OLYMPIC LEADER

VOL. 27 NO. 13 PORT ANGELES, WASHINGTON, FRIDAY, MARCH 31, 1911 PAGES 1 TO 10

Phelps Dry Goods Co's.

HATS! HATS!

Our milliner is making up beautiful new hats every day and will be glad to have you come in and look them over.

We also have a big line of the most Stylish Creations in Ladies', Misses' and Children's ready-to-wear Millinery.

SPRING SUITS

We already have in a splendid showing of Ladies' and Misses' suits, with new ones arriving every week. If you cannot be suited with what we have in stock, we will be glad to take your order from our sample books sent out by some of the very best eastern houses.

LADIES' WAISTS

It is a pleasure to show our beautiful line of waists, the largest assortment in the city. We have everything from the daintiest lingerie to the strictly tailored.

MIDDY BLOUSES

Just received, a splendid line of these popular blouses.

The Phelps Dry Goods Co.

A BIG MONTH AT TREASURER'S OFFICE

Receipts Over $4,000 More than Last Year. $150,000 in Banks of Clallam County.

Treasurer Babcock reports a bumper month's business for March, the total tax receipts up to the 28th being $115,761.99, while a year ago, for the entire month, the receipts were $4,000 less, or $111,605.93. Personal taxes for 1910 to the amount of $9,518.97 have been paid in. The personal tax accounts are now in the hands of Sheriff Gallagher and payment may be made at his office.

In response to a question as to how they were getting along with the work, Mr. Babcock said they had every book and every receipt up-to-date, "but that's a matter of politics," he added, "and I wouldn't want you to mention it." Its more than a matter of politics—its a matter of interest to every taxpayer to know that three men, all new to the job, in that office, are able to keep the work up, when the county has employed four men to do the work in the past. And its a matter of personal satisfaction to the publishers of the Olympic-Leader to know it has been vindicated in its contention that the county is not dependent upon any one man or set of men.

Instead of keeping the bulk of the county's funds in the vault and in Seattle banks, Mr. Babcock has the whole amount, $150,000, on deposit at 2 per cent in Clallam county banks A year ago there was only $30,000 in local banks. Not only does the county profit to the extent of the interest, but the people are also benefitted by this increase in working capital.

A big warrant call, one of the largest ever made in the county, will probably be published next week.

ITS C. L. BAKER & CO. NOW

C. L. Baker & Co. is the designation of the new firm succeeding H. Baker & Son, the change being one of ownership and not of management, Chester having been in charge since the retirement of his father, Herbert Baker, two or three years ago. The new firm will inaugurate an "Opening Sale" on the 8th of April, to continue one week, and will quote special low prices on a large line of goods. Watch for announcement.

FISHING TACKLE

We exhibit with great satisfaction and pride our new line of fishing tackle to our many friends who have grown into the habit of looking to us for everything new and practical in the tackle line.

Our experience as fishermen has taught us just what to buy for all kinds of fishing, and our experience in buying has taught us where to buy to get the right goods and at the right prices.

A new and complete line of Leaders and Flies, Lines, Poles, Special Reels, Salmon Eggs etc. direct from the makers, at saving prices.

COMMERCIAL CLUB OFFICERS SELECTED

Selection of A. J. Cosser for Secretary Meets Universal Approval. Expert Engaged to Handle Development League Convention.

The following officers of the Port Angeles Commercial Club have been elected: President, E. E. Seevers; Vice-President, G. M. Lauridsen; Treasurer, J. P. Christensen; Secretary, A. J. Cosser. The secretary's salary was fixed at $75 per month.

The Board of Directors have selected the following of their number as heads of committees:

Transportation, G. M. Lauridsen.
Public Affairs, E. E. Seevers.
Reception and Entertainment, T. S. Gorman.
Conventions and Public Meetings, R. D. Willson.
Industries, A. I. Filion.
Finances, S. J. Lutz.
Correspondence, J. P. Christensen.
Advertising, T. T. Aldwell.
Farming and Dairying, J. C. Hansen.

Each of these heads was authorized to organize committees of five or more from among the members of the Commercial Club, and submit same to the Board at its meeting to be held Friday night.

Upon motion of Mr. Aldwell, Mr. Wallace R. Struble of Portland, Oregon, was employed for one month at a salary of $150 and all expenses, to take charge of the big convention to be held in this city on the 21st and 22nd of April, for the organization of the Olympic Peninsula Development League. It is expected that Mr. Struble will be here about the first of the week.

Consideration of By-laws was taken up and drafts were submitted. Committees were given more time to bring in amended and revised drafts.

It is expected to call the Club together in general meeting in about one week.

Committee on permanent quarters reported that the Zerenner building on First street could be secured at $10 per month and the president and secretary were directed to enter into a lease at once with Mr. Zerrener for one year. Messrs. Lauridsen and Hansen were named a committee to secure the necessary furniture.

The Club will send visiting delegates soon to pay neighborly visits to Port Townsend, Irondale, Sequim, Dungeness and other points on the Peninsula. The following committee was elected to take the matter in hand and organize a large party to accompany the committee on the visit: John Cain, Mayor N. K. Mead, T. F. Trumbull, W. F. Delabarre, Morris Kerkes, Peter Grubb, E. E. Day, Wm. Ritchie, H. M. Fisher, W. B. Smith, E. E. Hopkins, F. A. Stiles, E. W. Merrill. By order of the Board of Directors and upon call of the secretary the members here named will meet Monday night at 8 o'clock, at the Club rooms on First street.

WILL PROVIDE REFUSE CANS

One of the most interesting and enjoyable meetings of the Reading Club this year was that of Friday last at the home of Mrs. Hugh Phelps. The subject of "Arts and Crafts in Washington" as presented by Mrs. Delabarre, was very instructive as well as entertaining.

The question of civic improvement for Port Angeles by the different ladies' clubs of the city was freely discussed and a motion was carried that this club would start the good work by installing on Front street suitable receptacles for holding paper and other rubbish.

We would like to see this matter taken up by other clubs of the city as there is such a great work to be done along these lines.

A representative of the Olympic-Leader having gone over Mr. Jensen's stock pretty thoroughly yesterday while assisting with the preparation of his Easter Sale adv, we personally know that all his new spring stock is included in the sale. When one buys a pair of Queen Quality shoes from Lot 2, for instance, she is getting a 1911 style at a saving of 45c the pair. Or, of course, if you can find a pair in Lot 1 that are satisfactory, and they were new goods last year, you save a still greater percentage.

E. D. Gatchett has bought out the Star Theater and the business will be conducted by his son Bud Gatchett. Mr. Guy intends to return upsound.

VICTORIA WILL HELP BOOST CONVENTION

Port Angeles and Peninsula Will Be Talk of Northwest During the Third Week of April.

Mayor Mead is in receipt of a number of replies from letters of invitation sent mayors and other public men of the Sound cities to attend the meeting of the Olympic Peninsula Development League to be held in Port Angeles April 21st and 22nd. The following extract from a letter received from Ernest McCaffey, Sec'y Vancouver Island Development League, is a sample of the words of encouragement being received.

"Your letter of March 20th to the Mayor of Victoria has been sent me for additional reply. I shall be very glad indeed to do anything in my power to help in your work. The League here will call attention of the newspapers of Victoria to the aims of your organization, and the time of your meeting. Your letter will also be forwarded to the Board of Trade here, for them to take action.

The people of Vancouver Island and Victoria extend their heartiest congratulations to the people of Port Angeles as to the initiation of this movement, and wish it every success possible."

STUMPING AT $50 PER ACRE

J. W. Brown, president of the Logged off Land Association of Washington, which organization has been making extensive experiments over a period of two years, in clearing land by various methods, reports that "they have found the average acre to contain 30 stumps, 31 inches in diameter, costing an average of $1.27 to blow out, or $38.10 per acre in powder and $10 per acre for caps, fuse and labor. The government agents working with us last year, in testing the 'char pit system,' were able to burn out below plow depth 100 stumps at an approximate cost of 30c per stump, averaging 30 inches in diameter."

VALUE OF IRRIGATION

Mr. Elves, in from the Blue Mountain district Wednesday, says that every rancher there is deeply interested in the new irrigation project, for its success means six or seven tons of hay per acre on their uplands instead of the average cut of 2½ they are making now. The former is the yield of the double crops at Sequim, six miles to the east on soil of a quality no better if as good as that in the Blue Mountain district. Expressed in dollars, at the average price of $18.00 paid right at the ranch, the buyer doing his own hauling, irrigation means an increase from $45 to $126 per acre.

FATHERLAND DIRECT TO ANGELES

A family of Germans by the name of Fey, consisting of two men, one woman and three children, friends of Nicholas Heushlein, corner of 12th and C, arrived Monday direct from the Fatherland, having been four week on the way. Surely, if Mr. Heushlein is able to bring a family across the ocean and the continent, just by means of a few photographs and truthful letters describing the climate and opportunities, we ought to be able to do something with the retiring merchants and farmers of the Middle West.

WHERE THEY DO HAVE RAIN

"The rainfall has been something tremendous this winter," said Judge McClinton in speaking of California Wednesday, just after the return of Mrs. McClinton and himself from their winter's sojourn in the south. "San Francisco has had the worst winter in 37 years. Water flowed thru the streets of San Jose four feet deep at one time," said the Judge. "Home seems pretty good after our long absence, for Port Angeles is hard to beat when it comes to climate."

PACKED 4,000 CASES CLAMS

Bugge Canning Co. Will Put Up Fruit this Fall, Starting Big Industry for Sequim Country.

The Bugge Canning Co. at Washington Harbor on Sequim Bay has just closed down after a successful season, having packed 4,000 cases. In addition to the pack, they have shipped 300,000 lbs. of fresh clams

Three brands are put up, the Minced Little Necks, Butter Clams, and Cockles, the latter having a chicken-like flavor. The product finds a ready sale at top-notch prices, as they are "clams that taste like clams." The Underwood clam, put up on the Atlantic, and on sale here in the Coast cities, is small, dried up, and the nectar is of poor quality. This, Mr. Bugge says, is true of all razor back clams, whether of the Atlantic or Puget Sound, while the clams along the Straits and ocean beach are hard and full-flavored.

The Indians at Sequim Bay often dig 500 bushels of clams in a single night. They have been digging for fifteen years, yet the number does not diminish. It is Mr. Bugge's belief that they come up out of deep water to spawn, and like the salmon, their cycle run, after spawning they die. Constant digging, stirring up the sand, purifies the clam beds so that there are no dark, foul spots and the young clams have a better chance to live.

Postmaster Harding is one of the first to start in the movement for a cleaner city, or, at least, for a cleaner postoffice, by providing waste paper baskets for the lobby of the office. It is now up to the people to use these receptacles and not throw the bits of paper on the floor.

ONE OF NATURE'S BEAUTY SPOTS

Few Hundred Dollars Invested in Rustic Shelters, Etc., Would Make Ideal Park.

