VOL. 5. NO. 38. PORT ANGELES, CLALLAM COUNTY, WASHINGTON, JANUARY 18, 1895. PRICE FIVE CENTS

CUT IN DEPUTY SALARIES

The County Commissioners Reduce Salaries

OF ALL DEPUTY COUNTY OFFICERS

To $60 Per Month—The County Auditor Allowed Two Deputies, and the Treasurer, Clerk and Sheriff Are Given Each a Deputy—The Appointees of the Several County Offices.

Last Monday noon the new county officials elect assumed the duties of their respective offices for the ensuing term of two years.

There will be a few changes made among the subordinate officials, who, by the way will not enjoy luxurious ease nor princely salaries during the incoming term, as the new board of county commissioners has made vast reductions in the salaries of the various deputies, and allowed the auditor only two deputies with the services of which to perform the large amount of business in that office. The board, however, has not shown preference to any of the deputies, as all will receive the same monthly salary, which has been fixed at $60, paid in salary warrants, the present market value of which is 75 cents on the dollar. By this it will be seen that the deputy has no sinecure position, and certainly will return the county adequate services for the meagre compensation received.

The board doubtless felt justified in enforcing the rigid reduction of the salaries of deputies, owing to the unsatisfactory condition of the county finances, and in view of the positive demand for sweeping retrenchment in county affairs.

The adoption of the [illegible] reduce the total depu[illegible] $141 66 per month. Under the old schedule the several county officers were allowed for deputy hire, the following monthly expenditures: County auditor, $200; treasurer, $83.33; sheriff, $75; clerk, $83.33; total, $441.66. Under the new ruling the following monthly expenditures will be allowed: Auditor, $120; treasurer, $60; sheriff, $60; clerk, $60. To the $141.66 in salary reductions should be added $75 per month which was allowed by the former board to the county attorney for deputy hire, the present incumbent having decided to conduct the office without the services of a deputy.

The personnel of the several offices under the new regime, of course, undergoes quite a number of changes. The retirement to private life and to private business pursuit which, it is to be hoped, will prove far more remunerative than the emoluments received from public office, of the outgoing officials, brings with the turn of the political wheel new faces and untried hands in some of these offices.

While the county auditor, Mr. John W. Troy, will be compelled to limit his efficient force from four to two deputies, agreeable to the rigid and imperative ruling of the board, Messrs. W. Brumfield and R. A. Grimes, of the old force will be retained.

The new treasurer-elect, Mr. A. B. Dorsey, has appointed J. A. Wilson, late of the Clallam County Abstract and Title Co., as his deputy, who is a young man well qualified by experience and training for the position.

In the clerk's office Mr. A. A. Richardson has wisely selected F. S. Mackintosh as his deputy, which assures efficient public service in that office, as Mr. Mackintosh has proved a competent, attentive official.

In the sheriff's office Mr. W. J. Dyke, very sensible recognized true worth and competency by retaining W. E. Burnside as his deputy. By close attention to his official duties Mr. Burnside had earned the esteem and confidence of his superior officer.

Clallam's Resources.

Opinions of the leading men of the state, as gathered by the Seattle Post-Intelligencer, are that we are on the eve of a general business revival. These opinions are based on the belief that the tied up capital in the money centers of the country is getting loosened, and that a volume of it will be invested in the state of Washington during the year in the timber and mineral resources. The wish may be father to the thought in this matter of better times coming, but the very fact that everybody entertains hopeful views of the future will go a good ways towards creating better times.

In regard to Clallam county the principal resource is timber, and we must look to the lumber business at present for our prosperity. The indications are that the lumber business will be good this year, creating a demand for timber lands, something that Clallam county has in abundance for sale. There are also good coal prospects in this county and given a good coal supply along with its wealth of splendid timber Clallam county would be one of the most desirable localities of the state.—Clallam Record.

HORTICULTURAL SOCIETY

Organized in This City Last Saturday Afternoon.

The Clallam County Horticultural Society has been organized.

Last Saturday afternoon a number of gentlemen, who are, by the way, enthusiastic horticulturists, met in the office of Dr. Stanley for the purpose of perfecting the organization of a society, the objects of which would be the pursuit of a more thorough study of horticulture in its various branches, viz, fruit culture, gardening and floriculture.

The meeting was called to order, and a motion to proceed with a permanent organization prevailed.

[illegible] president, and A. [illegible], secretary and treasurer.

The next meeting of the society will be held in Dr. Stanley's office to-morrow (Saturday) afternoon, to which a cordial invitation is extended all persons interested in its objects, to attend and associate themselves with the society. Only those who are earnest and conscientious are welcome, as the society is organized for a purpose, the accomplishment of which demands untiring research and intelligent endeavor.

The regular meetings will be held once each month, at which interesting subjects will be discussed, and suggestions, made for the higher cultivation of the soil.

The object is praiseworthy and merits encouragement.

Van Brunt-Hoyt Contest.

Register O'Toole and Receiver Terry handed down a decision in Seattle last Saturday in the case of Charles H. Van Brunt vs. Alonzo Hoyt, involving lots 10 and 11, blk 278, Port Angeles townsite reservation. Van Brunt claimed that Hoyt never lived on the lots or improved them prior to July 15, 1893, as required by law. From the testimony given at the hearing in the Seattle land office it appeared that Hoyt took possession and resided on the lots about the middle of June, 1893, in accordance with an agreement with a man named McClelland, who had been living on the property. The register and receiver decided that the testimony of the contestant is of a negative character and not entitled to weight against the positive testimony of Hoyt's witnesses. The land commissioner is recommended to dismiss the contest.

