundred picture of prominent Americans, including the statesmen, ambassadors and commanders participating in the Spanish American War—comprising by far the greatest collection of facts and faces ever produced in one volume in condensed form, will interest the entire civilized world. The drawings equal, if they do not surpass those of John Tenniel's, for which work he was knighted by Queen Victoria. The humorous contagion.

WEEKLY CROP BULLETIN.

A Brief Summary of the Condition of Crops in All Parts of the State.

U. S. Department of Agriculture Climate and Crop Bulletin of the Weather Bureau, Washington Section. Week ending July 21, 1902.

The past week was cool during the fore part, but the temperature gradually increased until it became very hot at the close. Maximum temperatures of 95 degrees and upwards occurred in the western section on the 19th, and of 100 degrees and upwards in the eastern section on the 20th. There were light to heavy showers on the 14th and 15th in the western section and light showers in some localities of the eastern section.

The showers were of benefit to growing vegetables, but the high wind and rain damaged considerable hay. The remainder of the week was fine haying weather, and a fair crop was secured.

The heavy wind storm of the 14th inst. greatly damaged fruit all over the state, but especially in the eastern section, in Spokane, Whitman, Adams and Walla Walla counties, where it was one of the heaviest winds ever known, reaching a velocity of 50 to 60 miles per hour. Many fruit trees were broken or uprooted, and a great many apples blown off. Fall wheat and barley were badly broken down and thrashed out in all of the counties named, although there were some localities where the damage was very slight. Spring wheat was not badly injured by the wind storm, but will probably be shrunken some by the hot, drying winds at the close of the week. Hops have been benefited by the warm sunshine, the vermin having been destroyed. Cucumbers, corn and melons are growing well.

Announcement.

Candidate For Sheriff.

As already noted William Tyrrell is in the field for sheriff of Clallam county, subject to the endorsement of the coming Republican convention. Mr. Tyrrell has resided in our midst for a number of years, during which time he has been engaged in various pursuits, and at present is in business here. Politically, he is an old time republican, and after many years of service in the cause, for the first time, he comes before the public asking their suffrage for sheriff of this county. A vote for Bill Tyrrell, as he is called, means the right man for the office.

Judge and Mrs. McClinton, Mr. and Mrs. R. D. Willson, Mrs. McDougall, Miss Willson, Miss Edith Cook of San Francisco, Miss Watkins of Victoria, and Roy McClinton sailed for Crescent Monday afternoon in the latter's handsome sloop Emeralda, for a short outing. The ladies got more or less sick when off the Elwha and the party returned and later took their outing at the Elwha where an enjoyable time was had.

About 70 Angelesites took in the excursion to Port Crescent, Wednesday, given by the Woman's Literary Club of Pine hill. The picnicing at agate beach and sight seeing about the camp proved very interesting, but toward midnight the visitors longed for the boat, which was delayed until 3 a. m. The party arrived home at 5 o'clock, laden with trophies of the visit. The camp at Crescent is now operating two large locomotives and are putting 50 to 75 immense saw logs in the bay daily. They have many miles of track laid, four of which extend in the direction of Port Angeles. The new machine shops, noted in these columns at the time of installation, are now running night and day crews and are capable of turning out work that would embarrass some shops in the large cities. About 150 men are employed.

We regret to learn that Mrs. H. M. Coburn will soon depart for Seattle to join her husband, who has decided to locate in that city. Mrs. Coburn, as a music teacher of some note, and as a lady of sterling worth, has been a prominent factor in the success of many an event in social, musical and religious circles, and she will indeed be missed in future gatherings. It has not been our pleasure to talk with her many pupils and her very numerous friends, but we know her for her self sacrificing qualities which have endeared her to everyone who know her and we are confident of the universal regrets which will be expressed on hearing of Mrs. Cobern's departure from the city. The community loses a good music teacher; the Episcopal church a good and faithful organist, and indeed every good cause a valuable supporter and friend. The best wishes of the DEMOCRAT-LEADER go with Mrs. Coburn and family.

True Economy

The difference in cost between an alum baking powder and the highest-class cream of tartar baking powder would not amount for a family's supply to one dollar a year.

Dr. Price's is the standard cream of tartar baking powder. It makes the food delicious and healthful.

NOTE.—You cannot, if you value good health, afford to use cheap, low-grade, alum baking powders. They are apt to spoil the food; they do endanger the health. All physicians will tell you that alum in food is deleterious.

The New Option Policy

OF THE STATE LIFE INSURANCE COMPANY combines every desirable advantage to the policy-holder that can be obtained in the policy of any safely conducted, progressive, old line company. It is non-forfeitable, upon very liberal surrender conditions, after the second year, and is adjustable to nearly every important financial contingency in life. In short, it may be said to furnish three kinds of insurance for one and the same premium, viz:—

FIRST—Insurance for the benefit of the family, in case of death of the insured.

