LEWIS LEVY

PORT ANGELES AND COUNTY

The Timber Industry Alone Will Make Clallam a Great County.

In considering the natural resources of Clallam county, as well as those of any other section of this Puget Sound country, timber must always be given first place—it is the paramount resource of future wealth for its citizens.

The official government estimate gives this county 25,743,000,000 feet, board measure, of standing timber, besides which there are millions of feet of down cedar, as sound at the day it fell, even though it may have been lying on the ground for two hundred years, which is being cut into the finest shingles on the market. This timber covers an area of 1,370 square miles, and 113 square miles, in addition to the above, have been logged off. Clallam county contains one-seventh the total timber of the state, and is second only to Chehalis county, by about two billion feet.

The immensity of our forests is such that mere figures fail to convey an adequate idea of their size and value. Were the timber of Clallam county cut into inch boards they would lay a walk 200 feet wide around the earth at the equator, or the same boards would make a driveway to the moon thirteen feet in width. Its value in rough lumber at present prices would be about $250,000,000. The timber of this county alone would supply the mills of Washington, which are furnishing employment to 40,000 people with a pay roll of about $40,000,000, for nearly eight years.

J. J. Hill, of the Great Northern, says that one acre of Washington timber is worth more in dollars and cents and will furnish greater tonnage to a railroad than an acre of wheat yielding twenty-five bushels per acre for one hundred years. The timber of Clallam county will be worth more to a railroad than the entire wheat fields of the Northwest will furnish in one hundred years. It has only been in the past four years that Washington lumber has found a ready sale in eastern markets. Reduced freight rates and growing scarcity of eastern lumber have bro't about a change that will soon commence a great railroad development on the Olympic peninsula, where even now the export mills cut three-fifths of the lumber produced on Puget Sound.

And how are our people to be benefitted by this enormous timbered area? Aside from the sale of lands or of stumpage, this resource will provide several thousand men with employment for many years to come. Not only will they earn and spend the highest wages paid in any industry, but they will furnish a market for a large share of the products of the ranch at top-notch prices. The daily wages of mill and logging men run from $2.00 for laborers to $4.00 and $5.00 for sawyers and filers, with on average for all classes of better than $2.75.

At present, owing to lack of railroad facilities, the industry is limited to a few logging camps and shingle mills, the only lumber cut being for home consumption. In Whatcom county, for example, the saw mills alone employ 1,400 men who receive three-fourths of a million dollars yearly in wages. In the shingle mills over 2,000 men are employed, and, allowing for shutdowns, their annual pay roll is over one and a half millions. Nor do these figures include the loggers, shingle bolt cutters, and other attendant pursuits. Upwards of two and a half million dollars paid out in one county in one year in the lumber industry alone. Yet Whatcom has but one-twelfth the timber possessed by Clallam.

TO CUT STONE FOR ARCADE

Quarry's Present Contracts Require More Stone Than Federal Building.

W. D. Kimball, architect, and T. R. Barnes, contractor, for the Green Building, corner Tenth and Pike, Seattle, were in Angeles last week looking over the quarry and plant. Tenino stone had been specified for the building, which is to be a seven story Arcade, costing $100,000. The gentlemen came here with considerable misgivings, having, in fact, somehow acquired the impression that stone could not be gotten out in large enough blocks for their use, hence the 245 ton sample on hand at the quarry was considerable of a surprise to them. They were highly pleased with the character of the stone and were emphatic in expressing the opinion that it is far and away the best of any in the West. Contractor Barnes said he never saw better stone in his life, nor a mill better equipped to handle it. They say Angeles stone will be used in the sky scraper, work on which will commence early next spring.

The Transport took up a car of stone Saturday, the last shipment on a former order. None of the Yakima court house stone has been shipped yet, though three or four cars are ready.

Every ounce of food you eat that fails to digest does a pound of harm. It turns the entire meal into poison. This not only deprives the blood of the necessary tissue-building material, but it poisons it. Kodol Dyspepsia Cure is a perfect digestant. It digests the food regardless of the condition of the stomach. It allows that organ to rest and get strong again. Relieves Belching, Heart Burn, Sour Stomach, Indigestion, Palpitation of the Heart, etc. Sold by C. E. Nailor & Co.

PURE WATER IS ASSURED

Extensive Modern Plant to Bring Water from Back of Mount Angeles.

H. C. Heermans of Hoquiam arrived in the city Wednesday to look into the proposition made him by Dr. F. S. Lewis for the construction of a new water system and power plant for Port Angeles. Everything proving satisfactory to him he has accepted Dr. Lewis' terms, which includes the water rights on Little River and some five hundred contracts with our citizens for water service, and at the next session of the city council he will ask for a franchise enabling him to go ahead with the work. A preliminary meeting will be held with the members of the council to arrange details.