Not Disqualified.

County Attorney James Stewart gave it as his opinion before the board of county commissioners, a few days since, that there was no legal provisions disqualifying Miss Ella Guptill from holding the office of county school superintendent, pending the decision of the Supreme court in the contest case.

In accordance therewith the commissioners have turned the documents of the office over to Miss Guptill, who has assumed the duties of the office pending the decision.

Masonic Officers.

At the last regular communication of Port Angeles Lodge No. 69, F. & A. M., the officers for 1895 were duly installed, after which ceremony the "craft" adjourned to the old council room where they enjoyed their annual banquet and hours of pleasant intercourse with each other, and with many visiting brethren.

The following were installed: Worshipful Master, Wm. Banks; Senior Warden, Samuel G. Morse; Treasurer, W. W. Gray; Secretary, Clarence H. Prescott; Senior Deacon, Willard Brumfield; Junior Deacon, Geo. H. Gale; Senior Steward, D. H. Burness, Junior Steward, Ben Johnson; Tyler, John Hitch.

KILLED BY A FALLING TREE.

Henry Richter Instantly Killed By a Falling Tree Near Mt. Misery.

While Henry Richter and his son were felling trees on the ranch of the former near Mt. Misery last Tuesday the former was unexpectedly struck by a leaning tree and instantly killed.

They were in the act of felling two trees, one of which leaned heavily against the other, and as the trees began falling, the son discovered the exceeding danger of the position, and jumped out of the way in time to escape being struck, and loudly called to his father, who, by the way, was deaf, and apparently utterly unconscious of the imminent danger of his position, consequently unheeded the warning of his son, and was struck a terrific blow on the head by the leaning tree, as it fell, and instantly killed.

Deceased was about forty-five years of age, and had lived in the county for years past, and was an industrious, hard-working man. He leaves a wife and five children to mourn his tragic and un-

Death of An Old Settler.

The intelligence has been received of the sudden death, from heart disease, last Friday, of William Smalley, an old settler of Forks.

Deceased was one of the oldest settlers of the west end of the county, and was well respected by all who knew him. At the time of his death he was about 65 years of age and unmarried.

THE HIGHEST AWARD.

Royal in Strength and Value 20 Per Cent. Above Its Nearest Competitor.

The Royal Baking Powder has the enviable record of having received the highest award for articles of its class—greatest strength, purest ingredients, most perfectly combined—wherever exhibited in competition with others. In the exhibitions of former years, at the Centennial at Paris, Vienna, and at the various State and Industrial fairs, where it has been exhibited, judges have invariably awarded the Royal Baking Powder the highest honors.

At the recent World's Fair the examination for the baking powder awards were made by the experts of the chemical division of the Agricultural Department of Washington. The official report of the tests of the baking powders which were made by this department for the specific purpose of ascertaining which was the best, and which has been made public, shows the leavening strength of the Royal to be 160 cubic inches of carbonic gas per ounce of powder. Of the cream of tartar baking powders exhibited at the fair, the next highest in strength thus tested contained but 133 cubic inches of leavening gas. The other powders gave an average of 111. The Royal, therefore, was found of 20 per cent. greater leavening strength than its nearest competitor, and 44 per cent. above the average of all the other tests. Its superiority in other respects, however, in the quality of the food it makes as to the fineness, delicacy and wholesomeness, could not be measured by figures.

It is these high qualities, known and appreciated by the women of the country for so many years, that have caused the sales of the Royal Baking Powder, as shown by statistics, to exceed the sales of all other baking powders combined.

SOME OF THE PETTY

Offices Have Been Filled By the Council.

THE RECENT HIGH WATERS

Cause Considerable Destruction in the County—A Number of the Bridges Over the Dungeness River Washed Out—The State Legislature Organized and the Senatorial Contest is Raging.

At the regular meeting of the city council last Wednesday evening Mayor Mallette and councilmen Crockett, Munro, Graybill, Stewart, Harding, Shelton and Lamoreux were present. The following resolution was introduced and adopted:

Resolved, That it is the sense of this council that when the present difficulties are arranged it would be to the best interest of the city to contract with N. R. Smith for horse power sufficient to run the electric lighting plant on the following terms and conditions namely, at the rate of ten dollars ($10) per horse power per annum.

The bonds of A. B. Dorsey, in the sum of $5,000 as ex-officio city tax collector, was read and approved.

The report of C. N. McLaughlin electric light Manager, was read and approved. It shows a loss of $16.25 to the city, during the month of December.

An ordinance providing license for billiard and pool tables, was referred to city attorney for an opinion, as to whether or not the city could legally enforce the provisions of said ordinance.

The office of police justice having been declared vacant, nominations were announced in order. The name of S. P. Carroll being the only one placed in [illegible] and receiving a unanimous [illegible]

[illegible] F. A. Gallup receiving a majority of the votes cast, was duly elected.

For city engineer A. J. Adams received a majority of the votes cast and was declared elected. The council adjourned.

Trail to Chehalis County.