Have you seen it? If you have not, it will pay you to go and see it. I mean the park at Cook's Prairie. The City Park. It should be called Lincoln Park. Its going to be a dandy. The city has spent one hundred dollars in improving it and it is fine. The work was done under instruction of the park committee, or Park Commissioners, they should be called. You must see it to realize what a beautiful place it will be or can be made; it is only a half hour's walk from the postoffice to the park. The work has been done on the south side of the prairie near the main road to the Elwha, and you can walk back to town from there in twenty five minutes easily.

If you love Nature in its beauty, its there. Now next Sunday take your best girl—yes, take your wife and babies and your lunch and spend a few hours there; you will feel all the better for your walk or ride. If you walk out go up to the hill to B street, cross the school block to C street, out C to 12th, out 12th to E and out E to 17th street, which takes you to the park. Go to the left around the lake until you come to where the work is done; sit under the shade of the trees, eat lunch, and let the children play in the lake.

By One Who Has Been There.

Say, now, send me those roses.

The Filion Lumber Co.'s shingle mill starts up the first of April with a full crew for the summer's run, and prosperity will again be rampant on the Heights.

The Leader Department Store.

Guaranteed to Fit Without Alteration

Don't buy a *ready-made* petticoat and then make it all over. You don't need to do that any more.

The old draw-string kind has been the only thing you could get till now. No change in the style of them for twenty-five years or more—and no suggestion of a fit. Always had to cut and fit them all over. But, times have changed. The

"Alain-Medea" Fitted Petticoat

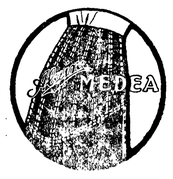
Here is a ready-made underskirt, *guaranteed to fit without alteration*—or you get your money back.

Look at the V-shaped Darts in the back, and you'll see why. Snug and trim as a glove all around. Look at the beautiful, girlish lines of the gown fitted over the "Alain-Medea."

Worth trying—isn't it? Especially when it costs you no more than the shapeless, bag-tied-at-the-top kind.

Demonstrated in Our Skirt Section

Come in and ask to see the "Alain-Medea"—this newest thing in petticoats—talked of in all the fashion magazines.



Demonstrators will show you the special features any time. "Alain-Medea" is made in all materials, from cotton to silk—and at all prices. Fit your new gown over one.

PRICES $1.25; $1.50; $1.75; $2.00

Minor Happenings of the Week

After an interview with the Czar it was announced that M. Stolypin had withdrawn his resignation as Premier.

A special gun and projectile to repulse aeroplane attacks has been manufactured by the U. S. government. The gun will be mounted at Sandy Hook.

By a vote of 31 to 10 the Illinois Senate passed a bill empowering women to vote for certain candidates for city, village and township offices and on questions of public policy.

The song of the meadow lark throughout California will not be stilled, for the bill branding it as a pest and urging its death met a speedy death in the Senate of that state.

Sunday work in postoffices thorughout the country is to be discontinued so far as is consistent with rapid transportation of the mails. It is not proposed to close important postoffices entirely.

According to police estimates made public, more than 10,000,000 people, the greatest assemblage in the world's history, will be gathered in London during the coronation week of King George V, in June.

The historic Lincoln car, in which Abraham Lincoln traveled and which carried his body to Springfield in 1865 for burial, was destroyed by a prairie fire that swept through a suburb of Minneapolis last week.

A quarterly dividend of $6 a share, compared with $7 a share three months ago, was paid Saturday by the Calumet & Hecla Mining Co. The disbursement makes a total of $114,850,000 paid in dividends to stockholders since the formation of the company.

Two million is the approximate Irish-born population of the United States. In 1900 there were exactly 1,619,449. Immigration for the last ten years has averaged 37,000. The population of Ireland in 1909 was 4,374,158. The population has steadily decreased for the last sixty years. In 1861 it was 5,798,967.

COLVILLE RESERVATION OPENING IS POSTPONED

Spokane, Wash., March 25.—United States Senator Miles Poindexter, who is in Spokane assisting a citizens' committee in making arrangements for Colonel Tehodore Roosevelt's visit here, April 7 to 9, has received official notice from Fred Dennett, Commissioner of the General Land Office, that the Colville Indian reservation (1,400,000 acres) will not be opened to settlement until 1913, or twelve months later than previously announced. The cause assigned is that the alloting agent cannot complete the Indian allotments for more than a year and the land office will require another year to arrange for the drawing. Replying to a petition presented through Mr. Poindexter on behalf of the people of Okanogan, Wash., that a new land district be established, with that city as headquarters, Mr. Dennett said that the opening of the reserve would occasion such action, but even then it would not be justified, as the public land in Northern Washington is fast disappearing through rapid settlement. This would indicate that Spokane will be the registry center in 1913.

SEATTLE MEN BACK OF OREGON ELECTRIC LINE

Canby, Or., March 25.—Work has been started on an electric railroad from this place to Molalla, some twenty miles east of here, with branch lines leading to Beaver Creek, Meadow Brook, Colton, Needy and Mackburg. Little is known concerning the road, other than Seattle capitalists are building it. A large tract of land two miles from here, on the Willamette river, has been purchased and will be used as a location for a power station. The road, which will be pushed to completion, it was stated, in six months, will give service to a rich agricultural district.

HILL PRAISES RECIPROCITY; NO CLOUDS ON HORIZON NOW

Washington, March 25.—"Sentiment for reciprocity with Canada is growing steadily," said James J. Hill, who was a caller at the White House today. "The subject is very little understood in this country as yet, but it will be in the near future. Business is good. There are no dark spots, no menace anywhere, so far as I can see."

Australia for Arbitration.

Melbourne, Australia, March 25.—Premier Fisher, in an interview on the arbitration proposals of President Taft and Sir Edward Grey, said the commonwealth ministry would give its utmost support to the arbitration movement.

Washington State News Items

H. L. Bowlby, who has been highway commissioner since August 1, 1909, has gone out of office, and is succeeded temporarily by W. R. White of Olympia.

The biennial convention of the Washington Association of the Deaf will be held at Seattle July 2 to 4. Preparations are under way to entertain the 150 to 200 who are expected to attend.

Seattle will have a municipal bathhouse at Alki Point for the coming summer. Plans and specifications have been approved by the park board and bids for construction will be advertised at once.

The Union Pacific has just issued an illustrated booklet on the subject of "The Empire of the West," in which Seattle and the Puget Sound country receive generous discussion. The book is on heavy enamel paper and contains 303 numbered pages.

Beginning May 1 the steamer Chippewa will replace the Sioux on the Seattle-Tacoma run, according to announcement made by the Puget Sound Navigation Co. After repairs the Sioux will operate between Seattle and Bellingham.

David R. Kern, president of Westminster College, Fulton, Mo., has accepted a call to the presidency of Whitworth College, Tacoma, providing $100,000 in cash is raised for the college. The trustees have $85,000 of it and are looking for the rest.

King Dykeman and R. W. Prigmore have been appointed Superior Court Judges of King county by Governor Hay. Their appointments are in accordance with a law passed by the last Legislature, giving King county two additional Superior Court Judges.

Mrs. J. D. Murphy, living at 1827 East Riverside avenue, is advocating a movement in Spokane that all owners of cats provide their pets with bells in the interest of preserving the birds of song, which are now coming back to their haunts for the summer.

Everett mail carriers serve 20,123 persons with mail every day, according to Postmaster Vernon's report. The government brings out the fact that to do this each carrier must deliver 951 pieces of mail, carry 80 pounds, and walk over 13 miles daily.

AMERICANS POSSIBLY EXCEEDED AUTHORITY

Washington, March 25.—The reported attack on United States soldiers at Presidio, Tex., by Mexican troops, because the former stopped the exportation of provisions to Mexico, has raised the question in the minds of officials here as to the possibility of the American officers having exceeded their authority in enforcing the neutrality laws.

The State Department holds that the shipment of provisions, and even arms and ammunition, traveling in the ordinary process of commerce, is legitimate.

The other departments of the government interested in the enforcement of the neutrality laws—Treasury, Justice and War—have been advised of the State Department's views in the matter.

TO PLANT BROOMCORN ON NON-IRRIGATED LANDS

Spokane, Wash., March 25.—More than 1,500 acres of non-irrigated lands in the Walla Walla valley, south of Spokane, and other parts of Eastern Washington will be planted to broomcorn this spring. The crop has been grown successfully in the Touchet, Gardena and Snake river districts and the product marketed at good figures. Gustav Meese, owner of a broom factory in Spokane, says an acre of land, properly cultivated, will produce 1,500 pounds of broomcorn, which, at the prevailing price of $90 a ton, means a gross production of about $65 an acre, or from 100 to 150 per cent more than the revenue from an acre of wheat.

Labor Temple for Spokane.

Spokane, Wash., March 25.—Four stories high, built of concrete, reinforced, and stone and covering a site 50 by 142 feet, will be the Labor Temple to be erected this year by the trades unions of Spokane at a cost of $60,000. The features of the structure will be a gymnasium, reading and lounging rooms, a plunge 30 by 100 feet, eleven halls with seating capacity ranging from 150 to 1,200, a large auditorium, twelve office suites and two store rooms.

Petrified Trees Reported Dynamited.

Los Angeles, Cal., March 27.—Under orders from Washington, G. W. Helm, chief of the field division of the United States Land Office here, has left immediately for the Petrified Forest National Reserve, in Northern Arizona, to investigate reports that vandals with dynamite have been destroying some of the finest specimens of the reserve.

Will Extend State-Aid Road.

Everett, March 25.—The Snohomish county commissioners will call for bids Monday on the construction of seven miles of highway from Silver lake to Bothel, as an extension of the state-aid road extending southward from Everett. The board finds that it has at its disposal $28,201 coming back from the state treasury.

MEXICAN CABINET RESIGNS--NEW ONE LITTLE BETTER, SAY INSURRECTOS

Mexico City, March 25.—Following a meeting of the Cabinet today every member of that body tendered his resignation to President Diaz. As yet none of the resignations has been accepted, but on excellent authority it is said that but two of them—possibly not more than one other—will be asked to remain in the portfolio. In diplomatic circles it is assumed that Diaz will insist upon Jose Yves Limantour remaining in charge of the Department of Finance.

Members of the Cabinet refuse to comment upon their action, but it is said that the united stand was taken, not by them, but by the President, who, it is believed, proposes to surround himself with younger men in the hope that such action will serve to unite all elements of the nation.

It is probable that the acceptance of the resignations will be coincident with the names of the new ministers.

Who will compose the new Cabinet is not known, but it may be said they will be men who have not taken a leading part in the government affairs. Neither will it include any who have been identified with the revolutionary movement instituted by Madero.

Included in the resignations was that of Ramon Corral, as Minister of the Interior, but not as Vice-President. It is reliably stated that the Vice-President will sail April 1 for Europe.

The announcement of the Cabinet changes has revived the rumor that Gen. Diaz has recalled Gen. Bernardo Reyes from Europe, but this could not be substantiated.