Dr. Lewis has been quietly and persistently working this matter up for a number of months and the appearance of Mr. Heermans here was an acknowledgment that the scheme was not only entirely feasible but a splendid investment.

Mr. Heermans is a practical engineer, and a capitalist as well, in fact, is abundantly able to put in the plant himself. But interested with him in his various investments is a coterie of New York gentlemen who own plants at Corning, N. Y., at Hoquiam and at Olympia, and who have built and sold plants in other cities. Not only that, but they have invested in other lines, such as lumber mills, helping to build up those towns in which they have established water plants, at the same time making their plants more valuable.

The main line will be brought down to a mile or so back of town and then be divided in high and low pressure mains, with cross mains gridironing the town. A power plant, for commercial use and city lighting, will be a feature of the enterprise. Such a plant would furnish an abundance of pure water from an Olympic mountain stream, water which could never be contaminated, and in quantity sufficient for all uses of a large city. It is understood Mr. Heermans will get to work at once, upon receiving franchises, and that the pipe will also be manufactured here.

Distressing Accident

Mr. Fraser, of Forks, met with a distressing accident Tuesday. When on his way from town to his ranch he fell from a log crossing Coal Creek, sustaining the fracture of both bones to one of his limbs. Ray Maxfield, who was with him, ran for assistance and Mr. Fraser was carried to Forks on a stretcher and brought here yesterday morning for treatment at the hospital. He was without medical treatment for forty-eight hours. J. J. Sutherland and J. R. Smith, who came up as witnesses on a road case before Judge Hatch's court, accompanied Mr. Fraser to Angeles.

PORT ANGELES AND COUNTY

The Timber Industry Alone Will Make Clallam a Great County.

In considering the natural resources of Clallam county, as well as those of any other section of this Puget Sound country, timber must always be given first place—it is the permanent foundation of future wealth for its citizens.

The official government estimate gives this county 16,748,000,000 feet, board measure, of standing timber, beside which there are millions of feet of down timber, as sound at the day it fell, even though it may have been lying on the ground for two hundred years, which is being cut into the finest shingles on the market. This timber covers an area of 1,576 square miles, and 112 square miles, in addition to the above, have been logged off. Clallam county possesses one-seventh the total timber of the state, and is second only to Cowlitz county, by about two billion feet.

The immensity of our forests is such that mere figures fail to convey an adequate idea of their size and value. Were the timber of Clallam county cut into inch boards they would lay a walk 400 feet wide around the earth at the equator, or the same boards would make a driveway to the moon fifteen feet in width. Its value in rough lumber at present prices would be about $240,000,000. The timber of this county alone would supply the mills of Washington, which are furnishing employment to 40,000 people with a pay roll of about $40,000,000, for nearly eight years.

J. J. Hill, of the Great Northern, says that one acre of Washington timber is worth more to dollars and cents and will furnish greater transports to a railroad than an acre of wheat yielding twenty-five bushels per acre for one hundred years. The timber of Clallam county will be worth more to a railroad than the entire wheat fields of the Northwest will furnish in one hundred years. Hitherto only been in the past four years that Washington timber has found a ready sale in eastern markets. Railroad freight rates and growing scarcity of eastern lumber have brought about a change that will soon commence a great railroad development in the Olympic peninsula, where even now there are over miles and thousands of the lumber produced on Puget Sound.

And how are our people to be benefited, by this enormous timber drain? Aside from the sale of logs or of stumpage, this resource will provide several thousand men with employment for many years to come. Not only will they earn and spend the highest wages paid in any industry, but they will furnish a market for a large share of the products of the ranch at top-notch prices. The daily wages of mill and logging men run from $2.00 for laborers to $4.00 and $5.00 for sawyers and filers, with an average for all classes of better than $3.75.

At present, owing to lack of railroad facilities, the industry is limited to a few logging camps and single mills, the only lumber cut being for home consumption. In Whatcom county, for example, the saw mills alone employ 1,400 men who receive three-fourths of a million dollars yearly in wages. In the shingle mills over 2,000 men are employed, and, allowing for dependents, their annual pay roll is over one and a half millions. Nor do these figures include the logging, shingle bolt cutters, and other attendant pursuits. Upwards of two and a half million dollars paid out in cash yearly in one year to the lumber industry alone. Yet Whatcom has but one-twelfth the timber possessed by Clallam.

TO CUT STONE FOR ARCADE

Quarry's Present Contracts Require More Stone Than Federal Building.

