LOCAL OPTION MEASURE

County, City and Town Unit Decided Upon. Special Elections to Be Held Biennially.

The temperance workers of the state, in conference at Seattle on Wednesday, adopted the following as the salient features of a "reasonable local option bill:"

The vote shall be taken at special elections, the first of which shall be held in December, 1909, the result to be operative for two years. Subsequent elections may be held biennially, upon petition of twenty per cent of the voters of the county, incorporated city, or county precinct, who are adverse to existing conditions.

Whenever a county shall vote dry, every part of that county shall be dry, but if the county goes wet any individual county precinct or incorporated city or town therein which shall have filed a sufficient petition asking that a separate vote in that country precinct or incorporated town or city and shall have voted dry, it shall have the right of self protection and shall be dry, even though the county as a whole votes wet.

The bill is to forid the sale of intoxicaing liquors in every form but shall not include the manufacturer.

The conference was attended by 142 delegates, represening societies of various churches, church organizations, members of the Good Templars, civic unions and Law Enforcement leagues.

Remember the "Minstrel Concert" to be given at M. W. A. hall, Dungeness, August 7th by the Ladies Improvement Club. Thirty characters: fine music and drills; dancing and refreshments.

FERRY SCHEME AGAIN TO THE FORE

EVERETT - PORT LUDLOW ROUTE

Townsend Call Sees in Report Assurance of Early Completion of the Townsend Southern.

A story from Tacoma, if true, means the Portland terminal war between the Hill and Harriman interests is at an end, and that the Spokane, Portland & Seattle railroad will be permitted uncontested to lay its main line crossings over Harriman tracks in North Portland, giving the north bank road entrance to its new terminal yards.

It is said Hill has for this concession traded the old Union Pacific grade and right of way between Portland and the Sound, possession of which fell to the Northern Pacific in 1893, as a result of the panic.

Harriman is said to intend using the old grade to build the Oregon & Washington railroad between Portland and Tacoma. It is alleged the two rival factions have now come to an agreement on common use of the Columbia river bridge, exchange of certain terminal courtesies at Tacoma, Spokane, Lewiston and Seattle, and the turning over by the Northern Pacific of the old Union Pacific grade to Harriman as far north as Tacoma.

The remainder of the old grade, from Olympia to Port Townsend, has been utilized by the Hill interests in providing for extensions on Olympic peninsula and a connection is to be effected between them and the mainland by operating the Kalama-Goble ferry between Port Ludlow and Everett as soon as the Vancouver bridge of the north bank road is in operation.

The above is taken from the Portland Telegram and is corroborative of a statement published in the Townsend Call many months ago, or just before the financial depression occurred last fall. The Call's article was based on the improvements made at Port Ludlow near Port Townsend by the big mill company in the way of building large drying sheds for lumber and the laying of railroad tracks and switches therein, so that cars could be loaded and placed on the ferry and taken to Everett, where they could be shipped direct to the east without the expense of handling the lumber several times as is the case at the present time.

Since the completion of the big steel bridge across the Columbia river by the North Bank road the big ferry will soon be out of commission, and, accordinng to the present outlook, she will be brought to the Sound and operated between Port Ludlow and Everett as a railroad ferry.

It also seems to indicate that the gap between the Quilcene end of the Port Townsend and the Olympia end of the same road, will be utilized and a direct connection made. It is known that the directors of the road at a meeting held many months ago in New York appropriated money for construction of thirty miles of road from Quilcene toward Olympia. After this money had been voted, engineers were placed at work, the road located, grade stakes set and every detail arranged for the letting of contracts, so that when the time arrived for building the road, there would be no delays, as all information could be furnished contractors. While this work was being done it was thought that the time was not far distant when the long-looked for completion of the missing link in the Port Townsend Southern would be consummated and the reports now in circulation add strength to the belief.

BOOSTING TIMBER ASSESSMENTS

BOARD WORKING NIGHT AND DAY

Gilt-edged Accessible Timber Being Assessed at Sixty Cents; Non-Accessible at Fifty and Forty.

The Board of Equalization, which convened Monday in annual session for the purpose of checking up the work of the assessor and deputies, has been about the busiest body of public officials that ever assembled in Clallam county. A brief examination of the records revealed the fact that the valuation of the county, real and personal, had only been increased about one million dollars—not only a poor showing in view of the records of timber cruises at hand, but also far below the 60 per cent valuation required by the state board. Fir, cedar and spruce lying along the straits had been assessed at fifty cents per thousand, just half the rate that should have been made on accessible timber, accordng to Secretary F. C. Morse, who represented the state board at Monday's session. Timber less accessible had been assessed at forty, thirty and twenty cents, the magnificent body of fir in the southwestern part of the county, worth on the market but little, if any, less than that along the straits, coming under the twenty cent rate. Nor did there appear, according to the cruises at hand, to be uniformity in the assessment, adjacent tracts carrying about the same amount of timber varying greatly in valuation.

The board immediately decided upon a new schedule—sixty cents on accessible timber, fir, cedar and spruce, and fifty and forty cents on that more remotely situated, with hemlock at half rates—and started in to revise the entire timber assessment. As the board is limited to a twenty day session and the law requires that ten days notice be given property holders of a proposed raise, it was necessary to employ extra assistance and keep the work going the entire twenty-four hours of each day.

DIRECTORS IN SESSION

Nearly One Hundred Attended the Meetings Held By County School Superintendent.