NEWS NO SURPRISE TO WASHINGTON ADMINISTRATION

Washington, March 25.—When Secretary Norton was informed by the Associated Press of the resignation of the Cabinet of President Diaz of Mexico he hurried to the White House to tell President Taft. The President was attending a musicale when he heard the news.

Senor De La Bara, the Mexican Ambassador, also informed unofficially, said he expected telegrams from his government concerning the resignations.

The resignation was not unexpected in Washington. The State Department has been receiving private advices that a change was being contemplated by President Diaz.

Ambassador Says Nothing.

The Mexican Ambassador nas admitted such a contingency existed in Mexico City, but has declined to comment on the situation as being an international affair. It is believed here, however, in the circles of both the insurrecto and federal sympathizers, that the resignation was a formal courtesy to those members who are to retire permanently, but that when the new Cabinet is decided upon it will contain some of its former members.

It was explained here that the resignation of Senor Corral, Vice-President of the republic, probably will be accepted for the post of Department of the Interior, and that his failing health probably would prevent his accepting the post in the new Cabinet. He will, however, remain Vice-President and the presiding officer of the Senate.

Corral and Creel Out.

Private advices here indicate that the resignations of Senor Corral from the post of Secretary of the Interior, Senor Molina as Secretary of Fomento (promotion of colonization and industry), and Senor Creel from the portfolio of Minister of Foreign Relations will be accepted. It had been believed that Senor Limantour might be relieved of the post of Minister of Finance and be made Minister of Foreign Affairs, but it was said this probably is an open question with President Diaz.

It was not believed probable that Senor Creel would leave the Cabinet, as it was said on good authority that he would be offered the portfolio of Minister of Fomento.

Opposition in Yucatan to Senor Molinas, as well as antipathy in Chihuahua to Senor Creel, are reasons ascribed in Mexican circles here to the changes to be made in the posts occupied by those men.

El Paso, Tex., March 26.—On intimations direct from San Francisco I. Madero, it is given out in insurrecto circles here today, that the selection of President Diaz's new cabinet so far as made public is regarded as entirely unfriendly to the reforms for which the Mexican insurrection is being waged, and as a consequence the war probably will go on uninterruptedly.

It is pointed out that among the men selected for the cabinet none is distinguished for any activity in the reform movement for which Madero is in arms. A rather pessimistic view is taken by the junta here, although hope for the institution of great reforms such as the removal of many of the governors of states and the division of extensive land holdings, has not entirely been abandoned.

The promise of Jose Yves Limantour of "an entire change of politics in Mexico," given to the revolutionary agents in New York, is still looked to by the insurrectos. Gonzales Garza, the insurgent secretary of state, who is in direct correspondence with Madero, the so-called revolutionary president, said today he did not believe the promise by Limantour referred only to a change in the cabinet.

Faith in Limantour.

Senor Limantour, by meeting the insurrecto heads and being quoted as saying their demand has some reasonable foundation is regarded as the chief friend of the insurrectos now in Mexico City. Whatever he does, the insurrectos assert, will be an effort to bring about peace as soon as possible. Yet it is known that Senor Limantour does not sympathize with the demands that Diaz shall retire and that any peace negotiations shall be conducted under an armed truce.

Senor Garza and other insurrecto leaders, therefore, give it as their belief that an immediate termination of the war is not probable.

It is said that the Maderos are merely going to San Antonio to be near the border. However, it is likely they will attempt to confer with the revolutionary president on the developments at Mexico City.

"IT HAD TO COME," MADERO'S COMMENT

New York, March 25.—"We have expected something like this all along," said Francisco Madero, father of the insurrecto general, tonight. "It had to come. There is no question that Limantour will remain in office, however, and it is probable he will construct the new Cabinet.

"Diaz probably will remain, but the insurrectos wish even more changes than in the Cabinet.

"Reform must go all the way back to the change of governors of some of the states. Some of these, by the way, have been in office even longer than the President has."

POINTERS ON PUMPING FOR LAND IMMIGRATION

Chicago, Ill., March 25.—Stephen O. Jayne, United States irrigation expert, stationed at Spokane, Wash., in a lengthy paper on pumping for irrigation, makes the following observations:

Water power by turbine wheels is first choice.

Electric power, when it can be obtained reasonably, is second choice.

A cord of seasoned fir or tamarack wood is about equal in fuel value to a ton of Rock Springs coal.

It requires about one pint of gasoline per horse power per hour in gasoline engines, and distillate probably about 30 per cent cheaper.

It requires at least a pound of coal per horse power per hour for the best steam engines obtainable, and about four and a half pounds per horse power per hour for common engines. I would add at least 50 per cent to these amounts of coal to make good in practice.

Centrifugal pumps are not recommended for lifts much over 100 feet.

Where centrifugal pumps are used, more power must be provided to do the same work than with plunger pumps.

Large pumping plants are proportionately more economical than small ones.

It requires 1.71 theoretical horse power to raise sufficient water 100 feet high (and other elevations in proportion) to cover 10 acres one foot deep in 80 days, and this theoretical power should be doubled to give satisfactory results in practice or, say, about three and a half horse power.

The cost of attendance and incidentals must be considered, bearing in mind that turbine water wheels and electric motors need but little attention.

PREPARING FOR EIGHT-HOUR WORKDAY FOR WOMEN

Spokane, Wash., March 25.—Eight hours for work, eight hours for sleep and eight hours for study and recreation, is the new order of things that may be worked out in the State of Washington when the woman's labor law becomes effective on June 9. The new regulation, adopted by the Legislature at its last session, provides that no woman or girl employed in mercantile establishment, office, laundry, hotel or restaurant shall be permitted to work more than eight hours a day. The penalty is a fine of from $10 to $100 for each violation. Several manufacturing plants in Spokane have already worked out plans by which the eight-hour day will go into effect early in April, thus giving employment to from 15 to 20 per cent more women than formerly. The laundry men are not satisfied and are preparing to make a test case. The eight-hour rule has been observed in business offices for several years, but the hotels and restaurants are working on a basis of 11 and 12 hours. Three thousand women in Spokane are affected by the change.

der the recent legislation of the State Legislature, permitting cities of 2,500 and more to adopt a commission form of government, Walla Walla is soon to try for the new municipal rule. Petitions for the special election to decide the matter are ready for circulation and will soon be given to the public for signing.

THE FISHERIES OF WASHINGTON

LATEST CENSUS REPORT PLACES STATE FOURTH IN VALUE OF PRODUCTS.

Total Catch Worth More Than Three and a Half Millions—Salmon Contributes Greater Portion, but Value of Halibut and Cod Fisheries Have Increased Very Rapidly.

Washington, D. C., March 27.—The State of Washington ranked fourth in 1908 in the extent of its fisheries, as measured by the value of their products, which amounted to a total of $3,513,000, according to the special census report on fisheries of the United States, which will be submitted to the Secretary of the Department of Commerce and Labor by Director Durand of the Bureau of the Census, for whom it was prepared by William M Steuart, chief statistician for manufactures. Among the Pacific Coast states, Washington ranked first in this respect, both at the present census and at the canvasses of 1899 and 1904, while at those of 1888, 1892 and 1895 it stood second.

The fishing grounds of Washington are divided into two districts, the Pacific ocean district, which comprises the Pacific ocean, Puget Sound and other inlets and all rivers except the Columbia flowing into the Pacific ocean, and the Columbia river district.

The number of persons employed in the fisheries of Washington in 1908 was 4,954. The capital invested in vessels and boats, outfits and apparatus of capture amounted to $3,441,000.

Salmon is the principal product of the Washington fisheries, both in quantity and in value; the catch in 1908 amounting to 54,312,000 pounds, valued at $1,571,000.

Double in Growth in Ten Years.

Washington fisheries have shown a steady growth, the value of their products having more than quadrupled during the twenty years between 1888 and 1908. The value of vessels and boats has increased steadily since 1888.

Of the total capital invested in the fisheries of Washington in 1908, 46 per cent, somewhat less than one-half, represented the value of vessels of all classes, both fishing and transporting; the value of fishing vessels alone forming 39 per cent, or not quite two-fifths.

Next to the value of vessels that of apparatus of capture was the largest item, amounting to 34 per cent, or about one-third of the total capital invested. By far the largest proportion, 68 per cent, or slightly more than two-thirds of the capital employed in the fisheries of the Columbia river, represented apparatus of capture.

The vessels engaged in fishing in 1908 comprised 85 steam and 22 sail vessels, with a combined tonnage of 3,991, and 11 unrigged craft; the value of all classes of vessels being $955,000. All the fishing vessels were used in the Pacific ocean district and none on the Columbia river. In addition to the vessels engaged in fishing, many barges and scows were used exclusively for transporting the catch.

The Capital Invested in Power Boats.

The number of power boats employed was 239 and their value $120,000, as compared with 63 boats all operated by gasoline and valued at $44,000 in 1904. Of the boats reported in 1908 some 152, valued at $62,000, were used on the Columbia river, and 87, valued at $57,000, in the other waters of the state. In contrast to this large increase in power boats there was a material decrease in the number and value of other boats reported, including both sail and row-boats.

The amount invested in apparatus of capture in 1908 was $1,162,000, as compared with $1,690,000 in 1904. This large decrease was caused to a great extent by the fact that gill nets are taking the place of pound and seine nets in salmon fishing. The investment in apparatus of capture is nearly equal for the two fisheries districts into which the state is divided, the Pacific ocean district representing $586,000 and the Columbia river $576,000. The value of the apparatus employed by the shore and boat fisheries, about $1,102,000, is greatly in excess of that reported for vessel fisheries. Of the latter amount $45,000 or slightly more than 75 per cent, represented the value of lines used for the cod and halibut catch. While the pound net is used more extensively for salmon fisheries on Puget Sound, the larger gill nets are found in the Columbia river fisheries. Fish wheels, of which 13 were reported in 1908, were in use only on the Columbia river and their catch was confined to salmon.

The total porducts of the Washington fisheries in 1908 amounted to 100,456,000 pounds, valued at $3,513,000, as compared with 88,955,000 pounds, valued at $2,973,000, in 1904, an increase of 11,502,000 pounds, or 13 per cent in quantity and $541,000, or 18 per cent, in value. The increase reported for halibut alone was very large, amounting to 18,086,000 pounds, valued at $879,000; but this increase was partially offset by the decreases reported for several other species, particularly for several varieties of salmon. For cod, herring and smelt there was a marked increase both in the quantity and value of the catch. The black bass, which was formerly caught in limited quantities, is reported to be entirely extinct, none having been taken for the past few seasons.

Halibut Led in Value of Catch.

Of the products of the Pacific ocean district fisheries salmon was the most important so far as the amount of the catch was concerned, contributing 44,297,000 pounds, or not quite one-half of the total catch of 89,305,000 pounds. The largest value, however, was reported for the halibut catch, which ranked second in quantity and represented somewhat more than one-third of the total catch and the total value. The lower average value of the salmon product resulted largely from the fact that the species of salmon for which the largest catch is reported was known as the "dog" or "chum," which is of comparatively little value.