W. D. Kimball, architect, and T. R. Bennett, contractor, the first Green Building, corner Fourth and Pine, Seattle, were in Angeles last week looking over the quality and plant. Timber stone had been specified for the building, which is to be a seven story Arcade, costing $100,000. The gentlemen came here with intermittent misgivings, having in first, somehow acquired the impression that stone could not be gotten out in large enough blocks for their use, hence the joint tour to look on hand at the quarry was considerable of a surprise to them. They were highly pleased with the character of the stone and were emphatic in expressing the opinion that it is far and away the best of any in the West. Contractor Bennett will be never now better stone in his life, for a mill better equipped to handle it. They say Angeles stone will be used in the city aqueduct, work on which will commence early next spring.

The Transport took up a car of stone Saturday, the last shipment on a former order. None of the Yakima court house stone has been shipped yet, though there are forty carloads ready.

Every ounce of food you eat that fails to digest does a pay out of money. It costs the entire cost, top price. This not only denotes the loss of the necessary nourishing material, but it poisons the blood. Kodol Dyspepsia Cure is a salient digestant. It digests the food regardless of the condition of the stomach. It cures dyspepsia, indigestion, biliousness, sick headache, etc. Sold by E. E. Miller & Co.

Change of Notice.

At the request of many of the town and country people, we have changed the hours of dancing at the pine hall on November 11th, dancing will begin at 8 p. m., and prize waltzing at 11 p. m. Lewis Levy.

PURE WATER IS ASSURED

Extensive Modern Plant to Bring Water from Slack of Mount Angeles.

H. O. Hagmann of Hagmann arrived in the city Wednesday to look into the proposition made him by Dr. F. S. Lewis for the construction of a new water system and power plant for Port Angeles. Everything having satisfactory to him he has accepted Dr. Lewis' terms, which include the water rights on Little River and some five hundred concrete with our offices for water service, and at the next session of the city council he will ask for a franchise enabling him to go ahead with his work. A preliminary meeting will be held with the members of the council to arrange details.

Dr. Lewis has been quietly and persistently working this matter up for a number of months and the appearance of Mr. Hagmann here was an acknowledgment that the gentlemen are not only actively doing but a splendid investment.

Mr. Hagmann is a practical engineer, and a capitalist as well, in fact, is absolutely able to put in the plant himself. For business with him in his written business, he is a member of New York syndicate who own plants at Canton, N. Y., at Hoquiam and at Olympia, and who have built and will plants in other cities. Not only that, but they first invested in other lines, such as logging, helping to build up those towns in which they have established water plants, at the same time making their plants self sustaining.

The ship line will be brought down to a little or no basis of expense and then by dropping in high and low pressure lines, with, some extra piping leading the town, a power plant, for commercial use and city lighting, will be a feature of the enterprise. Such a plant would furnish an abundance of pure water from an Olympic source this season, water which could never be contaminated, and in quantity sufficient for all uses of a large city. It is anticipated that Hagmann will get to work at once, upon receiving franchise, and that the ships will also be manufactured here.

Dismounting Accident.

Mr. Fraser, of Forks, met with a disturbing accident Tuesday. When on his way down town to his ranch he fell from a log crossing Coal Creek, sustaining the fracture of both bones in one of his legs. Ray Mankins, who was with him, ran for assistance and Mr. Fraser was carried to Forks on a stretcher and brought here yesterday morning for treatment at the hospital. He was without medical treatment for forty-eight hours. J. J. Bribey and J. H. Brink, who came up on wheels on a road case before Judge Brink's court, accompanied Mr. Fraser to Angeles.

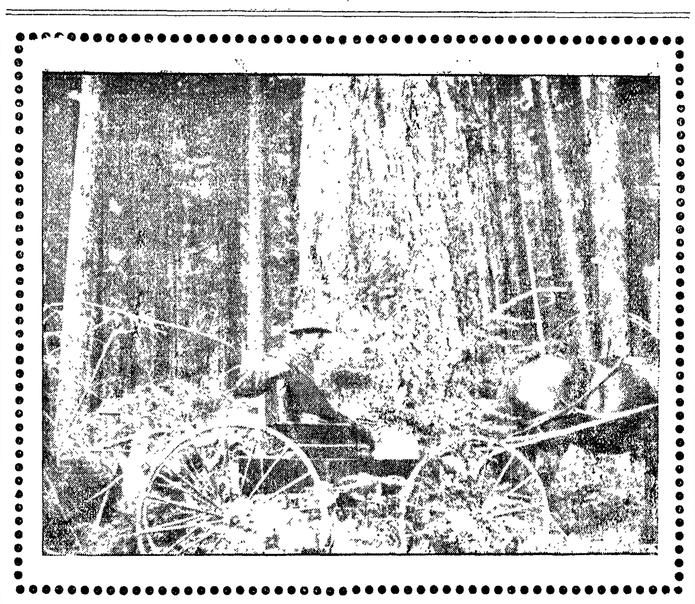
Aside from the sale of lands or of stumpage, this resource will provide several thousand men with employment for many years to come. Not only will they earn and spend the highest wages paid in any industry, but they will furnish a market for a large share of the products of the ranch at top-notch prices. The daily wages of mill and logging men run from $2.00 for laborers to $4.00 and $5.00 for sawyers and filers, with on average for all classes of better than $2.75.