The school directors meetings held last Wednesday, Thursday and Friday were very successful in every way. At the west end meeting, held at Clallam, 26 directors were present, every district being represented, which, taking into consideration the long distances to be traveled and the rough roads, shows a great interest in school matters. At Angeles there were 20 in attendance, and at Sequim 40. The addresses by President Benbow and assistant State Superintendent Layhue, who subsituted for Superintendent Dewey, were practical and of great value, as also were the talks on financial conditions of the various districts by W. E. Burnside, the authority on county finances. Many questions were asked and excellent suggestions and advice given on the management of school affairs.

DANCE SATURDAY NIGHT

Another one of those enjoyable dances will be given at the skating rink Saturday, August 8. To those who enjoy good music and like to dance on this excellent floor this is looked forward to with pleasure.

NEW RECORD FOR MT. OLYMPUS

MADE 3 PEAKS IN 12 HOURS

Nine Members of Y. M. C. A. Party of Tacoma Make Trip Without Guide and Say it is Easy.

Nine members of the Tacoma Y. M. C. A. party, which has been encamped at Elkhorn, 32 miles up the Elwha river from Port Angeles, from July 7 to 31, claim the record for a quick trip up Mt. Olympus. Leaving camp on the 20th, each carrying his blankets and fifteen pounds of provisions, the little party made the foot of Humes glacier in the Queets valley on the 22nd, having camped enroute at Crackerville and Elwha Basin. At 6 a. m. the following morning, under the leadership of Arthur Wise, they started for the summit, climbing three peaks, leaving their record in the Mountaineers' tube at 3 o'clock, and returning to camp at 6 p. m. The day was fine and the trip made without accident, though the boys, with the exception of Mr. Wise who had climed Tacoma and Hood, were entirely inexperienced. Not only that, but they were indifferently equipped, not having intended to include mountain climbing in their outing. Only half the boys were properly shod; sticks with nails set in the end were used as alpine stocks, and a pack rope did duty as the line. They found the big glacier covered with snow, as was pretty much all the country in that region, though it was melting rapidly; in the Elwha canyon they noted a fall of four feet in the level of the snow in the forty-eight hours of their trip.

While they were off on their trip Messrs. Moser, Ford, and Henrikson took a trip to Lost river, securing photos of elks and bear while gone.

The members of the party were: Arthur Wise, Jesse Wilkinson, Donald McDonald, Willis Donnelley, Victor Bonney, Charles Dunbar,

WESTERN CLALLAM PRODUCING GOLD

CLAIM $150,000 NOW IN SIGHT

Miners Are Building Dam and Sluice Boxes to Work Gravel Along the Ocean Beach.

Commissioner K. O. Erickson, here attending the sessions of the board of equalization this week, brings word of a placer mining company now operating on the ocean beach near Mora, some six miles above the mouth of the Quillayute. Mr. Erickson visited their camp a few days ago and says they claim to have from $100,000 to $150,000 worth of gold in sight. While this, he thinks may be a rather liberal estimate, he has no doubt they can clean up from five to eight dollars each per day, there being five men now working on the claim. A sample pan, which Mr. Erickson secured at the time, shows a dozen or so large flakes of gold in less than a half teaspoonful of black sand. That there is gold in the beach sands along western Clallam county, as well as in the beds of most streams, has long been known, but never before has it been found in sufficient quantity to pay for working. The present claim is located along a small stream, the gold being contained in a cement gravel, to get at which it is necessary to clean away the brush and about two feet of surface soil, when the gravel is excavated with a pick. A paying placer in that locality will result in a thorough investigation of the entire coast line, and doubtless bring to light other deposits of similar quality.

The Pythian Sisters are holding their annual convention in Boston this week.

Richard V. Oulahan is to have charge of the literary work of the republican campaign.

Bird S. Coler has announced his candidacy for governor of New York on the democratic ticket.

Four hundred thousand young trout have been placed in the Clearwater and tributary streams from the Idaho state hatchery.

James C. Boynton of the interior department at Washington has been appointed to assist in securing exhibits for the A.-Y.-P. Exposition.

Organized labor in Portland is making preparations for the most successful Labor day celebration ever held there. Five thousand men will be in the line of march.

President Roosevelt has directed the state department to instruct Ambassador Leishman, at Constantinople, to convey to Sultan Abdul Hamid II. his personal congratulations on the re-establishment of the constitutional government in Turkey.

Former State Senator R. A. Booth of Oregon; J. H. Booth, ex-reeciver of the land office at Roseburg, Ore., and Thomas E. Singleton have been acquitted of the charge of conspiracy to defraud the government of public lands.

Congressman Powers of Maine is dead.

Railroads have started war on usurers at Kansas City. Presumably the war will be extended to other railway centers.

At Vallejo, Cal., Friday, Rear Admiral John H. Dayton delivered the command of the Pacific fleet to Rear Admiral Charles S. Swinburne on board the flagship West Virginia.

Archbishop Ireland has created a great deal of discussion, especially in the German circles of Chicago, by delivering an address in which he charged Germany with being cruel to the Polish people under her rule.

A reorganization of the Pope Manufacturing Company has been effected. The new capitalization will be $2,500,000 preferred stock and $4,000,000 of common stock. The new company will purchase the entire property and will operate the factories at Hartford, Conn., and at Westfield, Mass. The company went into the receivers' hands August 17, 1907.