Oysters rank next to salmon in value of product, while salted cod was also an important product from the standpoint both of quantity and value.

Practically the only important product of the Columbia river fisheries was salmon, which represented 90 per cent of the total catch and contributed 96 per cent of the total value of products reported for this river.

The halibut catch ranked second in importance as measured by value and was confined entirely to the ocean fisheries, its value representing 35 per cent of the total value of products and 41 per cent of the value of products reported for the Pacific ocean district. The value reported for oysters represented 10 per cent of the total in 1908. No other product contributed as much as 5 per cent of the total value of products.

The largest quantity of products was caught in Puget Sound, although the value of the ocean catch was greater by more than $60,000. This is due to the increased activity in its cod and halibut fisheries, which are ocean fisheries, and the decrease in the Puget Sound catch of the more valuable varieties of the salmon.

The halibut fisheries of Washington have increased faster than that of any other variety of sea-products, the catch of 1908 amounting to 30,072,000 pounds, valued at $1,236,000, an increase since 1904 of 149 per cent in quantity and 246 per cent in value. During the summer months the halibut fleet, which has recently been increased by the addition of a number of splendid steel vessels, operates off Cape Flattery, but as the winter approaches the smaller boats tie up for the season, while the larger ones go to Alaska, where the fishing grounds are better protected from storms.

POSTAL CLERKS FORBIDDEN TO JOIN LABOR UNION

Washington, March 26.—That the formation of lodges of a secret organization by postal clerks is regarded as inimical to the interests of the Government was communicated yesterday by Joseph Stewart, second assistant Postmaster-General, in a letter to Alexander Grant, general superintendent of the division of railway service.

"All clerks when they enter the service," wrote Mr. Stewart, "take an oath to well and faithfully discharge the duties of the office to which they are appointed and to perform all the duties assigned to them and to abstain from everything forbidden by the laws in relation to Postoffices and Postroads.

"It is incompatible with their obligation to the Department that they should assume another oath with a secret organization in the service which may at any time interfere with the obligations which they have assumed when entering the service."

Mr. Grant was directed to advise all railroad clerks as to the views concerning the matter held by the postoffice officials.

LAKE WASHINGTON CANAL CONTRACT IS AWARDED

Seattle, March 27.—That work upon the digging of the Lake Washington canal will begin by May 1 is assured by the award by Major C. W. Kutz, chief of the local United States engineering corps, on behalf of the state, to Holt & Jeffery of the contract for digging nearly one mile of the ditch.

The contract calls for the excavation of 4,600 lineal feet of the canal, beginning near the spillway at Fremont and extending toward Salmon bay.

The contractors must begin work by May 1 and are allowed until October 15 to finish the work.

Payment for the work will be made out of the $186,000 appropriated by the state legislature at its recent session, but Major Kutz will have entire charge. The canal will be seventy-five feet wide at the bottom and the width at the top will vary from 100 to 125 feet.

Thank Red Cross.

Washington, March 25.—The American National Red Cross has received the thanks of the Chinese government for its assistance to the starving people of that empire. The Red Cross has received contributions amounting to $37,000, of which $33,000 has already been sent.

California Passes Primary Bill.

Sacramento, Cal., March 25.—The Senate has passed a new direct primary bill nearly identical with the Oregon law. It now goes to the Governor.

AMERICAN LAND AND IRRIGATION EXPOSITION

Metropolis of America Holds Its First Land Show Next November

(Special Correspondence.)

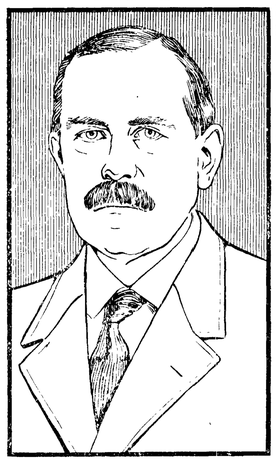
FOR the first time in its history the metropolis of America is to have a "land show," and no event scheduled for 1911 will be of greater interest to the Atlantic seaboard or of more importance to the entire country than the American Land and Irrigation exposition to be held in New York City Nov. 3 to 12.

Seven millions of people living on and near Manhattan Island are to

A. E. STILWELL, President American Land and Irrigation Exposition, Who Will Give Away a Florida Pecan Orchard.

have their first opportunity to witness an exhibit of the products and resources of the soil. Incredible as it may seem to the rural dweller, there are hundreds of thousands of citizens of New York and adjacent territory who know absolutely nothing of the agricultural resources of the states that support them nor of the opportunities for gaining a comfortable and independent livelihood from the soil. Here in the port of entry for a million immigrants yearly, a large percentage of whom are seeking land, there is and has been no exhibit of the agricultural wealth and possibilities of the nation to stimulate a stronger tide of labor and of capital toward the undeveloped land.

When this fact was brought to the attention of Arthur E. Stilwell, president of the Kansas City, Mexico and Orient railway and of the United States and Mexican Trust company, in his office in the Singer tower he quickly realized that a "land show" in



HOWARD ELLIOTT, President Northern Pacific Railway, Who Offers $500 Gold for Best Apples.

New York city would be eagerly welcomed by hundreds of thousands of its citizens anxious to learn of the agricultural resources of our country and to secure some knowledge of the opportunities to be found in tilling the soil.

Mr. Stilwell at once authorized his interviewer, Mr. Gilbert McClurg, who had directed the national irrigation congresses in Colorado and Utah, to organize the American Land and Irrigation exposition, to lease Madison Square Garden and to hold New York's first land show there in November of the present year.

This first New York land exposition is to be thoroughly representative of American agriculture as well as the most picturesque and instructive call of the land ever presented in the nation. Exhibitors will display their soil and its products or show maps and relief models of their holdings. Agriculture as it is generally practiced, dry farming and irrigation methods will be demonstrated. Moving pictures, illustrated lectures, literature, growers and agents will demonstrate the possibilities of American soils. In of the country, United States senators and congressmen, thirty governors of the most progressive states in the Union and well known agriculturists, educators and bankers. Among them are President McCrea of the Pennsylvania railroad, President Brown of the New York Central, President Miller of the Burlington, General Manager E. Dickinson of the Orient, United States Senators Francis E. Warren, Clarence D. Clark and Reed Smoot, ex-Governor Gillet of California, Governor Shafroth of Colorado, Governor Deneen of Illinois, Governor Carroll of Iowa, Governor Hadley of Missouri, Governor Foss of Massachusetts and the executives of other states, Cyrus Northrup, president of the University of Minnesota; George E. McLean, president of the Iowa State University; Benjamin Ide Wheeler, president fact, the exposition will perfectly illustrate that from the land comes all permanent wealth and that life on the land affords the greatest measure of independence.

Big Men Encourage Agriculture.

President Stilwell has secured for the exposition a thoroughly representative advisory and governing board. It is made up of the presidents of twelve of the great railway systems

SIR THOMAS G. SHAUGHNESSY, President Canadian Pacific Railway, Donor of $1,000 Gold Wheat Prize.

of the University of California, and the presidents of the agricultural colleges of Mississippi, South Carolina, Kansas, Utah and Iowa.

James J. Hill of the Great Northern, Sir Thomas Shaughnessy of the Canadian Pacific, Howard Elliott of the Burlington and President Earling of the Chicago, Milwaukee and St. Paul, were quick to approve of the exposition by donating valuable prizes and taking exhibition space in Madison Square Garden for their roads. These men appreciate the opportunity offered by the exposition for exploiting the productivity of the soil along their lines in this center of millions of men and millions of money.

Gilbert McClurg, general manager of the exposition, with offices in the Singer building, 149 Broadway, New York city, is now in correspondence with soil and crop experts and exhibitors all over the country. Secretary Wilson of the United States department of agriculture has agreed

HORACE O. HAVEMEYER of New York City, Who Offers $1,000 Prize Cup for Best Sugar Beets.

that his department shall send an educational exhibit to the exposition, and Canada's agriculture and horticulture will be well represented. Mexico also is planning to make an exhibit of its agricultural products. Exhibits will be made by farmers and orchardists, by a majority of the states, by leading railroads, by boards of trade and by chambers of commerce.

Valuable Prizes.

The prizes to be awarded to exhibitors at this exhibition constitute a galaxy of the handsomest trophies ever contested for in the history of American agriculture and are attracting the attention of crop experts in every state.

For the best one hundred pounds of wheat grown in the United States and shown at this exposition a prize cup valued at $1,000 has been donated by Mr. James J. Hill of the Great Northern railway.

For the best one hundred pounds of

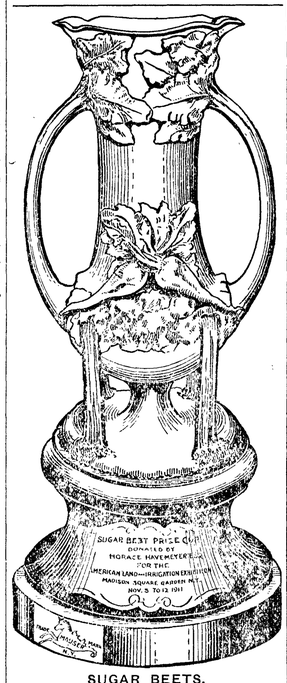
BARLEY.
$1,000 Prize Cup for Best Barley, Offered by Gustave Pabst.

hard red spring or winter wheat grown in the United States a prize cup valued at $1,000 has been donated by the International Harvester company.

For the best cotton giving the largest yield per acre a prize cup valued at $1,000 has been donated by Colonel Robert M. Thompson of New York.

For the best sugar beets produced in the United States Mr. Horace Havemeyer has donated a magnificent cup valued at $1,000.

For the best twenty-five boxes of apples of any variety or varieties grown anywhere in the world Mr. Howard Elliott, president of the Nor-



SUGAR BEETS.
$1,000 Prize Cup for Best Sugar Beets, Offered by Horace O. Havemeyer.

thern Pacific, has donated $500 in gold.

For the best barley grown in the United States a cup valued at $1,500 has been donated by Colonel Gustav Pabst of Milwaukee, who will purchase at fancy price the entire barley crop from the farmer winning the prize.

For the best hops grown in the United States a cup valued at $1,000 has been donated by Mr. Adolphus Busch of St. Louis.

For the best oats grown anywhere in the United States a cup valued at $1,000 has been donated by President A. J. Earling of the Chicago, Milwaukee and St. Paul railway.

For the best potatoes grown anywhere in North America President Stilwell offers a $1,000 prize cup.

Negotiations are being carried on by Manager McClurg for similar handsome prizes for the best alfalfa, rice and other products of the field and orchard.

It is expected that this will be the largest and best land show in point of attendance ever held in America. No land show ever held in the world acres of grain land in Montana donated by President Elliott of the Northern Pacific railway; ten acres of irrigated land near Roswell, New Mexico, given by the Western Irrigated Land will have been given in the center of so many millions of people. More than half the entire population of the nation is within a night's or a day's ride of New York city, and to these the exposition of the productivity and riches of the American soil will make direct appeal.