The commissioners of Jefferson county have given a contract to P. H. Dorning to open about eight miles of trail from Bogachiel to the Hoh river; $35 a mile to be paid for the work. Also a contract to C. J. Andrew for nine miles on a continuation of the same trail from the Hoh river to the Chehalis county line.

When the work is done there will be a trail open from Forks prairie to the Chehalis county line, a distance of about thirty miles, and running across Jefferson county. At Forks this trail connects with the county road to East Clallam.—Clallam Record.

MID-WINTER FRESHETS.

The Recent High Waters Did Considerable Damage in the County.

The recent mid-winter freshet has done considerable damage in the county.

The heavy fall of snow melted so rapidly under the influence of the severe rain-storm of the past week, that a tremendous volume of water, forcing an outlet through the creeks, riverets and streams emptying into the straits, overflowed the banks of these streams, and swept away many valuable improvements.

Late last Saturday evening the report was brought to town that the large Elwha bridge had been washed away, but later intelligence from the scene of the freshet fortunately proved the report without foundation. The upper Elwha bridge was also reported to have been washed away, which later reports also proved to be untrue.

Serious destruction to fences, buildings and other improvements was wrought on the Thompson place.

The logging road belonging to Hartley Goodwin was washed out, causing a heavy loss to that gentleman, while one of the peculiar outbreaks of this force of nature was to completely surround the domain of A. D. Gleason, leaving him undisputed monarch of all he surveyed.

Elsewhere in the Elwha valley considerable damage was done. Fences and other improvements were washed away.

In the east end the streams were unusually high and one or more bridges across the Dungeness river is reported to have been washed out, other inconsiderable damages were wrought to fences, etc.

From the west end no report of very serious damage has been received, although the streams in that locality are said to have been very high.

The destruction wrought by high waters in the other Sound counties and along the Columbia river is said to have been far severer than in Clallam.

STATE LEGISLATURE.

Brief Summary of Its Deliberations—The Senatorial Contest.

The fifth session of the legislature of the State of Washington convened at Olympia last Monday morning. Both houses immediately proceeded with perfecting their respective organizations.

The organization was finally completed, as follows:

Senate—Lieut.-Govenor Luce, president; Senator B. C. Van Houten, of Spokane, president pro tem; T. G. Nicklin, of Whatcom, secretary; A. B. Cowles, of Thurston, assistant secretary; Joe T. Mitchell, of Pierce, sergeant-at-arms; assistant, John Inkster, jr.; Mrs. Ella B. Sparks, minute clerk; Miss Minnie Personeus, bill clerk; J. J. Wiley, journal clerk; Miss Minnie Tannatt, enrolling clerk; P. R. Helm, engrossing Carroll Henderson, postmaster; Willie Skinner, Ernest Range, pages; Jery Howers, janator; Isaac Carson, watchman.

House—Ellis H. Morrison, of King, speaker; E. C. Finch, of Chehalis, chief clerk; assistant, T. Z. Alexander, of Spokane; sergeant-at-arms, Don G. [illegible] county, was recognized with the appointment of W. S. Wing as assistant engrossing clerk, and Clallam by the appointment of J. I. Peterson, doorkeeper.

Resolutions were adopted by the senate, which provides for the investigation of the state land commission.

The Ankeny and Wilson forces have finally decided on a caucus, which will doubtless be held by next Tuesday. The outcome is somewhat problematical, although the preponderence of public opinion at the seat of war, entertain the belief that Ankeny will win.

NEWS OF THE COUNTY.

Gleanings From the Press of Western Clallam.

East Clallam Record.]

The river is running high.

Four deer were recently shot on Fir Ridge.

The mill company has a crew of men at work this week driving logs on the river.

Settlers in township 33-15, adjoining Neah Bay Indian reservation are petitioning for a survey.

Alfred Miller, who has been a settler on Big river, 16 miles from here, for over four years, accidentally discovered a few weeks ago that he had relatives living in town. These were his brother, sister and stepfather, Charles Miller, Mrs. Nichols and James Nordby. Some how the folks had lost track of Alfred a number of years ago, and knew nothing of his whereabouts until they met him in town lately. Alfred's relatives have lived here for two years.

Beaver Leader.]

A party of pleasure-seekers spent Sunday afternoon on James Island. Some interesting Indian relics were discovered, and all report a pleasant time.

For the last two weeks we have been favored with remarkably fine weather. It has been clear and dry with very little snow or cold.

W. Smith, principal of the government school, has returned to work after spending the holidays with his family at Boston. Miss Johnston, of Seattle, is filling the vacancy caused by the resignation of Mrs. Thompson, assistant teacher.

Hunting has been good the past week and several deer have been bagged by the settlers. Seven have been reported killed in this neighborhood.

The snow is reported to be from three to four feet deep on the other side of the mountain and travel on the county road is accomplished under many difficulties.

It is well for settlers having dogs to remember that there is a law in this state prohibiting the chasing of deer with dogs, and that a heavy fine may be imposed on the party using his dogs for that purpose. There is no reason why any settler cannot get all the meat he can use without violating the game laws, and anyone found hunting deer with dogs should be prosecuted. Several cases of this kind have been reported this week and the game warden should in[illegible]

Tumwater Heights.

C. E. Pryor, whose leg was broken a short time ago, by a fall from a train car, will soon be able to be about on crutches.