It is learned at Victoria that the Yukon territorial legislature, which has just opened, has decided to abolish the saloon in the territory, including Dawson City, and do away with the dance halls. A bill to that effect has been introduced, and it is likely that it will pass without much opposition.

RAILROADS CHARGED WITH WRECKING BANK

Chicago, Aug. 1.—An intimation that the failure of the Chicago National bank was caused by a conspiracy against John R. Walsh was made by William Armstrong, who recently brought suit against several railroads and individuals for $1,000,000 which he said was due him for services performed. Armstrong filed in the municipal court here yesterday one hundred and forty-one interrogatories addressed to Charles W. Hotchkiss, former president of the Indiana Harbor railroad, now merged into the Lake Shore system. He alleges his belief that a conspiracy was formed in New York by railroad men to prevent Walsh from building a competing line—the Southern Indiana—and he alleges that they forced Walsh into a position where he was compelled either to go into bankruptcy or take money from his bank with which to carry out his enterprise. Judge Hume ruled that ninety-nine of the interrogatories should be answered.

British Factories Opened.

London, July 29.—It is estimated that over 30,000 men were given employment yesterday when a large number of factories were opened in conformity with the new British patent law. The total output of capital is variously estimated at from $125,000,000 to $200,000,000. The new law makes it compulsory for devices patented in Great Britain to be manufactured in Great Britain. After this any patents granted to foreigners may be immediately revoked if the goods are not manufactured in England.

Printers Claim Bryan.

Lincoln, Neb., Aug. 3.—Lincoln Typographical Union, at its meeting yesterday, elected William J. Bryan an honorary member. Governor Sheldon, who is a republican and friendly to organized labor, was also made an honorary member.

Butte August 1.—The first train to be run into Butte over the tracks of the Milwaukee railroad pulled into the Butte, Anaconda and Pacific depot Thursday after a pleasant and uneventful trip from Miles City. It bore a party of Milwaukee officials.

Senator Allison Dead.

Dubuque, Iowa, Aug. 4.—United States Senator William Boyd Allison died at his home here of heart failure at 1:45 p. m.

Allison enjoyed the title of "Father of the Senate," having served continuously in the upper branch of the national legislature for thirty-three years—a period longer than any other man now in that body. He had a previous record in the house of representatives of eight years of continuous service. Allison entered congress with Blaine and Garfield in 1863, being the eldest of the trio who were afterwards so closely associated in public life.

OVER ONE HUNDRED PERISH IN FLAMES

Spokane, Aug. 1.—The entire town of Fernie, B. C., has been destroyed by fire. Every building except the offices of the coal company has been razed by the flames.

Of the 4,000 inhabitants, all but 500 have been rendered homeless by the conflagration.

They were forced to flee back into the hills. Suffering during the night is certain to be keen owing to the exposure of many women and children. Definite details of the disaster are meager because of interrupted communication owing to a severe storm that has been raging. It is feared that some of the fire fighters have sustained personal injuries.

Starts From Neglected Brush Fire.

A neglected brush fire is the cause of the calamity.

Word has been received from Cranbrook to forward all available provisions. Relief trains have been started with doctors, nurses and food on board.

A brush fire had been raging for several days on the opposite side of Elk river from Fernie. Late this afternoon the flames leaped across the stream and their progress was irresistible.

Loss Is Over Two Millions.

As near as can be estimated, the total loss will be between $2,500,000 and $3,000,000. The heaviest loser is the Crow's Nest Pass Coal Company, whose local works are valued at $500,000. The Elk River Lumber Company will lose $300,000. The largest building in Fernie was that of the Royal hotel and next came the Trites Wood Company, both of which have been reduced to ashes. No estimate of the amount of insurance carried is available.

Fires are also raging between Cranbrook and Crow's Nest, and threatening to destroy these towns.

At 5:30 o'clock this afternoon a report was received from Hosmer that the Hosmer Lumber Company's mill was on fire and that half a dozen families are cut off by the fire. All men available have been called out to fight the flames.

This is the second big fire for Fernie. A year or so ago an enormous landslide destroyed many lives and much property. A flood also did great damage not long ago.

Fernie, B. C., Aug. 3.—Seventy blocks of smoldering ashes mark the spot where, up to last Saturday, stood the well built, thriving and ambitious city of Fernie, with its 6,000 population.

Twelve bodies have been recovered, but grave fears are entertained for the safety of at least 200 people in the logging camps and small settlements in the burned district.

But fourteen residences and one business house, isolated from the fire's path, remain.

One wall rears itself above the ruins, the flames having razed the buildings and eaten their contents in two hours. Between 700 and 800 families are homeless and destitute. The property loss will reach $8,000,000 in the city proper, while the destruction of commercial timber in the burned and burning area of 200 square miles will reach a staggering figure.

Four Men Hemmed In.

Four men were hemmed in by the flames and perished while trying to save the costly new bridge of the Great Northern across Elk river. Their bodies were found along the track, where they had fallen in the attempt to escape.

Peter Miller, Louis Fratin, a woman, a child and an unknown man perished in the sawmill sections. The bodies were recovered.

At Hosmer, a small town that was saved after a hard struggle, four are dead. John Cupik, to escape, crawled into a tunnel and was suffocated. A man, unknown and evidently burned and mangled by falling timber, was found in a school house, where he had crawled to die. In a cabin a woman and a child suffocated in each other's arms.

Three Million Loss.

General loss in city, including residences and usual representative business concerns, eleven hotels, etc., $3,000,000.