A compelling magnet will be the giving away daily to visitors by popular allotment of a farm, orchard, irrigated tract or grain land in various parts of the United States. Free gifts of this kind have never been offered in New York or the east, and this will prove a great attraction.

Among the prize allotments are 160

WHEAT.
Hill Wheat Trophy, Valued at $1,000, for Best Wheat Grown in United States.

and Orchard company of New York city, and a fine five-acre pecan orchard at Tallahassee, Fla., donated by President Stilwell of the Florida Pecan Endowment company.

The American Land and Irrigation exposition will be attuned to voice the cry of "Back to the soil—the land—the home!" It will give illustrated information to the home seeker, the farmer, the railroad man, the investor, the student and to town and city dwellers regarding the development and colonization of the beckoning lands of the middle and far west, the south and our eastern states.

It will put the man on the place; it will show the tillers of worn out land how to rejuvenate their farms or where best to seek and find richer, virgin soil; it will turn tired city toilers to green fields and the song of the thrush; it will point the way for the immigrant and direct "the landless man to the manless land."

TERMS OF AWARD FOR WHEAT TROPHY

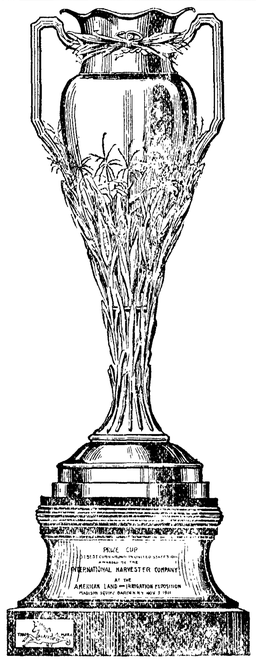
The handsome gifts for prize wheat to be awarded at the coming national land show undoubtedly will bring together the finest and greatest collection of wheat ever shown at any fair in the world.

Much interest has already been aroused in Canada by the announcement made by the Canadian Pacific railway that Sir Thomas G. Shaughnessy, its president, has offered $1,000 in gold for the best hundred pounds of hard red spring or winter wheat grown anywhere in the two Americas.

"For Canada to win this prize of $1,000 in gold," writes Mr. J. S. Dennes, president of the Canadian Pacific Irrigation Colonization company, "will mean that we are still mistress of wheat; it will mean honor and glory to the farmer individually and $1,000 in his pocket. It will mean that both Canada and the farmer who carries off the coveted prize will receive such advertising as would be hard to secure in any other way. The particular district where the wheat is grown, and the man who produced it will become famous. Land values in his district will increase as a consequence, and, to sum up, the winning of this prize will induce settlement all over the Dominion. Canada cannot afford to lose."

The wheat growing farmers of the United States will have the advantage over their Canadian brothers in that while the Canadian farmers may only compete for the $1,000 prize in gold, the United States farmers may enter the contest for this gold award and also for the Hill trophy.

Mr. James J. Hill's $1,000 prize cup for the best bushel of wheat grown in the United States in 1911 can be



CORN.
International Harvester Corn Trophy, to Be Awarded for the Best Corn Grown in the United States.

won by the exhibitor whose grain gives the largest yield per acre, has the best general appearance and weight and is truest to variety and type.

Mr. Hill requires further that the wheat placed in competition for his cup must be exhibited by the actual grower. The grower must be prepared to make affidavit as to the method of preparation of the land for the wheat, crops grown on the land for three years previous, date and method of sowing, amount of seed used and the date of harvesting.

These terms make it possible for any expert grower of wheat in any section of the country to compete for this handsome prize at the American Land and Irrigation exposition to be held in Madison Square Garden, Nov. 3 to 12, 1911.

The judges appointed to award these prizes will be selected from agricultural colleges and experiment stations. It is probable that some of the judges will be selected from experts in the department of agriculture at Washington.

Bagdad From a Distance.

Those of us who can think of Bagdad only as the magnificent city of Haroun-al-Raschid can hardly be expected to welcome the new international railway scheme. Let Bagdad remain forever inaccessible, except in dreams. But should the worst happen to Bagdad and the tomb of Zobeide become the shrine of British tourists the old city will have to undergo a few repairs. For it is safe from neither plague nor flood. In one of the disasters of the last century the plague carried off 4,000 people daily for many days, and jealous Tigris overflowed its banks and destroyed several thousand houses and drowned 15,000 people. Like most Oriental cities, Bagdad looks her best from a distance. You miss the filthy, narrow streets, where two horses can hardly walk abreast, and behold a vision of luxuriant date groves, out of which rise little islands of green domes and graceful minarets. In the days of its splendor the East India company maintained in the ancient city of the Caliphs a resident, with a generous establishment; nowadays the British are content with the usual modest consular service.

WALKED BACK.

Friend—How long were you out on the road?"

Ham—Six months. One going out and five getting back."

CIGARETTES FLOURISH

STATISTICS SHOW ALARMING INCREASE IN USE OF "PILL."

Efforts of Anti-Cigarette Forces In 1910 Balked by Increase of 1,856,487,308 Cigarettes in Country's Output.

New York.—Like a tack in a taxicab tire comes the news that the efforts of the anti-cigarette forces had no other result in 1910 than to increase the output of cigarettes in this country by some 1,856,478,308 of the little cousins of my Lady Nicotine.

Except to freshmen and sophomores of "frats," where pipes are frowned upon, the idea of one billion, eight hundred and fifty-six million, four hundred and eighty-seven thousand, three hundred and eight cigarettes is a mere mythoplastic figure, flexed to fit the fancy of the mathematical mind. For the benefit of all citizens not included in the foregoing these statistics are furnished. Taking the average length of an honest cigarette at two and one-half inches, the increase for 1910, if placed end to end, would make a string 73,403 miles in length. This would be sufficient to build an unbroken line of cigarettes around the world, and then third track the system. These, be it understood, are cigarettes of American make, from the native straight cuts of Virginia to the actual and only "pills" smoked by the sultan, and made somewhere down in Greenwich street.

No one in the trade know why there has been an increase. Probably boys who read novels have more money, says one. That the increase is due to the fact that hotels provide smoking rooms for women is denied. Dealers do point to the increase in the enrollment at the larger schools and colleges as a possible factor.

BULL TERRIER FIGHTS BULL

After a Furious Battle Both Succumb to Wounds, but the Bull Dies First.

New York.—A fight to the death between a thoroughbred English bull terrier and a Holstein bull took place at the stock farm of Eben Grover, at New Durham, N. J. The dog was a perfect specimen of the breed and was valued at $750. It took a dislike to the bull, a $1,500 animal, immediately after the latter was brought to the farm. The other night the bull was placed in a large box stall. When an employee opened the door the dog slipped in and in two seconds the battle was on.

The dog whirled about the stall with lightning speed, leaping at the bull's throat with snapping teeth. Twice the dog was pinned against the wall of the stall by the horns of the brute, but finally by a quick spring sank its teeth in the throat of the bull. The great animal, roaring with pain, swung the little dog about and dashed its body against the walls, but it would not let go.

The battle had raged for an hour and Grover, with his sons, had entered the stall twice at the peril of their lives when the huge bull sank to his knees and toppled over dead. The dog, loosening its hold for the first time, limped into a corner of the stall and died within a few minutes. Grover's right leg was badly torn by the dog's teeth.

A SAVINGS BANK ON WHEELS

Paterson, N. J., Has Novelty In Shape of Auto Bank, Fire, Bullet and Burglar Proof.

Paterson, N. J.—The city of Paterson now has a bank on wheels. It is fire-proof, bullet-proof and burglar-proof, and can travel 50 miles an hour when being chased by would-be looters. This auto-bank is expected to revolutionize the banking business, especially in the outlying districts.

The car is fitted up with desks and compartments for books, checks and papers. A solid steel safe is in one corner of the machine. A small window guarded with heavy steel and brass bars and a liberal supply of firearms, afford the clerks protection from "hold-up" men.

Officers of the trust company are of the opinion that the sending of the "bank" through the country will be welcomed by depositors, especially those who have no place for keeping cash or other valuables in their homes or business places.

Church Fosters Love-Making.

St. Louis.—A big club parlor with easy chairs and cozy corners, advantageous shadows, a gas log and chimney hearth, are the agents with which the Rev. J. B. Toomay, pastor of the Fountain Park Congregational church, will stimulate social activities among folks of his community. The club will be in the basement of the church, and there will be no chaperons, overseers or restrictions and prohibitions.

"The young people of my congregation are presumed to conduct themselves properly," said Dr. Toomay. "Love-making is natural and proper. I expect the young folks to act properly."

Joke Lands Him In Jail.

Sioux Falls, S. D.—As the result of a practical joke a barber living at Artesian has been arrested on a charge of disorderly conduct because he partially shaved the head of a resident of the town, the complaining witness against the barber being the wife of the individual thus decorated.

FRIDAY, MARCH 31, 1911

BLOWING ITS OWN BUGLE

"It is blowing its own bugle. It is lustily tooting the trumpet of publicity. The county has some attractive resources and is seeing to it that the rest of the world is kept informed as to what is going on and what the soils can do," says the Seattle Times in reference to the advertising of an eastern county. "In an era when publicity has advanced to the stage of an art and a science this is the correct method. If a business man in these days has any thing to sell, he advertises; if a community wishes to attract homeseekers the thing to do is to portray, attractively and convincingly, the resources of county or state.

A DEBATABLE QUESTION

President Taft's Canadian reciprocity treaty does not reciprocate, according to those who have examined the bill which has caused the calling of a special session of congress, says the Skagit Courier. It is declared that the Pacinc Northwest will suffer in particular because of discriminations against the timber, fruit, wheat, coal and fishing industries. Real reciprocity or some form of free trade between the United State and Canada, might help both countries, but the present measure is all onesided, in favor of the Canadians.

FOR A CLEANER CITY

As soon as the spring house cleaning is over the ladies of Port Angeles will no doubt organize a campaign for a cleaner city, and a brigade to wield shovels, rakes and brooms to fight for "spotless city" will be inaugurated. The ladies of Angeles, chaperoned by the Civic Club, have accomplished much in the past along these lines and can be depended upon to talk and work for a cleaner town in the future.

The Commercial Club at Sultan has employed a competent man to take a correct census of that town; Port Angeles might do likewise with no little satisfaction to all concerned. We know of families where there are small children who have not been enumerated so far as any member thereof knows.

Nice thing to live in a hustling little city where any piece of property you buy is soon worth more than you paid for it; but such a community means that the boosters must all pull together.—Skagit Courier.

The tug Lorne, on her way from Victoria to Port Angeles, picked up the first body that has been found from the wreck of the Sechelt which turned turtle off Beecher Bay near Race Rocks on Friday last.

A GRAND DISCOURSE

Rev. Richardson of Nassua, N. H., gave a grand discourse Sunday morning at the Congregational church. Those who failed to hear him missed a rare treat. The discourse was based on the words found in Revelations, second chapter, eighth and a part of the tenth verse: "And unto the angel of the church of Smyrna write; These things saith the first and the last, which was dead and is alive; Fear none of those things which thou shalt suffer."