Maxfield & Pryor, proprietors of the Filion shingle mill, received an order for 250,000 shingles, which will be shipped to Honolulu on the schooner Jewett.

Mr. Kellogg, who has been very ill, is able to sit up.

Martin Doyle left, Sunday, for Butte, Montana, stopping over several days in Tacoma.

The Filion mill has been under several feet of water for the past week; but the shingle mill was able to run Monday night.

Mr. and Mrs. J. Lindsay entertained a party of friends Saturday evening. A very pleasant time was had.

Forensic Club.

The above-named club will meet next Saturday evening, January 19th, at the old council chamber to complete organization. All interested are invited to be present. By Order of Committee.

JOHN W. TROY.....Editor.

THE GOVERNOR AND THE PEOPLE.

In his biennual message Governor McGraw makes some sensible and timely recommendations to the state legislature, which, it is to be hoped, will not be wasted on desert air.

The governor admits flagrant extravagance in the management of state affairs, and urges law-makers to closely scrutinize all appropriation bills, so as the state will be protected against a repetition of the folly.

The improvident condition of the taxpayer and the chilling emptiness of some of the public exchequers have, no doubt, exerted a most potent and beneficial influence over the governor.

The strong suggestions of the governor and the earnest appeals of the people, will, no doubt, sufficiently impress legislators, with the absolute imperativeness of remedial legislation.

In the course of the message the governor urges changes in the assessment, revenue, state land, election, civil, criminal, municipal, bank, railroad and other laws.

His excellency speaks quite feelingly of the grave importance of stricter adherence to the fundamental principles on which must securely rest the super-structure of a nation, of which the animating purpose and the guiding spirit are "adherence to justice, obedience to law, fidelity to the principles of American liberity," and loyalty to all of these the solemn duty of a patriotic citizen.

The question now is, will the legislature heed these suggestions?

THE Dolph victory is accepted as a crushing defeat of the silver men in the Oregon legislature. The Oregonian with its ponderous editorials against silver legislation, appears, not to have labored in vain. Aside from his political convictions, which are decidedly plutocratic, Senator Dolph possesses many admirable traits of character. A profound thinker, a powerful debater and an indefatigable worker, he is well-equipped for public service. In him Oregon has had an able representative and a loyal champion in the senate. Have not the Republicans of Washington a man with the mental equipments of a Dolph? If so, why are they trifling with dimly shining lights of the fourteenth magnitude?

THE new board of county commissioners has already clearly domonstrated a genuine spirit of reform. It is sincerely to be hoped that the board will not confine its system of reform solely to the salary schedule, as there are other departments of the county government in which a rigid curtailment of expenditures could be ingratiated with little danger either of impairing the usefulness or destroying the efficiency of the same. There is one point, however, over which taxpayers can congratulate themselves. That is, in having secured most efficient public service for slight compensation.

CASIMIR PERIER, President of France, has resigned. The action of the president has met with severe censure even from his friends. The reason given for his child-like petulence, is a number of fancied and inconsequential slights received from the socialist members in the chamber of deputies. M. Brisson, the brilliant and fearless radical leader, is likely to be elected to the presidency to succeed him.

AN Eastern journal very aptly designates the members of the American house of lords as, "occupants of the plutocratic auction-room." If the signs of the times do not fail Washington will soon contribute another occupant to the plutocratic auction-room, than whom none is worthier of the title nor more deserving of the distinguishing appellation.

THE regular biennual hard-glove senatorial contest is on exhibition at Olympia, and is drawing crowded houses. They say Hon. John L. displays to an admirable advantage his well-developed bump of pugnacity.

ANKENY appears to have entrenched himself quite firmly in the good graces of the legislators during his late itineracy over the state, as his friends claim for him almost the solid Republican delegation.

THE brushing aside of petty personal differences on the part of Democratic leaders is evidence at the same time of a higher quality of statesmanship and that Democrats are getting together again.

DUNGENESS is having a revival. This, doubtless, is the foundation for a recent prophesy by a noted world-coming-to-an-end prophet, that the world-terminating period would occur in 1895.

A THOROUGH and effective revision of our currency legislation is what is demanded. Will Democrats discover this fact, and act accordingly, ere it is too late?

THE nomination of United States Senator Dolph of Oregon by the Republicans in caucus, assures his re-election.

WHOM will the senatorial toga envelop?

The report of L. H. Sawyer, supervisor road district, No. 27, was approved.

THURSDAY, JAN. 10.

Chas. Gallagher was declared elected supervisor of road district, No. 8, and N. J. Ellis of district, No. 41.

There being no electious held in road districts, Nos. 4, 9½, 10, 35, 38 and 48 the following residents were appointed: No. 4, W. Morrisey; 9½, T. Reid, 10, R. N. Wilson, 35, Edward Kelliher, 38, P. McNally; 48, Geo. Fend.