All horses and other animals were burned.

Long rows of blazing coke ovens alone remained proof against the flames.

The intensity of the force of the gale is hard to comprehend. The writer was 100 miles away on the east slope of the Rockies. The gale, laden with heated air and dust, reached over the prarie like a desert simoom, darkening the sun and driving the people to shelter.

Wire connection to the east of Fernie is cut off. From Frank the scene was reached on a scout train that nosed its way for miles through burning country, where at times the blazing embers, crashing trees and scorching heat were terrible.

The crude towns in the rugged Canadian Rockies in the Crow's Nest country have had more than their share of misfortune. Fernie has been wiped out by fire four times.

Hosmer is in the bottom of a deep trough, the sides of which are abrupt mountains. The flames rushed along the wooded sides, literally raining burning brands into the town. The heat was so intense that all the window panes were broken, and that the place was not completely wiped out, with great loss of life, was a miracle.

Sparwood, Wardup and Odessa, small sawmill towns, are completely destroyed, but so far as known, with no loss of life.

The heaviest losers in Fernie are:

The Crow's Nest Pass Coal Company, 500,000 tons of coal and coke and buildings, estimated loss $2,000,000.

Canadian Pacific, terminals and office, eighty cars, including six Pullmans and diners, $1,100,000.

Great Northern, fifty loaded cars, bridges and terminals, $1,000,000.

Memorable Railroad War.

In this section occurred the memorable railroad war between J. J. Hill and the Canadian Pacific for control of the Crow's Nest pass and the Crow's Nest coal fields. Five years ago 130 lives were lost in a gas explosion at Coal Creek. In April, 1903, at Frank, a slice of the mountain a mile high toppled over and buried hundreds of people forever. With bitter strikes, Black Hand outrages, murders, snowslides and mine disasters she has been kept in the public eye.

On the afternoon of the fire the miners were busy rescuing twenty-five miners from a living tomb caused by a cave-in at the mine several days before. Twenty were brought out alive and three dead, while others are still buried, and the work of rescue is going on.

Refugees at Nelson.

Nelson, B. C., Aug. 3.—A thousand refugees, the overflow from Cranbrook, arrived here this morning. Most of them are destitute, and although supplies are being rushed into the stricken country from every available route, there is great difficulty in getting provisions within the zone destroyed by the fire. All large Canadian cities have wired money, but provisions are most needed.

Spokane Sends More Relief.

Spokane, Aug. 3.—Quick relief in the form of bread, butter, other provisions and clothing is being given the destitute people of Fernie. A special car of supplies sent yesterday from Spokane was followed today by a shipment of 3,000 loaves of bread. The mayor and members of the Chamber of Commerce instantly responded to appeals for assistance. The relief committee of Spokane is swamped with contributions, which is only another instance of the generosity of the American people in time of disaster.

The report says that tents and bedding are also badly needed in the stricken district. The fire has swept an area of 100 square miles.

COMMISSION EXTENDS TIME OF RAILROADS

Washington, July 29.—Upon application of the defendants of the so-called Pacific lumber cases the interstate commerce commission has extended the effective dates of its order from August 15 to October 15. This action was taken upon the showing made by the carriers involved that owing to the immense number of rates involved it would be a physical impossibility to check up the rates and print and file the new tariffs before August 15, and also upon their assurance that if the extension were granted they would not apply for an injunction to restrain the commission order from becoming effective.

They expressly reserve the right to test the reasonableness of the rates ordered by the commission in a suit to be brought for the purpose in suits which may develop out of reparation claims by shippers who have been shipping under the advanced rate. This does not include the case involving rates from the Willamette valley to San Francisco on which the Southern Pacific Company has already filed a petition in San Francisco asking an injunction against the commission's order.

THOMAS CAR COMPLETES NEW YORK TO PARIS RUN

Paris, Aug. 1.—The Thomas car in the New York to Paris race crossed the French Frontier at noon Thursday and reached Paris at 8 o'clock. The car was escorted up the boulevards by automobile enthusiasts who met it at Meaux, twenty-five miles east of Paris, and was greeted with cheers. The race committee was waiting at the office of the Matin to receive the car. Congratulations were showered upon the interested crews, the Americans of which proceeded to a hotel after their healths had been drunk.

Transcontinental Balloon Race.

Chicago, Aug. 3.—A transcontinental balloon race, starting from either Los Angeles or San Francisco, with the Atlantic seaboard as the objective point, is being planned by the Federation of American Aeronauts, according to announcements made by the board of directors of the organization here.

TWO GOOD FLIGHTS

FRENCH AEROPLANE MAKES SUCCESSFUL TRIAL TRIPS IN NEW YORK.

Under Perfect Control, Machine Travels Through Air at Express Train Speed, Covering Total Distance of 1,100 Yards—Ovation for Inventor.

New York, Aug. 1.—Rising from the ground like a giant bird and darting through the air at express train speed, Henri Farman's aeroplane or heavier-than-air flying machine, brought here from France, made its initial flight in this country late yesterday afternoon at Brighton Beach. It rose from an especially prepared "dock" at the will of the inventor and after attaining a height of twenty-five feet, flew straight ahead on a direct line, finally alighting with exquisite grace when the air pilot diminished the motive power.