At present, owing to lack of railroad facilities, the industry is limited to a few logging camps and shingle mills, the only lumber cut being for home consumption. In Whatcom county, for example, the saw mills alone employ 1,400 men who receive three-fourths of a million dollars yearly in wages. In the shingle mills over 2,000 men are employed, and, allowing for shutdowns, their annual pay roll is over one and a half millions. Nor do these figures include the loggers, shingle bolt cutters, and other attendant pursuits. Upwards of two and a half million dollars paid out in one county in one year in the lumber industry alone. Yet Whatcom has but one-twelfth the timber possessed by Clallam.



BIG TIMBER ON INDIAN VALLEY ROAD TO LAKE CRESCENT

TO CUT STONE FOR ARCADE

Quarry's Present Contracts Require More Stone Than Federal Building.

W. D. Kimball, architect, and T. R. Barnes, contractor, for the Green Building, corner Tenth and Pike, Seattle, were in Angeles last week looking over the quarry and plant. Tenino stone had been specified for the building, which is to be a seven story Arcade, costing $100,000. The gentlemen came here with considerable misgivings, having, in fact, somehow acquired the impression that stone could not be gotten out in large enough blocks for their use, hence the 245 ton sample on hand at the quarry was considerable of a surprise to them. They were highly pleased with the character of the stone and were emphatic in expressing the opinion that it is far and away the best of any in the West. Contractor Barnes said he never saw better stone in his life, nor a mill better equipped to handle it. They say Angeles stone will be used in the sky scraper, work on which will commence early next spring.

The Transport took up a car of stone Saturday, the last shipment on a former order. None of the Yakima court house stone has been shipped yet, though three or four cars are ready.

Every ounce of food you eat that fails to digest does a pound of harm. It turns the entire meal into poison. This not only deprives the blood of the necessary tissue-building material, but it poisons it. Kodol Dyspepsia Cure is a perfect digestant. It digests the food regardless of the condition of the stomach. It allows that organ to rest and get strong again. Relieves Belching, Heart Burn, Sour Stomach, Indigestion, Palpitation of the Heart, etc. Sold by C. E. Nailor & Co.

PURE WATER IS ASSURED

Extensive Modern Plant to Bring Water from Back of Mount Angeles.

H. C. Heermans of Hoquiam arrived in the city Wednesday to look into the proposition made him by Dr. F. S. Lewis for the construction of a new water system and power plant for Port Angeles. Everything proving satisfactory to him he has accepted Dr. Lewis' terms, which includes the water rights on Little River and some five hundred contracts with our citizens for water service, and at the next session of the city council he will ask for a franchise enabling him to go ahead with the work. A preliminary meeting will be held with the members of the council to arrange details.

Dr. Lewis has been quietly and persistently working this matter up for a number of months and the appearance of Mr. Heermans here was an acknowledgment that the scheme was not only entirely feasible but a splendid investment.

Mr. Heermans is a practical engineer, and a capitalist as well, in fact, is abundantly able to put in the plant himself. But interested with him in his various investments is a coterie of New York gentlemen who own plants at Corning, N. Y., at Hoquiam and at Olympia, and who have built and sold plants in other cities. Not only that, but they have invested in other lines, such as lumber mills, helping to build up those towns in which they have established water plants, at the same time making their plants more valuable.

The main line will be brought down to a mile or so back of town and then be divided in high and low pressure mains, with cross mains gridironing the town. A power plant, for commercial use and city lighting, will be a feature of the enterprise. Such a plant would furnish an abundance of pure water from an Olympic mountain stream, water which could never be contaminated, and in quantity sufficient for all uses of a large city. It is understood Mr. Heermans will get to work at once, upon receiving franchises, and that the pipe will also be manufactured here.

Distressing Accident

Mr. Fraser, of Forks, met with a distressing accident Tuesday. When on his way from town to his ranch he fell from a log crossing Coal Creek, sustaining the fracture of both bones to one of his limbs. Ray Maxfield, who was with him, ran for assistance and Mr. Fraser was carried to Forks on a stretcher and brought here yesterday morning for treatment at the hospital. He was without medical treatment for forty-eight hours. J. J. Sutherland and J. R. Smith, who came up as witnesses on a road case before Judge Hatch's court, accompanied Mr. Fraser to Angeles.