The eloquent speaker stepped forward on the platform and gave a vivid and beautiful word painting of the city of Smyrna, its narrow streets, quaint roof tiled buildings, its mosques and churches, its clusters of dark cypress trees, its mountains in the background with their old castles, the expansive bay in front, dotted with the flags and ships of all nations, that was grand and inspiring in the extreme and commanded the closest attention.

Stepping back to the pulpit, Dr. Richardson called special attention to these words, "Fear none of those things which thou shalt suffer." Rather, we should enjoy the blessings a just God has given us. Enjoy the fresh pure air, the mountains, and beautiful nature everywhere; enjoy our families, or friends, our churches, our christianity, our homes, and "fear none of those things which thou shalt suffer." He had known men who all their lives had been miserable because they feared some dread disease, and finally passed to the beyond peacefully of old age among their friends. Health, a cheerful disposition and love for one's Maker are very nearly related. When our minds are attuned to that which is beautiful in nature, we are much more likely to be healthful, joyful and right minded than when we brood over ills that are largely imaginary. It is quite possible for the man to triumph over bodily ills, and it is a duty we owe to ourselves and to those with whom we associate to see this is the case.

On Sunday evening Doctor Richardson gave a very interesting talk on his trip around the world, from which he is just returning. It was not only entertaining, but instructive as well and was listened to with great pleasure by his audience.

Dr. and Mrs. Richardson left on Monday for Seattle where they expect to make a short visit before returning to their far eastern home.

PORT ANGELES PUBLICITY.

From E. B. Webster, of the Port Angeles Olympic-Leader, comes a welcome communication, outlining the campaign of publicity which the Straits City is now entering upon, under the management of Tom Richardson, an advertising man of much prominence. As the Megaphone is pretty well filled with an article from the Olympic-Leader this week, the later account from Webster must go over till next week. The Megaphone is, nevertheless, pleased to receive the letter and will ever stand ready to assist in boosting every portion of the Olympic peninsula.

The P. S. Navigation Co. will have built for the Seattle-Tacoma run one of the fastest steamers afloat, having a speed of 25 knots, thus rivalling the Luisitania. It will be a turbine steamer, 250 feet long, will be named the Tacoma and will be ready by May, 1912.

TALKS ON ADVERTISING, NO.1

"In talking to the people about Los Angeles" said G. M. Lauridsen at the Brotherhood meeting Monday evening, "I found many of them were retired farmers from the Middle West They had come to California to spend two or three months during the winter and after one or two visits they had come west to live. It is pleasant at Los Angeles in the winter, tho the weather is no better than here at Port Angeles, but for an all-year-round climate the southern city simply isn't in it with our own town. There ought to be some way," continued Mr. Lauridsen, "to get those people coming this way. We should advertise in the Middle West."

Experience is the best teacher. One can never be brought to realize the truth until he learns it for himself. Mr. Lauridsen has learned for himself one of the facts concerning immigration that the Olympic-Leader has published time and time again—until we grew weary of the task. And it is fortunate, now that Port Angeles is to engage in an advertising campaign in which Mr. Lauridsen will be a leading spirit, that he has learned at first hand the real truth.

Our commercial clubs and real estate men have, since the days of Colonel Coolican—for the Colonel put out the only real advertising the town has ever had—been talking timber resources and future railroad terminals. Such advertising is all right as far as it goes. But it appeals chiefly to that class of investors who gamble on the growth of towns.

Meanwhile the towns of California and Oregon have been advertising climate. They have been telling why life in the West is preferable. There are a hundred reasons why the retiring farmer should come to Port Angeles to spend his remaining years, as against one—the tie of friendship and old associations—for remaining in the East.

This western movement has been in progress for twenty years. Iowa was settled up within the lifetime of the present generation. The farmers have become wealthy. Their sons have taken over the farm and the old folks have moved to town. If there were several sons, the older boys have gone west, the only thing there was to do, and in many instances the old folks have followed. In every town of any size in southern California there is not merely one—there are several families from our home county now. We had subscribers to the Republican, the paper we published in Iowa, scattered all thru the Coast states. And this western movement has never ceased, as those former residents of the Middle West who still read their old home papers well know.

Today, when you talk to a man of an advertising campaign, his first question is "What are you going to do with people when you get them here? We have no factories and no farms they can rent."

These Iowa towns averaging 3,000 to 5,000 population have been largely built up by retiring farmers. They have pure water, and it costs four dollars a year for an eight room house. They have sewers, electric lights and extensive telephone systems, macadamized streets flanked with rows of magnificent maples, cement walks everywhere, libraries fine public buildings, business blocks, modern residences—and low taxation. Each one of them is a City Beautiful. But they also have an Iowa summer and an Iowa winter.

The question is not what are we going to do with these people. is not so much how we are to reach them with advertising matter.

The question is rather how can we best improve our town so it will attract rather than repel when we do get them. So far as endeavoring to attract the attention of these people is concerned, Port Angeles has been dead to the world. Occasionally, in fact every year, one or more families of retired farmers or business men have located in Port Angeles. But most of the people who have come have been those who must work for a living—many of these have been forced to leave here.

The great big problem is civic improvement. There i sa strong sentiment in favor of assessment districts; there should be a new high school building, a court house and there should be a highway from the Jefferson county line to La Push on the Pacific

Prosperity will not depend upon getting new families located here so much as upon taking advantage of our own neglected opportunities.

Mr. and Mrs. E. G. Preisach and two children of Pittsburg are expected on tomorrow's boat for a visit at the home of Mrs. Preisach's sister, Mrs. B E. Woods. If the family like the looks of our city they will locate here.

HOUSE CLEANING TIME

IS here and you will want new rugs and matting. Come in and make your selections.

This is a good time to add a new piece of of furniture to the home. See our splendid assortment of Rockers; the Mission, either plain or leather upholstered, different styles of willows and many comfortable little sewing chairs.

How about a new Dining Set or Buffet? Our Crockery Department is the most complete in the city, and includes many beautiful designs in fine china also a good variety of plain Haviland.

Notice of Hearing.

Notice is hereby given that the Olympic Power Company, by Thos. T. Aldwell, its Vice-President and Manager, has made application to the Board of County Commissioners of Clallam County, Washington, for a

FRANCHISE

for certain rights and privileges to construct, maintain and operate its Transmission lines for the transmission of electric energy, power, heat, and light over certain county roads and highways, as more fully described below, to-wit:

Commencing at the county road at Aldwell's canyon on the Elwha river in section 15, T. 30 N., R. 7 West, thence on said road in a northeasterly direction along the Elwha canyon road to the section line between sections 11 and 14, thence easterly along said road running along the section line to the ¼ section corner between section 11 and 14, thence northerly along the county road through the center of section 11 to the Port Crescent and Port Angeles road, thence in an easterly direction along the said Port Crescent and Port Angeles road, including all its winds and angles to the Townsite of Port Angeles.

Thence commencing at the eastern extremity of Front street of the Townsite of Port Angeles and the intersection with the Sequim and Port Angeles road, also known as the Burlingame road, in section 12, T. 30 N., R. 6 West, thence along said road in an easterly direction following the said main road, including all its winds and angles, to the village of Sequim, thence along the County road known as the Burlingame road in a southeasterly direction, including all its winds and angles to the junction of the said road with the Jefferson county road at the eastern extremity of the county.

Also commencing at a point on the main county road in the village of Sequim, thence in a northerly direction along the main county road known as the Sequim and Dungeness road to the village of Dungeness, thence from a point at the intersection with the Dungeness and Sequim road with the Port Williams road to the Boat Landing at Port Williams.

Also commencing at a point on the county road at the Boat Landing at Port Williams, thence in a southwesterly direction along the Port Williams and Sequim road, including all its winds and angles to the village of Sequim to the ¼ section corner between sections 19 and 20, T. 30 N., R. 3 West W. M., the same being at a point on the main county road.

Also commencing at a point on the Port Angeles and Sequim road at the intersection with the L. H. Cays road on the section line between sections 4 and 9, T. 30 N., 4 West, thence in a northerly direction along said road, including al of its winds and angles, to its connection with Road No. 58, thence along Road No. 58, including all of its winds and angles to the village of Dungeness, thence in a southerly direction following the county road known as the River road including all its winds and angles, to a point on the Sequim and Port Angeles road in section 12, T.30 N., 4 West.

Also commencing on the Sequim and Port Angeles Road at a point on the Township line on the east boundary o Section 13, T. 30, N., 4 West, thence along the County Road on said Township line running south to the corner of Sections 13, 24, 19 and 30, thence east along said County Road to the ¼ corner between Sections 18 and 19, thence south along the county road in the center of Section 19 to the legal center of Section 19, thence east on the county road to the ¼ corner between Sections 19 and 20 in the Village of Sequim, including all stub roads and public lanes leading from and to the roads herein described

Said application having been made in accordance with a draft of a franchise filed with the county auditor of said county, and the board after considering the application and the reasons for the granting of the same and in the interests of the general public, voted to set a time for hearing said application on Wednesday April 5th 1911, at 10 o'clock A. M. at which time any person will have opportunity to show cause, if any, why said application should not be granted.

Witness my hand and seal this 8th day of March, 1911.

R. D. McLAUGHLIN,
County Auditor.

Noticeof Hearing Petition for Appointment of Guardian.

In the Superior Court for the State of Washington, of Clallam County.
In the matter of the guardianship of Emma S. and Vernon Jackson.

Emma Breckenridge, having duly filed her petition in this court alleging that Emma S. Jackson and Vernon Jackson are minors residing in the county of Clay, State of Kansas, and having property in this, the county of Clallam, State of Washington, that needs the care and attention of someone; and that she and the said minors have duly petitioned this court that she be appointed such guardian. This court has made and entered an order setting Saturday, the 15th day of April, 1911, at the court room at the court house in said county at ten o'clock A. M. of said day as the time and place for the hearing of the petition.

All parties interested are hereby notified to appear at said time and place to show cause, if any there be, why a guardian should not be appointed for the estate of said minor children.

HORACE WHITE,
County Clerk.

BOOSTER SALE

The TIMES CLOTHING MART is boosting and doing all in its power to build up Port Angeles and Clallam County, and has concluded that one of the best ways to build up the town is to give the public a greater value for their money than they have ever had before, and especially look after out of town buyers that they get more for their money than they could at home.

The Doings of Our Neighbors

SEQUIM

The ladies of the W.R.C. will give a dance in the G.A. R. Hall May Day, A supper will be served.

Mrs. Launsberry drew the prize,a dress pattern, at the Webster millinrey opening.

Quite a number of strangers are here looking for homes in this beautiful land of sunshine and flowers.

John Lawrenson is building a fine home on his ranch in Happy valley.

George O'Brien came back from Clallam Bay Sunday where he had been on business.

It is announced that the Angeles band will give a dance in the opera house saturday evening, April 1st, following a fine musical program.