During the brief space of time in which the aeroplane was skimming over the center field of the racetrack the few hundred spectators, most of whom were friends of the inventor or rival navigators, watched the flight with breathless interest. The landing provoked cheers as vociferous as those of a racetrack crowd. Farman was surrounded and literally hugged by the jubilant aeronauts. Members of the Aero Club of America, under whose auspices Farman will conduct his public flights at Brighton Beach, wanted to carry the successful inventor off the field on their shoulders.

There were skeptics in the crowd who would not believe until they saw, and they watched the "tuning up" of the aeroplane in doubting silence.

Makes Two Flights.

Farman's mechanics rushed about getting the queer shaped ship ready for the flight, and when wires had been made taut and the motor tested, the ship was carried to the plank runway, near the field stand.

Newspaper photographers crowded around the aeroplane to get pictures of the machine as it was about to make its first flight in America. Farman then decided to again test the motor before flying. He instructed his French mechanics in their native tongue to hold fast to the aeroplane while he turned on the power. Instantly the propeller began to revolve at the rate of 1,400 revolutions to the minute and a breeze suggestive of a small cyclone was created. The photographers were knocked to the ground until the power was turned off. So great was the violence of the breeze that several willow trees were bent doubt. Farman laughingly said he guessed the machinery was working all right.

Then, when the chowd had been waved back, he gave the order to "let go, let go!" and away sped the aeroplane over the plank roadway. It ran swiftly along on its wheels for 240 yards and then Farman turned a lever which sent it into the air like magic and away it flew. The propellor made a whirring noise as it turned 800 times to the minute. Only 350 yards were covered in the air in this flight, but a few minutes later Farman made another try and traveled 760 yards in the air. He could have gone much farther, he said, but feared striking a pile of lumber.

Exhibitions Begin Today.

These flights are preliminary to Farman's public flight which will begin today. He will give fifteen exhibitions at the racetrack, and it is probable that he will appear in other parts of the country, as many aeronautic clubs are trying to induce him to visit other cities.

As a rival attraction to Farman yesterday Frank Hamilton, an American aeronaut, sailed his dirigible balloon into the racecourse while Farman was preparing to make his flights. Hamilton's balloon soared over the track grandstand and circled the field. When it was coming back a blade of the propellor broke and the balloon was banged up against the grandstand, throwing Hamilton out. Farman was the first person to go to his assistance, and he shook his rival aeronaut warmly by the hand when he learned that he had not been injured. Hamilton secured a new propellor and sailed away.

Will Deepen Mare Island Straits.

Washington, Aug. 3.—The board of civil engineers of the army and navy appointed to suggest some methods of improving the approaches to the Mare Island navy yard has decided on the employment of hydraulics in the Mare Island straits. By this means it will be possible to provide an adequate depth of the channel at Mare Island to accommodate the largest of the war vessels. The project is said to be feasible and can be maintained, when once it is installed, for $25,000 a year.

Land Goes on Market.

Chicago, August 1.—According to the terms of an act of the last session of congress removing restrictions on the alienation of land owned by members of the Five Civilized Tribes of Indians in Oklahoma, which went into effect Monday last, about 9,000,000 acres which have been tied up have become available to purchasers. The law will go far toward putting the land owned by the Indian portion of the population of Oklahoma on a footing with other residents of that state.

BRYAN IS BUSY AT WORK ON SPEECH

Will Be Completed August 5, but Nominee Is Unable to Estimate Its Possible Length.

Fairview, Lincoln, Neb., Aug. 1.—The day at Fairview was uneventful, only a small number of visitors going out to the Bryan home to pay their respects to the democratic nominee for the presidency. In consequence of the few interruptions Mr. Bryan made rapid headway with his speech of acceptance. He said that it would be completed August 5. Regarding its possible length, Mr. Bryan stated that he was unable to estimate it at this time.

The program of exercise in connection with the notification August 12 was announced yesterday by Mayor F. W. Brown, after it had been submitted to Mr. Bryan for approval. With the exception of the speeches the affair will be a nonpartisan one and on a simple scale.

GOOD CROP REPORTS FROM EVERY STATE

Chicago, Aug. 3.—An exhaustive outline of crop conditions from practically every publisher of farm papers of the United States has just been received by C. R. Irwin, president of Lord & Thomas. This report is made for the benefit of manufacturers, who look to them each year for reliable information of the country's condition in advance of the actual measuring of crops after harvest.

Arthur Capper, publisher of the Topeka Daily Capital and allied publications, reports Kansas wheat acreage 7,000,000, corn 6,930,000, and states that the largest crop in the history of the state is assured.

Henry Wallace, editor of Wallace's Farmer, of Des Moines, writes: "Farmers are now harvesting a most excellent of crop of clover and timothy hay. Pastures have never been better. We may fully expect an average crop of corn and a little less than an average crop of oats, an average crop of winter and spring wheat, and a superior crop of hay and pasture."

Indiana estimates 50,000,000 bushels of wheat, 170,000,000 bushels of corn, a heavy yield of oats and a hay crop of unusual promise.

In Northern Iowa and the states of Nebraska, South Dakota and Minnesota, where probably half the spring wheat of the country is grown, the Sioux City Farmers' Tribune reports conditions fully 6 per cent better than a year ago. The winter wheat grown in this territory has a larger acreage and the yield will be better than that of 1907. The barley crop will be practically the same as a year ago.

The Dakota Farmer, of Aberdeen, S. D., says: "As a whole, crop conditions in the Dakotas are magnificent, and we are firmly of the belief that these two states will produce this year larger crops of wheat, oats, barley, hay and corn than in any previous year."