Hon. Jas. A. Haight, assistant state attorney, and Hon. A. A. Lindsley, assistant state treasurer, appeared before the board and addressed them in the matter of the settlement with the state. After which the following resolution was passed:

Be it resolved, That whereas a controversy has arisen between the State of of Washington and the County of Clallam over certain funds of the State of Washington appropriated by the county treasurer to the use of said county of Clallam and certain other funds of said State deposited with the First National Bank of Port Angeles, by said county treasurer, and on deposit with said bank when it suspended, and a receiver thereof was appointed and placed in charge, and whereas said State of Washington and said County of Clallam have agreed to compromise said controversy and difficulties and prevent litigation between said parties arising out of said controversy and differences in accordance with this resolution. Now therefore it is ordered that the amount of all the delinquency of said county treasurer to the State of Washington on account of any collections made by said county treasurer for said state or any of the funds thereof or on account of any moneys of or belonging to said state or any of the funds thereof that have come into the hands of said county treasurer and have not been paid over to the state treasurer be refunded by said County of Clallam to said State of Washington out of the monies in the general fund of said county, and to cover into said general fund as rapidly as the same shall be collected and that the monies now in said general fund and all the monies collected on account of said general fund and covering into said fund shall be transfered and paid over to said State of Washington in payment of said delinquency, till the same shall be fully paid and discharged, and the connty treasurer shall carry out and execute this order, and to secure the enforcement of this order and compromise and the payment herein ordered, it is further ordered that the following securities be deposited with the State treasurer, in trust, namely, all the securities accepted by said connty of Clallam in satisfaction of all claims for funds deposited in said First National Bank, except the assignment of the interest on $30,229.70 of warrants of the City of Port Angeles, reference being hereby made to the records of the proceedings of the board at volnme 4 of the commissioner's journal, pages 82, 83 and 84, for more specific description thereof, it being expressly stipulated that the state of Washington in no way ratifies the acceptance of said securities or any portion thereof by said county of Clallam in satisfaction of any claim on acconnt of any funds or claims of the state, and in case this order and resolution is not fully complied with no right of action of said State is waived or extinguished, but the same remains in full force till the payments hereinbefore provided for are paid.

The board then adjourned until the following day.

BECAUSE inferior and cheaper made baking preparations are sold at wholesale at a price so much lower than ROYAL, some grocers are urging consumers to buy them in place of the ROYAL *at the same retail price.*

If you desire to try any of the pretended substitutes for ROYAL BAKING POWDER bear in mind that they are all made from cheaper and inferior ingredients, and are not so great in leavening strength nor of equal money value. Pay the price of the ROYAL BAKING POWDER for the ROYAL only.

It is still more important, however, that ROYAL BAKING POWDER is purer and more wholesome and makes better, finer, and more healthful food than any other baking powder or preparation.

The first meeting of the new board of county commissioners was held last Monday.

The diamond drill is going through a rock formation. It has reached a depth of over 700 feet.

A social dance will be given in the opera house this evening by the John Brown orchestra.

Sarsaparilla is now only 35 cents per bottle. For sale by J. C. Hansen, druggist.

Mr. Harry E. Lutz returned from a business trip to Seattle and Portland, Tuesday.

Quite a large number of citizens visited and inspected the Monterey and Mohican, during the week.

The Norden society will give a midwinter ball at its hall on Saturday (tomorrow) evening, Jan. 19th inst.

The Geo. T. Ulmer Dramatic Company will re-produce "Dora," in the opera house next Saturday (tomorrow) night, in honor of the Monterey.

An era of retrenchment on a puritanically practical basis has been inaugurated by the county commissioners. A salary schedule has been adopted which reduces the salaries of the deputies in all of the offices to $60 per month. If the commissioners as rigidly enforce, in the various departments of the county, this pronounced system of economy, the affairs of the county will doubtless soon be in good condition.

A beautiful painting of roses which has been handsomely framed and is on exhibition in the show window of Meagher's dry goods store, will be raffled by the owner as soon as 100 chances will have been sold. Tickets on sale at the store.

County Surveyor FitzHenry has made many important changes in the boundaries of the road districts of the county, the wisdom of which the commissioners recognized in the acceptance of the surveyor's report.

The annual meeting of the Democratic Club of Port Angeles, will be held in the council chamber, in this city, on Saturday evening, February 5th, for the purpose of electing officers for the ensuing year.

The Ladies Aid Society of the First Congregational church will give a social in the church on Friday evening, February 1st. A miscellaneous program will be produced and refreshments served. A fee of ten cents will be charged.

Messrs. S. J. Lutz & Co. will open their new boot and shoe establishment to the general public, within a few days. The stock will be one of the largest and best ever displayed in Port Angeles.

The war ship Mohican arrived from San Francisco last Tuesday evening. She laid at anchor in the harbor until Thursday morning, at which time she sailed up sound for coal.

Mr. Merrill Whittier of Quillayute, commissioner-elect from the 3d district, arrived, Saturday, to attend the first meeting of the new board.

The new county county officials assumed their duties last Monday.

Mr. C. S. Stakemiller returnad from Tacoma yesterday.

Harry Greenberg returned from a visit to Whatcom last Friday and doubtless had an enjoyable time while there, as the following paragraph from the Whatcom Blade, would suggest:

"Miss Cecile Lobe gave a reception at her home on Holly street last evening in honor of Harry Greenberg, who is here on a visit from Port Angeles. Dancing was the principal feature of the evening, though music, games and refreshments afforded much amusement as well as substantial pleasure.

DUNGENESS ITEMS.

Very successful revival meetings terminated in the Methodist church on Sunday evening. The general public manifested more than ordinary interest and the Rev. Mr. Ford, of Seattle, who assisted the pastor, made many friends among those who listened to him, by his earnestness and forcible manner. He will be doubly welcome should he visit Dungeness again.