It seems strange that some people are so thoughtless as to tie their horses across a side walk to a fence and compel people to go out into the street to get around the wagon, yet that was an actual occurrence on Sequim the other day.

BLYN.

Mrs F. Curry went back to her home in Port Townsend last Wednesday, after a week's visit among friends here. Mrs. F. Craig went with her and from there she will take a steamer for Seattle where she expects to remain for a few days.

Mrs. Ed. Rulson is in Seattle for an operation. It is the wish of all her friends here that she will have a speedy recovery and soon be back home again.

Mrs. Burrows is also in Seattle under treatment.

Ed. Zachan came back from Everett last Saturday but left again for Port Townsend Tuesday, as he is still unable to return to his work here.

Milo Avery made a flying trip to Port Townsend last week to have some dental work done.

Mr. Manuel Silva is here making more improvements on his ranch. He has one of his boys with him whom he is sending to school here.

The camp is going to move their donkeys back in by Mr. Delaney's place by the end of the week, as they have about finished where they are now working.

BLUE MOUNTAIN

Our school closed Friday, March 16th, with appropriate exercises which reflected great credit upon the teacher. The next day the children were pleasantly entertained by Miss Reeve, at the home of her mother, with music and games and after a dainty luncheon all took reluctant leave of their beloved hostess.

A goodly number responded to our call and The Blue Mountain Social Club was organized with about forty charter members. Chas. Lewis was elected president and Sam Emery secretary and treasurer. After the business of the evening, the time was spent in dancing.

Alfred Stevenson and sisters from Elwha came out to be with us, as were also, Mr. and Mrs. John Winters, Messrs. Sutter, Chamber, O'Brien, Jas. Jacobs and Edwin Champion of Fair View. Saturday, April 1st, we will meet again.

Mr. Jas Elves has started out on his assessment duties and all may rest assured of a just assessment.

Mr. Fries is making the stumps fly with dynamite and will soon have quite a patch of ground cleared. That shows what one man can do if he wills.

Material has been sent for and next Sunday a Sunday School will be organized at the Blue Mountain schoolhouse. All are invited to join us.

We hear that Omar Meyers has sold his home and will move with his family to Oregon, in June.

Mrs. Emery and Cecil are spending the week in town.

FAIR-VIEW

Mr. Nelson Cook of Vancouver surprised some of his old time comrades by dropping in on them the first of last week. It has been many years since he went away but they all knew him immediately. He returned home last Monday.

Mrs. James Page went up sound on Monday's boat to visit Mr. Page's people who live there.

Mr. Henry Bradshaw, who has just returned form his visit to Texas and Tennessee, was out to see his sister, Mrs. Oscar Winter.

Mr. J. B. Davis spent the first part of the week in town visiting with Mr. and Mrs. Seevers.

Mr. and Mrs. Jack Pike spent Sunday at the home of Wm. O'Brien.

Mrs. Sutter and Nellie and Baby Sutter went to town Saturday to spend the night with Mr. and Mrs. Shank. They came home Sunday.

Mrs. C. Raymond and Mrs. Kelly of Eden Valley came out to Willis Chambers Monday evening and on Tuesday morning went on to Sequim.

Several of the Fairviewans took in the dance at Blue Mountain last Saturday. All reported a good time.

A few days ago the sun shone bright,
And the air was nice and warm,
We hardly thought the weather man,
Would allow a gloomy morn.
But the air is now crisp and chilly,
Makes us huddle round the stoves.
The fog is heavy over head,
And mosquitoes attack in droves.

Mr. Fosset and family will soon be settled in their new home.

Jim Jacobs went out to the Elwha last Saturday.

Jack Pike was a Sequim visitor first of the week.

Mr. and Mrs. Sutter spent Sunday afternoon at Hile Jacobs.

T. A. Allen was home a few days fixing fences, etc.

Miss Danz of Ridgeview spent the first part of the week with Mrs. Lottie Winters.

Rowan Luke is home helping "Dad" put in the spring crops, and to help drive that "boss" around and around the potato patch.

Jack Kilmer bought his seed potatoes of Daniel Boone Jackson.

Mrs. Oscar Winters is spending a few days at the Elwha with her mother, Mrs. Bradshaw.

Mrs. Brower of Blue Mountain is staying with Mrs. Chambers this week.

Some precious ones are gone,
And certain squeals are stilled,
A pen is vacant in Fairview,
O'Brien's porkers are killed.

DUNGENESS

MILLINERY DISPLAY AT DUNGENESS.

I will be in Dungeness with a splendid stock of the latest and most up-to-date millinery on Monday, April 17th, and will remain one week. Mrs. Ida Jameson,
Marvel Millinery Parlors,
Port Angeles.

THE CITY NEWS

Mr. and Mrs. T. S. Gorman were Seattle visitors this week, going up to the Queen City on Monday.

For your garden hose, lawn mowers, watering pots, lawn sprinklers, we have the goods at the lowest prices. H. Gutenberg Hdw. & Fur. Co.

Throw away that old oil wasting lamp burner and get a Saxonial Incandescent burner at Fulmer's Studio. Fit your old lamp.

Wanted—To exchange Everet-property for farm near Port Angeles. H. Fathers, at Port Angeles. or 2326 Colby Ave., Everett, Wash

If you wear a narrow shoe why not try a pair of the famous Nettletons shoes $6.00 a pair. None better made. S. J. Lutz & Co. Where you get a square deal.

Two of Carter's best field grown rose bushes for the best item on local improvements in the Olympic-Leader for the next issue.

As a breaking training table, the boys of the Parish Hall gymnasium class will have a theater party at the Star Theater, and followed by a banquet at Parish hall, on Wednesday evening, April 5th.

New goods of every kind in our furnishing goods department, shirts, socks, ties, underwear, hats, caps, etc., at prices that cannot be beat. We have the largest stock in Clallam county, in our line of mdse., and we can supply your wants with better goods for less money than you can get elsewhere. S. J. Lutz & Co

CHURCH ANNOUNCEMENTS

First Church of Christ, Scientist, Eighth St., between Oak and Laurel. First reader, Mrs. M. A. Lewis. Services 11 a. m.; Sunday School 12 a. m.; Wednesday, 7:30 p. m.

First Congregational Church, Rev. Stephen Smith pastor. Morning service at 11:00, evening service at 7:30. Sunday school at 10:00 a. m.; Christian Endeavor at 6;30 p. m. Mid-week prayer meeting Thursday evening at 7:30.

Ev. Luth. Church.—Until further notice there will be service on the 2nd and 4th Sundays of each month from 11:00 to 12:00 o'clock. Sunday school every Sunday; classes in German and English from 10:00 to 11:00 o'clock.

At the First M.E. church Sunday, Mrs. Jackson Silbaugh, a representative of the W.C.T.U., will speak at 11 a. m.

The pastor will preach at 7:30 p. m., subject, "Destiny," which is the fifth sermon on the subject of "Life."

Mr. Gilmore and Miss Gilmore will sing a duet at the evening service.

A FEW WHYS, WHOS, ETC.

WHY go to a great expense building a wagon road in Ozette country, and no outlet—the stern end of a road?

WHO ordered it?

WHY was a bridge constructed across the lower Hoko river; no road, no demand, not a single family to accommodate?

WHO did it?

WHY was fifteen hundred dollars (more or less), spent cleaning out snags in the outlet of Ozette lake? No traffic.

WHO does it benefit?

WHY did it become necessary to spend twelve to fifteen hundred dollars in and round Dickey lake on the trail in the years 1908 and '09 and comparatively nothing in the years 1910?

WHO ordered it?

WHY a five mill levy in district No. 3 where timber interests are dominant and an 8 mill tax in district No. 1 where the settlers are prominent?

WHO turned the trick, and what the consideration?

WHY did Joe Proll desert his ranch on Deep creek, after slaving away for twenty years, spending the better part of his life? Good soil, good improvements, a good home in his declining years.

Who is responsible?

WHY is the road from Quillayute prairie to Mora graveled entirely, and a part of the way a boulevard out (the extreme end the wagon road from Clallam Bay via Beaver, Forks, etc.) and a number of places along the route where the greatest good to the greater number would be served have been neglected.

WHO maneuvered it?

WHY the deplorable condition of the roads from Clallam to Ozette lake, and Quillayute via Dickey lake with all this wealth of timber? About ten townships of this timber wealth tributary to said road, and if the timber interests have taxes in proportion to settlers

WHO'S got the money?

L. T. SANDS.

DRAW PAY FOR DOING NOTHING

Gettysburg, Wash.,
March 20, 1911.

Editor Olympic-Leader,
Port Angeles.

Dear Sir:—I wonder if the legislature, when creating a legal holiday for Columbus, had in mind what it will cost the taxpayers of the state.

For instance, the school law of this state says a teacher is not required to teach on legal holidays, but he or she shall be entitled to salary the same as any other school days, and if the holiday comes on Sunday then Monday shall be a holiday also.

Now, I believe we have in Clallam county alone about 65 teachers drawing a salary of more than three dollars a day, and we have now nine holidays. There are two for Thanksgiving. One last teacher taught school on Labor Day and got six dollars for that day. Why not make Saint Patrick's Day a legal holiday too?

I take it that Columbus did not discover America for America's sake.

Respectfully,
O. N.

Come, all good Folls and Follesses!
The world, by old decree,
Grants one day to fool away.
Then come and foolish be,
Old King Mischief shall gayly reign
With laughter, mirth and glee,
When April first shall come again,
Come, celebrate with the W. R. C.
April 1st at 8 p. m.
At G. A. R. Hall.

We invite your inspection of our beautiful line of summer silks. Marvel Milliner.

BROTHERHOOD MEETITG A LOVE FEAST AFFAIR

Universal Sentiment in Favor of Street Improvement by Assessment Districts.

The regular meeting of the Congregational Men's Club at the church Monday evening was a regular love-feast affair. About seventy members and guests, the latter including two or three out of town visitors, sat down to the sumptuous banquet provided by the ladies of the Aid Society of the church, the moving spirits behind the evening's spread being Mrs. Hansen and Mrs. Geisness, and the manner in which the men disposed of the tasty viands was a decided compliment to the culinary skill of the ladies.

Mr W. C. Nelson and Mr. W. J. Hoare furnished the musical part of the program and did it to the pleasure and satisfaction of all present, as shown by the hearty encores following each number.

Mr. H. G. Singer read the report of the Outlook committee, following which President R. D. Willson, rising, and holding in his hand a fine rosewood gavel, presented to the organization by Mr. Singer, called for a vote of thanks, which was heartily given.

Mr. Weeks, the efficient secretary of the club, having decided to leave Angeles for a time, offered his resignation and the executive committee of the Brotherhood was empowered to appoint a successor. Mr. Weeks was given a unanimous vote of thanks for his efficient services as secretary of the club.

The principal address of the evening was made by F. V. Dunham, representing the Warren Construction Co., builders of bitulithic roads, which has just put in, as an object lesson to the farmers, one mile of road in each commissioner's district in Snohomish county, where the people have voted $1,250,000 in bonds for permanent road building—the plan that will have to be adopted in Clallam county if we are to enter upon an era of real development.