The Wisconsin Agriculturist, of Racine, reports an immense hay crop; farmers entirely satisfied with the corn outlook; tobacco all right, except for occasional damage from cutworms; probably a falling off from 10 to 15 per cent of the tobacco crop.

Nebraska, according to the Twentieth Century Farmer, of Omaha, has never had a stand of corn equal to that of this year.

Colonel Holland, of Farm and Ranch, Dallas, Texas, writes that cotton, while a little late, is making splendid progress. The corn crop will exceed in acreage and yield that of the past season.

Oklahoma up to date shows a corn acreage of nearly 5,000,000, putting Oklahoma in seventh place.

The Michigan Farmer reports hay crop put away in fine condition, and the condition of the growing crop is 90 or above in practically every case.

SIX GUBERNATORIAL CANDIDATES HAVE FILED

Olympia, Aug. 1.—Declaration of candidacy for the republican nomination for governor was filed yesterday by Governor Albert E. Mead. The governor comes sixth on the list, Colonel W. M. Ridpath of Spokane, John D. Atkinson of Wenatchee, Joseph W. Robinson of Olympia, Henry McBride of Seattle and Oscar H. Neal of Bellingham having previously filed in the order named. S. G. Cosgrove of Pomeroy has yet to file and his name will probably foot the column in the list of republican gubernatorial aspirants.

Dr. Patrick S. Byrne of Spokane yesterday filed for the democratic nomination for governor.

Father Prefontaine Honored.

Seattle, Aug. 1.—Bishop Edward J. O'Dea received from Rome, on Thursday, a letter from the papal secretary in which is conferred upon Father Francis X. Prefontaine of this city a special honor. This is the appointment of Father Prefontaine as a prothonotary apostolic. Father Prefontaine was the first Catholic priest to establish a parish in Seattle and built the first Catholic chapel located in the city. Since the early days of Puget sound settlement he has been a leader in the Catholic church of the Northwest.

Montana Wool Sale.

Great Falls, Mont., Aug. 1.—The Great Falls Wool Exchange opened during the week for the big sealed bid sale conducted in Northern Montana this year. Fourteen clips aggregating 269,000 pounds were offered and twelve were sold at par, ranging from 13¾c to 16¾c, the low price being for dipped wool.

NOTICE AND SUMMONS

BY PUBLICATION OF TAX FORECLOSURE.

In the Superior Court of the State of Washington, in and for the County of Clallam.

Clallam County, plaintiff, vs. All persons hereinafter mentioned and all persons unknown, if any, having or claiming an interest or estate in and to the hereinafter described real property are hereby made defendants.

State of Washington, County of Clallam, ss: To all persons hereinafter mentioned, who are the owners or reputed owners of, and all persons unknown, claiming or having an interest or estate in the hereinafter described real property. You and each of you are hereby notified that the above named plaintiff, Clallam County, is the owner and holder of Delinquent Tax Certificate issued in one General Certificate, in book form, marked L, by the Treasurer of said Clallam County, State of Washington, embracing the real property hereinafter described and set opposite the respective names of owners or reputed owners, or unknown owners, situated in Clallam County, State of Washington, and you are further notified that, in reading the description of Lands and Lots hereinafter described, the abbreviations Sec Twp R means Section, Township and Range, and that in reading the description of Lots and Blocks hereinafter described, the letters L and B means Lot and Block respectively.

That said Certificate was issued on the 21st day of July A. D. 1908, for the sum set opposite each piece or parcel of Land hereinafter described, for the delinquent taxes due Clallam County for the year 1901, that the said Taxes for said year are unpaid and due the plaintiff, which said several sums bear interest at the rate of Fifteen (15) per cent per annum from the 21st day of July, 1908. Said owners or reputed owners, said real estate and said amounts are particularly described as follows, to-wit:

FRIDAY, AUGUST 7, 1908

Wm. B. Allison of Iowa, leader of the U. S. Senate and the recognized authority on governmental revenues and expenditures, died at his home in Dubuque Tuesday, August 4th. He had been a sufferer for many years, but so few were aware of his severe illness that the end came as a shock, even to his neighbors.

The death of Senator Allison removes from the senate a man who for more than a quarter century was one of its most prominent members. He has served his state continously since 1863, when elected a member of congress; in 1873 he was first sent to the senate and for the greater part of his service was recognized as one of the most influential members of that body.

The Spokane Spokesman-Review, in sizing up the strength of the respective candidates in the contest for the nomination for governor, states that the contest appears to be very much one-sided. It is believed McBride will carry King by at least 20,000 of the 30,000 republican votes, and that he will receive not less than half the 15,000 votes in each Pierce and Spokane counties. In Whatcom, Skagit, Chehalis and Lewis there are aggressive McBride organizations, the leaders of which insist they will carry those counties. Supporters of Mead claim he will carry his own county and Thurston and break even with McBride in Pierce. Cosgrove supporters also claim second place in Pierce. In eastern Washington, Cosgrove's strength lies south of the Snake river, while McBride is in the lead in the northern counties.

In Pierce county the assessor's valuations on lands outside the city of Tacoma totals $13,864,839 as against $6,446,771 in 1906. Three fourths of the gain is on timber land. The cruise of the entire county cost $37,396 and shows 12,283,842,300 feet of standing timber. In Jefferson county this year's timber assessment figures $4,443,242, while that of '06 amounted to $2,290,424. A cruise of the entire county cost $9008.01.