The flood in the Dungeness river on Friday last was, without a doubt, the greatest ever known in the history of this country. The oldest settler and the oldest Indian in the community has never seen the river so high. The Olympic range has had very heavy falls of snow along the head waters of the river, and the warm rains and winds of Friday night converted, in a few hours, the snow into streams and floods, which, as they swept the length of the river, did untold damage. So suddenly did the waters rise, there was no warning whatever. The current followed the old river beds which it has not followed for thirty and forty years. Very many bridges were carried away entire or moved out of place, and the roads will for some time be impassible on account of washouts.

Mr. Geo. Lamb, ex-county commissioner, came up from Angeles on Monday morning, to spend a week with friends before going back to his ranch at East Clallam. Not only are his gentlemen friends pleased to see him, but Rumor says that some of our bright and talented Dungeness ladies are delighted to entertain Mr. Lamb.

Mr. Joseph Cassalery met with a painful accident one day last week which will keep him at home for some time. In baling hay on the Rogers place, he accidentially stepped from a bale of hay to the ground onto a rail, and at the same time wrenching the ankle of his left foot.

Mr. E. Pettitt, who leases the Hall Davis farm from the heirs, added a new De Laval Cream Separator this week. This is the third separator brought to this side of the Sound, the first one being introduced and purchased by Mr. Seal for the Bishop ranch near Townsend, in the spring of 1894. The cream separator is a wonderful labor saver and other dairymen will not be slow to introduce this remarkable machine.

The Dungeness Trading Co. is conducting an immense clearance sale. To cash purchasers special advantages are offered, and dry goods, groceries, boots and shoes, provisions, especially flour, are being offered at very low prices.

Wm. McKinney has leased the Davis Hotel, and has opened a first-class boarding house. Visitors to this place would do well to give him a call.

H. J. Lipsett went to Victoria on the Evangel Tuesday morning.

Mrs. J. B. Dick was a passenger on the Monticello Tuesday, bound for Seattle.

Fire broke out in Ah Tom's laundry Monday morning. Fortunately the flames were discovered before much damage was done.

A disgraceful scene was enacted in Towns & Garrison's saloon Sunday evening, when Richard Martin and Alex Henderson, both under the influence of liquor, became enraged and fell to fighting. Henderson suffered a severe cut on the head while Martin escaped with a few dislocated fingers.

C. F. Seal has been appointed school director in Robert Davis' place.

Mrs. W. B. Meek, who resides at Camptonville, Cal., says her daughter was for several years troubled at times with severe cramps in the stomach, and would be in such agony that it was necessary to call a physician. Having read about Chamberlain's Colic, Cholera and Diarrhoea Remedy she concluded to try it. She found that it always gave prompt relief. It was seldom necessary to give the second dose. It has not only saved us worry and time," she says, "but also doctor bills. It is my opinion that every family should have a bottle of this remedy in the house." For sale by J. C. Hansen, druggist.

A Cheap Power.

And at the same time a reliable power are the points to be sought for in purchasing an engine. With steam power a constant watch on the engine is necessary to prevent accidents, and the expense for engineer is a serious item against economy. The gas or gasoline engine is by far the cheapest power, as it will run all day without attention or fear of accident, and the cost is about two cents per hour for fuel per horsepower. For intermittent power the economy of gas over steam is beyond comparison. While these points of superiority are without question, it is important in selecting an engine to get the best; the best in the long run is the cheapest. Do not fail to investigate the striking advantages of the Hercules Gas and Gasoline Engines. Send for catalogue. If you want second-hand engines of other makes at cheap rates we can supply you. We have a number taken in trade, and cannot take any more until they are realized on. PALMER & REY TYPE FOUNDRY, Front and Alder streets, Portland, Oregon.

TAX NOTICE.

Notice is hereby given that the tax rolls for the year 1894, are now in my possession, that all County and City taxes are now due and payable at the Treasurer's office in Port Angeles, Clallam County, Wash. If taxes are paid before February 15th, 1895, a rebate of 2 per cent. is allowed; from February 15th to April 1st, full amount must be paid, and on April 1st, all unpaid taxes become delinquent, and a penalty of 5 per cent. is added and interest on that amount until paid, at the rate of 20 per cent. per annum. Statement of taxes will be furnished by Treasurer upon application.

Persons desiring a statement or to pay taxes must describe their property. No warrants will be accepted on taxes.

Only the Scars Remain.

"Among the many testimonials which I see in regard to certain medicines performing cures, cleansing the blood, etc.," writes HENRY HUDSON, of the James Smith Woolen Machinery Co., Philadelphia, Pa., "none impress me more than my own case. Twenty years ago, at the age of 16 years, I had swellings come on my legs, which broke and became running sores. Many physicians could do me no good, and it was feared that the bones would be affected. At last, my good old mother urged me to try Ayer's Sarsaparilla. I took three bottles, the sores healed, and I have not been troubled since. Only the scars remain, and the memory of the past, to remind me of the good Ayer's Sarsaparilla has done me. I now weigh two hundred and twenty pounds, and am in the best of health. I have been on the road for the past twelve years, have noticed Ayer's Sarsaparilla advertised in all parts of the United States, and always take pleasure in telling what good it did for me."

A regular doctor no longer she lacks,
So I've sent to attend her a couple of quacks."

Money Spent Economically.