SECOND—Insurance against poverty in old age, by its cash settlement.

THIRD—Insurance against sudden financial disaster, in that it is available as collateral security for a cash loan, to the amount of its loan value, at any time after two years.

Every policy in the State Life is secured by a deposit of its entire cash value with the state of Indiana

SCHOOL TEACHERS WED,

Popular Young Couple Joined in Marriage Last Evening at the Episcopal Church.

One of Port Angeles' popular young couples were united in marriage last evening at the Episcopal church by the Rev. Mr. Brann, pastor, in the presence of a large number of relatives and a few invited friends.

The ceremony took place promptly at 7 o'clock, and the principals were Mr. Herbert A. Babcock and Miss Grace E. Wilcox, two of the city's talented school teachers. The bride was attended by her sister, Miss Susie Wilcox, while the groom's brother, Mr. Orin H. Babcock, did honors as best man.

Immediately following the ceremony the party proceeded to the home of the bride's parent where a delicious wedding dinner was served, and mirth and a season of joy was had until the arrival of the Majestic to which the happy couple were then driven for a short trip up sound. A merry crowd showered them with congratulations and rice upon their departure. Upon their return they will make Port Angeles their future home.

The young people are both well and favorably known here, having taught in the city schools for some years past with considerable success. Mrs. Babcock now retires. THE DEMOCRAT-LEADER heartily joins in the numerous congratulations already spoken.

SOUR GRAPES.—The wise citizen will "savy" Sherman, Clay & Co., the popular Piano House of the coast have been doing business for sometime in Port Angeles and propose to keep on doing so until the Millennium—in other words as long as the citizens want the very finest class of goods at lowest prices and easiest terms.

PERRIN'S PILE SPECIFIC

Wonderful Clallam.

Continued from Page One.

holme, Washington. These springs are celebrated for their excellent life giving and restorative qualities.

County Assessor Poole states that during the past two years the average valuation of property values in the county have increased fifty per cent. Land to the amount of 200,000 acres has been added since 1900. New shingle mills have increased the milling capacity from 450,000 to 700,000 shingles per day. Stock raising and dairying are becoming important occupations. Blooded stock is taking the place of scrub stock and the establishment at Dungeness of several creameries has stimulated very materially the interest and activity in this direction. No county in the state is experiencing a more marked and assured growth in the rural districts than Clallam and upon such a growth only can permanent and stable progress depend. The county has five newspapers. Its public schools are excellently and thoroughly equipped with competent teachers. Good roads are being constructed to all parts of the county. The people are intelligent and enterprising.

Port Angeles is the county seat of Clallam county and the chief and largest trading point of the residents. It has a population now exceeding 2,500 and is one of the most admirably situated townsites in the United States. It was laid out by the federal government in 1862 as a military reservation and locked up until 1894 when the lots were sold at public auction under the mallet of Captain O'Toole, a complete story of which has been written by Captain Bradley, the present mayor of the place. The harbor at Port Angeles is unexcelled in the world. It has twenty miles of water front with perfect wharfage facilities and according to government charts has an area of nine and one half miles. It has been officially designated as the practicing station for the United States Pacific Squadron. Not a shoal nor rock nor sand bar is known to exist and the bottom forms an excellent anchorage.

Port Angeles enjoys a fine water works system which provides pure sparkling water from the mountains near by and also operates its own electric light plant. It has a daily steamboat service between Seattle and Victoria and is the central trading point and the metropolis of Clallam county. It is surrounded by most excellent and improved agricultural lands and has rich clay deposits in the immediate vicinity suitable for brick, pottery and earthenware. Its public schools, churches, lodges and secret societies; its business houses, industrial and financial institutions are commensurate with the importance which it holds in the growth and development of the entire county.

Back of Angeles four new shingle mills have been erected. Much road building has been going on here. A new bridge has been built by the county over the Elwha river west of Port Angeles. With this closer connecton with the market, the farmers have begun with renewed efforts at bettering their land. This has been, of course, accelerated by the increase in values which has come with the demand on the part of new comers for cleared land.

Thus we might continue to relate a story of progress and development and picture how sturdy pioneers and determined people are carving out of an almost wilderness homes of comfort and prosperity. It is the tale of progress, of American life and its accompanying spirit of enterprise and pluck. It is the resume of faithful American character building for itself a domicile and erecting for its own a home of joy and beauty. It is the study of American progress taming the wilds and bringing orderly cultivated tracts out of a tangled undergrowth of shrubbery and a forest of gigantic, unwieldly trees. It is but relating and reiterating the true American plan of creating a nation by making rightful use of nature's endowments and opportunities.

It is the story of success.

Cut this out and take it to C. E. Nail or & Co.'s drug store and get a box of Chamberlain's Stomach & Liver Tablets. The best physic. They also correct disorders of the stomach. Price 25 cents.