Judge Neterer of the Superior court at Bellingham decided, Saturday, that the filing fee required by the primary law is not necessary. The question was raised by the socialists in behalf of their candidate for the legislature. Judge Neterer holds section five to be inoperative for the reason that it is a method of raising funds, the disposition of which is not specified.

Lewis Levy has filed his declaration of candidacy for the office of representative to the legislature on the Democratic ticket to be voted on at the primary election on Sept. 8th.

Candidates who have filed since our last issue are: On the democratic ticket, Lewis Levy for representative; Miss J. Annette Trumbull for county superintendent of schools; David Govan for assessor; on the republican ticket, Frank Lotzgasell of Dungeness for commissioner of the First district. Tomorrow is the last day for filings to participate in the primary election and several are expected to file before tomorrow night.

Attorney A. R. Coleman, of Port Townsend, was here the early week meeting his many friends and making many others. Mr. Coleman is a Southerner, and a thorough gentleman. His dignified demeanor and most pleasant manners are interesting a great many of our most influential citizens in his candidacy for the superior judgeship.

POLITICAL ANNOUNCEMENTS

PAID ADVERTISEMENT.

FOR ASSESSSOR.

I hereby announce that I will be a candidate for the nomination on the republican ticket for the office of county assessor at the coming primary election.

As I feel that the people must know a candidate's position in matters pertaining to the office before they can vote intelligently I make the following statement:

Should I receive the nomination and be elected to the above office, I I will assess all county property, both real and personal, taking all valuations on a true and just basis.

I will use all my endeavors and ability to have an absolutely correct and true cruise and estimates of all the timbered lands in the county and will assess same on a square and straight valuation according to law, taking for the base of estimates such cruise. J. Lloyd Aldwell.

My Hair is Scraggly

Do you like it? Then why be contented with it? Have to be? Oh, no! Just put on Ayer's Hair Vigor and have long, thick hair; soft, even hair. But first of all, stop your hair from coming out. Save what you have. Ayer's Hair Vigor will not disappoint you. It feeds the hair-bulbs; makes weak hair strong.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

BORAX IN THE DAIRY

The problem of keeping sweet all the utensils used in connection with milk and cream selling and butter making has been a serious one with the farmer.

He has come to realize that the slightest taint or hint of staleness left in a can, tin or churn may ruin a whole output; that the taint that is left is in form of bacteria, which grow and multiply in milk or butter, producing disastrous results.

The farmer has learned that **hot water** won't rinse away the greasy residue in dairy utensils.

He has learned that **soap leaves a residue of its own** which is, if anything, worse than the milk or cream residue, and there has been constant clamor for a dairy cleanser and sweetener that will meet modern requirements.

A few of the largest creamery establishments called experts into consultation on this problem, and these scientific aids decided unanimously upon a **product of nature which exactly fills the bill**—BORAX.

Scientists have long known borax as a cleanser, a sweetener and an antiseptic destroyer of bacteria and green growths that destroy all that is harmful, preserves freshness, sweetness and purity, and relieves the dairyman and dairy housewife of drudgery and of needless work and worry.

Write Pacific Coast Borax Co., New York City, for "Successful Dairying," being valuable information on the most profitable selection of cows, their feeding and care, the handling of milk to yield the highest price product, and the protection and preservation of these products from deterioration; with articles on diseases of cows, and recipes for their cure. COST OF LIVING NOWADAYS.

Has It Come Down Since the Panic of 1907 or Not?

The London Economist figures a decline in average cost of commodities during the first four months of 1908 of 7 per cent and a decline from the high point of last year to May of 15½ per cent. Bradstreet's index number of New York prices shows a fall here of 12¾ per cent from the high level of last year. Both agree that staple prices are now the lowest in three years.

But this conclusion is likely to be disputed by any householder. His living expenses have not decreased, except through buying less; the average citizen will say it now costs more to live than before the panic. And he is right, if necessaries of life alone are considered. Bread and meat, which enter first into actual daily cost of living, show in the one case an advance of just 25 per cent over March, 1907, and for the other a decline of 2 per cent—this latter being in wholesale prices, and probably not reaching the consumer.

Bradstreet's figures show that prices of packed provisions are down 9 per cent from last year, fruits 30 per cent, and leather, textiles, drugs coal and oil something like 10 per cent. But they do not reckon in the price of canned vegetables, which, as with flour, are higher, because of the bad growing weather of 1907, or the numerous preserves into whose composition enters sugar, which has advanced in price. Instead, the Bradstreet's table includes metals like iron, tin and copper, which have fallen 30 to 50 per cent from a year ago but which cut an altogether minor figure in current expenses.

The best sign of future reduction in cost of living is the promise of good crops in 1908; the worst is the reviving tendency to speculate rise in prices. The most perplexing consideration is, who got or is getting the benefit of the fall in meat and cotton goods at first hand? Not the consumer, apparently.

A Mole Catcher.

A farm manager at Fodderty, Dingwall, Scotland, watching a mole catcher at work, saw sea gulls hovering over and occasionally alighting upon a turnip field in which the observer and others were at work. A particularly large and handsome bird attracted his attention by the graceful way it floated slowly over the drills, intently scanning the surface of the ground. Suddenly, steadying itself a moment, it dropped, dug its bill into the heaving ground, and rose with a mole for its prey. Resting a few minutes, it gracefully began again a further search for prey. In a few minutes a second mole was unearthed.

Best Time to Smoke.