Money economically spent is not always judiciously spent. Why? Simply because a cheap article often requires more money spent on it to keep it in repair than it would cost to purchase the best. We manufacture nothing but the best gas and gasoline engines in the market, and results prove it. Send for catalogue. PALMER & REY TYPE FOUNDRY Front and Alder streets, Portland, Ore.

WOOD PULP SILK.

Chardonnet's Discovery Perfected and a Mill Started In France.

An experiment is being made at Besançon, in France, with a substitute for silk which will be watched with interest. The invention, that of Count de Chardonnet, is to convert wood pulp into a silken thread, durable, luminous, elastic. The "silk" threads prepared from the wood pulp were first shown at the last Paris exhibition, where they enjoyed a good deal of attention from those interested in the silk industry. The process was at that time far from complete, and many improvements had to be made before the invention could be regarded as a commercial success.

That point, in the opinion of Count Chardonnet, has now been reached, and a mill has been built for the manufacture of goods from the new material. There are still some details in the process which must be improved before capitalists are likely to embark in the venture. One of the great difficulties, it appears, that has to be overcome is the snapping of the threads while they are being spun, owing to the unequal pressure which is exercised in forcing the wood pulp through an exceedingly small aperture, so as to convert it into thread. This is a defect, however, which the inventor is confident he will soon overcome. After the wood has been reduced to the consistency of pulp it is dried in an oven and then plunged into a mixture of sulphuric and nitric acids, washed in several baths of water and dried by alcohol. The product is afterward dissolved in ether and pure alcohol, and the result is collodion similar to that used in photography.

This collodion, which is a sticky, viscous substance, is inclosed in a solid receptacle furnished with a filter at the lower end. An air pump sends compressed air into the receptacle, and by this pressure the collodion is forced through horizontally in the form of fine threads. As the thread is forced out it passes through a vessel filled with ether and alcohol, which solidifies the collodion and makes it elastic and as brilliant as silk. If the invention turns out as successfully as its inventor anticipates, it will be the beginning of a very important industry.—Edinburgh Scotsman.

Novel Railroad Ticket.

The railway marks invented by the Hungarian minister Lukais will shortly be adopted on all Hungarian railways. For the future no traveler on Hungarian railways will be troubled to stand waiting at the ticket office for his ticket. He will be in a position to make out his ticket for himself. On a blank card he will write the name of the station from which he takes his departure and that of the station he means to go to, and he will stick on the remaining empty space on the card as many "railway marks" as his journey will cost. The blank cards will be obtainable at all tobacco shops.

A NEW GAS DISCOVERY.

A Kansas Reporter Visits Doniphan Lake and Backs Up a Good Story.

The confidence of The Globe in the veracity of Clark Drummond, Tip Young and L. H. Chamberlain having been badly shaken by their statement that you could punch a hole in the ice at Doniphan lake and light the natural gas which escaped through it, a reporter visited the lake last week for the purpose of an investigation and was convinced of the truthfulness of their statement.

Upon arriving there a bonfire was found, which Frank Brenner had started by piling some brush over a white spot in the ice, puncturing the ice and touching a match to the fume. The entire lake was covered with spots, and they were opened, and the gas burned out of them until it became work instead of play. The illumination was kept up until after dark, when the effect was better. It takes about a minute to burn the gas out of a spot as big around as a washtub. The smaller the hole in the ice, the longer it takes the gas to escape. The flame shoots up fully a foot and looks exactly like gas coming out of a pipe with the burner removed. The gas has no smell—at least the investigating committee detected none.

It is claimed that it is a vegetable gas that is always found in newly formed lakes and is caused by the decomposition of vegetable matter. It escapes without attracting attention as a usual thing, but is imprisoned when the water freezes. The gas at Doniphan lake was discovered by a boy who fell and broke the ice. He had a box of parlor matches in one of his pockets. They became ignited and lit the gas. The boy's trousers were considerably disfigured.—Atchison Globe.

A NEW MESSIAH.

He Stirs Up Things In the State of Washington and Is Jailed.

News has reached here that Loon Lake, 60 miles from Spokane, on the Spokane and Northern railway, is in a fever of excitement. Six weeks ago William Lewis and wife came to the Lake and instituted a series of revival meetings. Lewis proved to be a fluent speaker and captured his audience. He was energetic and enthusiastic and inspired in his hearers a wonderful degree of confidence.

When he had his audience thoroughly aroused, among other things he stated one evening that he possessed supernatural power. He claimed to be a specially ordained apostle of God and had come into the community to work miracles and save souls. The meetings were conducted in the schoolhouse, and while he succeeded in securing many followers an element in the community, believing him an impostor, succeeded in getting the permission granted him of preaching in the schoolhouse revoked.

He was loud in denunciation of his persecutors and finally disturbed a religious meeting, which resulted in his arrest, trial and conviction. Being unable to pay the fine, he was committed to jail at Colville. He now lies ill at Loon Lake, and the authorities are unable to remove him.

He declared that he was empowered by God to heal the sick, cast out devils and raise the dead. He secured 15 or 20 converts, who went through a singular ge... his soul cleansing ... quired to die a spi... on their backs on t... es and passing in...

Corruption in the Woolwich Arsenal Circles Unearthed and Officers Under Arrest.