It is quite certain that much may be done to diminish the risk of tobacco amblyopia by paying attention to certain points of personal hygiene, says Hospital.

For instance, a rule should be made never to smoke upon an empty stomach, but as far as possible only after meals. It is absolutely bad to smoke before dinner, and equally bad to smoke late at night to keep awake at one's work.

It should also be forbidden to chew the cigar between the teeth, as many smokers are wont to do.

There are two ways of meeting a trouble; either give it no attention at all, or give it a great deal of attention promptly.

Short Suggestions.

To cover the pan in which fish is cooking will make the flesh soft.

All lard to fry fritters and doughnuts must be very, very hot before putting in the batter.

Black lead mixed with vinegar will be found to give a specially good polish to the kitchen stove.

Rub over new tinware with lard and thoroughly heat it in the oven before using it, for thus it is protected from rust.

If, when using lemon for flavoring, you need only half a one, put the other half on a plate and cover with a glass tumbler. This excludes the air and prevents it from drying up or getting moldy.

When cleaning knives add a little carbonate of soda to the bathbrick on the board, for then they will polish much quicker.

A neglected grate, or one which has been red hot, should be rubbed over with a cut raw potato before it is blackleaded. The result will be a brilliant polish.

Ink stains on silver or plated articles may be removed with a paste made of chloride of lime and water. This should be left on for a little while and then washed off in warm water.

S.S.S. CONTAINS NO MERCURY

Medicines containing Mercury are often given to persons suffering with Contagious Blood Poison, and so powerful is the action of this drug that it frequently removes the symptoms in a short while, and shuts the disease up in the system to do greater damage to the delicate internal members. When, however, the treatment is left off, the disease always returns, and the patient finds that his health has been injured by this powerful mineral, and he is often left with weak stomach, disturbed digestion, mercurial rheumatism, etc. The action of S. S. S. is entirely different. It contains no Mercury, nor any other harmful drug, but is made entirely of healing, cleansing roots and herbs. It cures Contagious Blood Poison by removing the virus from the blood. It searches out every particle of the poison and does not leave the least trace for future outbreaks. S. S. S., in addition to curing the disease, builds up and strengthens every part of the body. Its fine tonic effects tone up the stomach and digestion, improve the appetite and regulate the entire system. Home treatment book containing valuable information about the different stages of the disease and any medical advice desired sent free to all who write.

"THE PIXIES" ARE COMING

One Hundred and Fifty Young People in Opera, August 12th and 13th.

W. A. Milne, of Chicago, author of "The Pixies" and several other well-known operettas, is spending his vacation here and has been prevailed upon to prepare "The Pixies" with home talent under auspices of the St. Margaret's Guild. It will be given at the opera house here on Wednesday and Thursday nights, August 12 and 13, with a cast of over one hundred young ladies and children. Rehersals have been held daily for the past week under Mr. Milne's direction, assisted by Mrs. Raycraft. The best available talent has been secured, and it will be given in the same elaborate manner as in the large eastern cities where during the past fourteen years it has delighted thousands. It was recently given in Spokane, Tacoma, Seattle and Bellingham, and the western press has united with the east in pronouncing it "the most beautiful and laughable entertainment ever devised for amateurs."

Thirty boys in grotesque costuming will represent pixies, brownies, goblins, insects, picaninnies and monkeys; eight girls will be fairies, butterflies, flower girls and pages; twenty-four young ladies will give a very elaborate military drill and a Japanese specialty. Nearly a ton of special costuming and properties will be used, making this by far the most elaborate affair ever attempted here. A street parade in full costume will be given at 8:00 p. m. on Wednesday. It is funnier than a circus. Do not fail to see it.

THE STAR THEATER

The Star Theater, under the management of John Lord, is rapidly gaining in popularity, the clean shows with change of program three times each week being of a character that are appreciated by the most refined people. A special attraction this week in Mr. Bethel Boyd, eccentric singing and dancing comedian, adds not a little to the program. Over four hundred tickets were sold for the Parish Hall gymnasium benefit given last evening and the house was crowded at all performances.

SOMETHING FOR HEATED FANS

The "Ring Tail Snorters," Angeles heavy weight log rollers, of which James Gallagher is captain, Levi McDonnell manager, and Bert Carlisle high muck-a-muck, have been achieving an enviable reputation during the past few weeks as the swiftest aggregation on the turf, playing anything that can wield a club and winning everything in sight. At Dungeness Sunday they again added to their laurels by taking in the Comets on a score of 28 to 8, the worst drubbing yet administered. May their paths be strewn with—success.

STORE Box Suits are "Dummy" Suits—all right as long as resting quietly upon the "dummy" that doesn't move a muscle—all wrong when put on a live, moving, active man, for whom they were not made, and who quickly brings out every glaring defect.

For clothes that fit your form, follow every movement of your body, and retain perfect shape, have us take your measure and send it to Ed. V. Price & Co., famous as merchant tailors who make clothes to order exclusively.

Fabrics No. 4404 L, 4398 K, 4389 J, 4368 J, 4363 J, 4358 J, 4320 I, 4306 I, out of 500 magnificent patterns for Spring, and designs 486, 489, 490, 491, 493 from our new fashion plates, will be of service in helping you choose a nifty suit.

Made in either direct or modified style, a tailored-to-measure suit will cost you but $25 to $40 here, and it will embody high class workmanship, permanence of shape, and service value only found in clothes for which small tailors charge twice the money.

Try one and be convinced.