It is ... criminal article of an Eng... that his army, if small, ... ry best quality, and that its ... tors, from the commander in c... wn to the humblest subaltern, ... were incorruptible. The latter ... received a rude shock recently when the Woolwich arsenal was proved to be a hotbed of corruption, and a clean sweep had to be made of some of its leading officers. The faith which survived ... has now again been sorely tried. ... rs Loch and Murray, in charge of the war department armory at the tower, Birmingham, have been placed under arrest and will be tried by court martial next week.

The charges are systematic blackmailing extending over a number of years and frauds of the shabbiest and most unmilitary character. The tower is virtually a training school for regimental armorers, and no noncommissioned officer could hope to obtain the rank of armorer without a certificate of competency signed by Loch and Murray. It is alleged that these trusted officers extorted money as the price of every certificate and also had a secret system whereby every workman applying for work and every soldier desiring promotion had to pay sums ranging from shillings to pounds.

The incriminated officers have long been living far beyond their visible means, but the malpractices were not suspected until a few months ago, when the war department in London began to receive anonymous letters purporting to be written by fleeced victims. The secretary of war was unwilling to take cognizance of anonymous accusations against the honor of reputable officers, but the charges became so persistent and categorical that he decided to investigate them, and Colonel King Harman was sent to Birmingham. With the assistance of the local police he soon obtained sufficient evidence to justify the arrests. The curious feature of the case is that Colonel Nuttall, commander in chief of the tower, was not arrested also for shameful neglect of his duties.—London Cor. New York Sun.

The Train Ran Five Miles Without Steam.

A marvelous race, up grade and down, in which momentum was the motive power, took place on the Consolidated road Saturday. Five miles below Stamford the cylinder head of the big engine, No. 247, blew out while the train was making express time. Instead of stopping and getting stalled, Engineer Scofield let the machine have its head and pulled into Stamford station on time, and not even the conductor knew that anything was the matter until the engineer called for another engine and No. 144 was put on and pulled the train to this city. The five miles were run without a pound of steam and solely on the momentum the train was under when the mishap took place.

High Praise For the Landlord.

Two well dressed strangers came to the Virginia hotel four days ago and registered from Louisville. They left yesterday, leaving their bill of $17 unpaid, and the following note:

"Man's inability to successfully portray his thoughts, his mental powers being incapable to correctly define his meaning, is why I will not endeavor to burden you with an attempt at expressing my thanks for your treatment so gentlemanly, etc., during my stay. Extend to your menials also my thanks. May your shadow never grow less, and may continued prosperity shine in unclouded warm rays on your benevolent head."—Staunton (Va.) Dispatch.

Hot In Australia.

The weather in Australia during the antipodean summer has been unusually hot and oppressive. In Adelaide during January the thermometer several times registered over 100 degrees in the shade, and one day it climbed to 107 in the shade and 163 in the sun. In Melbourne the 100 notch has been reached more than once, and the scorching north winds have made the atmosphere exceedingly oppressive. The foregoing figures are from weather observatory readings, and probably do not represent by several degrees the temperature of the city streets.—Melbourne Letter.

Washington Logs to Go to France.

A schooner laden with the huge logs and tree trunks of which the Washington state building at the World's fair was constructed will sail out of the harbor of Chicago some time during May. Its destination will be either Havre or Cherbourg, France. The Washington state building was one of the most interesting at the fair. Many of the timbers in the building are 3 feet square and 140 feet long. It is the intention of those who purchased the building to set it up in France exactly as it stood upon the World's fair grounds.—Chicago Herald

Illuminated Lifebuoy.

Some trials have just been made at Kiel on board of the German war vessel Worth with an electrically lighted lifebuoy, the invention of Captain Melter. The buoy was thrown overboard when the vessel was proceeding at a speed of about 16 knots. For a space of about 12 seconds it was lost in the eddy currents caused by the twin screws of the vessel, but then reappeared. The new lifebuoy will be found useful at night, and the experiments resulted so successfully that it is probable that it will be adopted generally in the German navy.—Iron and Industries.

Hard on the Doctors.

The smallpox scare is about over and the harvest for physicians, at $1 per point, about ended for the year. If we had a law to compel physicians to vaccinate all the members of the families in which they practice, free of charge, the days of smallpox scares would be forever ended.—Iowa State Register.

PATENTS

FOR INVENTIONS.

Equal with the interest of those having claims against the government is that of INVENTORS, who often lose the benefit of valuable inventions because of the incompetency or inattention of the attorneys employed to obtain their patents. Too much care cannot be exercised in employing competent and reliable solicitors to procure patents, for the value of a patent depends greatly, if not entirely, upon the care and skill of the attorney.

With the view of protecting inventors from worthless or careless attorneys, and of seeing that inventions are well protected by valid patents, we have retained counsel expert in patent practice, and therefore are prepared to

Obtain Patents in the United States and all Foreign Countries, Conduct Interferences, Make Special Examinations, Prosecute Rejected Cases, Register Trade-Marks and Copyrights, Render Opinions as to Scope and Validity of Patents, Prosecute and Defend Infringement Suits, Etc., Etc.

If you have an invention on hand send a sketch or photograph thereof, together with a brief description of the important features, and you will be at once advised as to the best course to pursue. Models are seldom necessary. If others are infringing on your rights, or if you are charged with infringement by others, submit the matter to us for a reliable OPINION before acting on the matter.