Mr. Dunham said that he had visited all the towns of the Northwest in connection with good roads work, and had found that the towns and communities which neglected their street and road work repelled the intending investor and homeseeker, while those towns which were alive and showing activity in street improvement were being rapidly settled up. He believed the one great need of this community was a road thru the county to the ocean beach. Having such a highway, thru a beautiful country, with the Pacific ocean as its terminus, we would see a continual procession of automobiles, and capital and development would speedily follow.

A number of others spoke upon the same and related subjects, the sentiment in favor of immediate and general work on the streets of the city by means of establishing assessment districts being general.

THE CITY COUNCIL

At the council meeting Tuesday evening Mayor Mead appointed Councilmen Meyers and Gardner a committee to confer with county commissioners in regard to cemetery road.

Moved by Dustman that council meet in committee of the whole Friday, March 31st, to consider ways and means to create assessment districts and that city clerk secure valuation of property on 1st and Oak streets. Adopted.

Upon motion of Elliot, city marshal was instructed to collect $60.00 in advance per year for moving picture shows.

Mayor Mead announced appointment of J. M. Davis as Police Judge. Same was confirmed.

Application for renewal of liquor licenses and confirmation of bonds of Peter Grubb and F. F. Miller were granted on vote of Myers, Grubb, Gardner and Fitzgerald, aye; Dustman and Elliot, no; O'Brien not voting.

Bills amounting to $1265.85 were allowed.

R. D. Kilmer, one of the boys here who started in two or three years ago with Contractor Govan and is now taking contract work himself, has just finished clearing ten acres in the uplands of the Mount Pleasant farming district at the contract price of $80 per acre. Mr. Kilmer states that his experience with a donkey engine has demonstrated that it costs $100 to clear the average acre in this part of Clallam county, some land going as low as $80 and some as high as $150.

Its possible that we could, but we don't propose to attempt to chase up and down twenty-five miles of streets every week to see who is "driving a nail, or weilding a paint brush, or setting out shrubs and trees." If the tale be told, you'll have to tell it.

FOR A SPOTLESS TOWN

The Ladies of the National Capital have organized, and a dispatch from that city says:—Washington is to be a spotless town if the society women who belong to the Household Alliance have anything to do with it. 'Cleanup day," early in April, will find the social leaders armed with shovels, brooms and rakes out fighting the enemy, dirt.

Mrs. Richard Wainwright, formerly Miss Alice Bloch, Mrs. Taft's social secretary, will lead the army personally. She will be ably seconded by Mrs. Robert LaFollette, wife of the senator of Wisconsin.

The slogan of the movement is "Every householder clean up his own street front," and where example is needed to some of the less cleanly brethren in alleys and side streets, the band of society cleaners will give personal demonstrations for their benefit.

The women of Port Angeles will not let the women of the Capital city outdo them in their fight for a clean city.

ELLENSBURG SUMMER SCHOOL

The summer school for teachers and students will be conducted in the normal school building at Ellensburg beginning June 19th and continuing nine weeks. Regular members of the faculty will be the teachers in the summer session. The courses are planned for persons desiring credit in the regular courses looking to a normal school certificate or diploma; persons wishing to prepare for the August examination in first, second and third grade certificates; and teachers who wish special training in manual work, art, music, nature study, agriculture, or domestic economy.

Board and room $4.00 and up. Write for catalog. W. E. Willson, principal.

PHONE No. 32.

SEATTLE AND THE PENINSULA

In an address before the Seattle Commercial Club, Tom Richardson, of Portland, while discussing the possibilities of the Olympic peninsula, with particular reference to the recent movement to advertise the resources of that section, said the people of this city ought to play an important part in the development of the rich area west of Puget sound, says the P.-I.

Mr. Richardson said "we have come to Seattle to see how best we can develop these advantages," and he added:

It is a good place to come to, because nowhere on the face of the earth are there gathered more human dynamos than are to be found in the Queen City.

Seattle has "grown so great' that Mr. Richardson thought it nothing more than natural and right for this city to extend its energies into the Olympic peninsula, and thus "help in building up a state that will surpass any in the nation." There isn't on this coast a man who is keener to the material possibilities of this section of the country than Mr. Richardson. His services to Portland have been of such high value that attention has been drawn to the Oregon city from every part of the country, and his success there has been so pronounced and has attracted so much attention that recently Baltimore offered him a salary of $15,000 to take charge of that city's half-million-dollar publicity campaign.

Seattle ought to play and must play a leading part in developing the rich resources of the Olympic peninsula. It is exclusively Seattle's territory, except for a limited portion of the purely local business which necessarily will go to urban centers closer to the centers of production.

Broadly speaking, three things are needed to make the Olympic peninsula one of the richest producing sections of the United States. Railroads are needed, capital is needed, and some modification of the government's land policy is needed. The railroads are now planning to get into this rich producing section. apital will follow the railroads, and once made to understand the injustice of its land policies as applied there, the federal government will probably modify its policies and make it possible for thrifty and progressive citizens with means to establish a vast variety of profitable enterprises in the counties west of Puget Sound.

STEEL FOR POWER PLANT

The first shipment of steel from the Western Corporation's plant at Irondale to the Elwha river was made yesterday The Dauntless brought about six tons of twisted steel rods, which were landed on Union dock and will be shipped this morning to Port Angeles. The steel will be used to reinforce the concrete dam which is under construction at the site in the canyon of the Elwha.

The shipment will be followed by others, as the steel is needed. The construction of the power plant will require considerable quantity of steel for various purposes and the company has placed a good-sized order with the Irondale plant.

BEAUTIFYING SCHOOL GROUNDS

The school children are very enthusiastic over the observance this year of Arbor Day. In the grades they will have recitations and songs suitable for the occasion, and each room will set out in the school yard two trees which will be named for some famous person in history. It is work in the right direction to get the children interested in improving the school grounds. May it continue.

A comedy entitled "Mr. Bob" will be given by the Women's Literary Club at the opera house on Friday evening, April 21st, for the benefit of the bridge fund. The cast will consist of the best local talent.

Notice for Publication—Isolated Tract.

Public Land Sale, Application No. 01748
Department of the Interior,
U. S. Land Office in Seattle, Wash.,
January 16, 1911.

Notice is hereby given that, as directed by the Commissioner of the General Land Office, under provisions of Act of Congress approved June 27, 1906, (34 Stats., 517), we will offer at public sale, to the highest bidder, at 10 o'clock A. M., on the 27th day of March, 1911, at this office, the following described land:

The n½ of lot 4, section 2, and the w½ of lot 1, section 3, and the ne¼ of the se¼ of the se¼ of the ne¼, section 10, Tp. 29 N., R. 3 West Will. Mer.

Any persons claiming adversely the above-described land are advised to file their claims, or objections, on or before the time designated for sale.

J. HENRY SMITH, Register.
F. W. TWITCHELL, Receiver.

ABOUT A NEW PARTY

In the Senate, the bitterest fight of the regular session was over the Lorimer case. Eleven Democrats and thirty five Republicans voted for the Illinois Republican; eighteen Democrats and twenty-two Republican voted against him. It was Bailey, leading Democrat, who fought most desperately in Lorimer's behalf, threatening to tie up appropriation bills in order to force a vote. Nine Democrats joined twenty-four Republicans in defeating, by an exceedingly slim margin, the resolution for direct election of Senators, says the Saturday Post.

Some Democratic Senators were most active in hindering the Tariff Board bill, and stood shoulder to shoulder with stand-pat Republicans in opposition to Canadian reciprocity, while in the House seventy-seven Republicans voted for the reciprocity agreement and eighty-eight voted against it. This agreement is the most important measure of Mr. Taft's Administration, the measure to which in greatest degree he pins his political hopes; and in respect to it the Republican President must depend very largely upon Democratic support in Congress.

The best reason for thinking there will be a new political party is that, for legislative purposes, there are no longer any old political parties. If there is to be any party alignment, it must apparently be a new one, for in Congress the old one has disappeared. Of the thirty-three Senators who defeated the resolution for direct election of the members of the Upper House ten retired on March 4th. This makes the Senate simply Insurgent and tends more completely to obliterate the old party lines.

Palace of Sweets

Circumventing Cynthia

By NELLIE C. GILLMORE

(Copyright, 1910, by Associated Literary Press.)

Davison smothered an ejaculation, snapped his fingers and made a dash for the phone. Exchange refused stubbornly to answer and he jangled the bell peremptorily. At last he got a connection and stood waiting for the low, familiar "1303" to sound back over the line. After several minutes he was advised that 1303 was out of commission, and the receiver clashed ominously against the hook.

"Something dreadful has happened." Thus had Cynthia expressed herself in the letter left on his desk less than ten minutes ago. Furthermore, she continued, "it is now quite out of the question for us ever to think of marrying. Please do not ask me for explanations, but believe that I am honest and quite right in taking this painful step. I know that your confidence in me is sufficient to warrant my asking it of you. Under separate cover, I am returning everything, including the engagement ring. Please do not attempt to see me or dissuade me, for it will be useless. I am sailing for Cuba with the Hartreys on Tuesday."

Davison staggered back to his seat and re-read the lines in a half stupor. What was it all about? What could it be? Had Cynthia, after the irritating manner of engaged girls, dragged forth some obscure affair from the past? Was the dear girl laboring under a hallucination, or had "disinterested" friends sought to poison her innocent mind with vicious gossip? The questions flew through his mind in lightning panorama, bewildering, dazing, in turn, with their possible answer.

At last he drew up pen, ink and paper, and in sheer desperation, dashed down the following:

"Darling Cynthia:

"Your letter has shocked me beyond expression, and I refuse to be-

Re-read the Lines in a Half Stupor.

lieve in its seriousness. You are playing a practical joke on me, and perhaps even now are laughing at my plight and writing to make things clear!

"If, on the other hand, you are in earnest, then I demand an explanation as my right. Our relations have been too dear, too deep and sacred to allow of any such flippant and summary dismissal.

"Please indicate the time and place for an early meeting, and believe me,

"As always. JACK."

Davison sealed, stamped, addressed and dispatched his letter within the following five minutes. Then he waited—exactly two hours—for a reply. It came, in a single line:

"My letter was final. Heartbrokenly. CYNTHIA."

Davison ground his teeth savagely, turned white as a sheet and picked up his hat. It was just three-thirty—and Saturday. He would go straight to the Haskells' and have it out, face to face. But, half-way there, he recalled the fact, abruptly, that this was Cynthia's club day and she would not be at home. He recalled at the same instant, with a flash of inspiration, that she had said the meeting would be with Florence Greyson.

Ten minutes later Davison occupied an inconspicuous seat in the corner of the park, seven squares uptown. Five minutes after that Cynthia, radiant in mauve chambray, rustled by, almost within touching distance of him. Her face was devoid of its usual delicate bloom and there were violet shadows under the brown eyes to match the violets drooping about the wide, soft brim of her hat.

Davison rose, and without a word, matched his step with hers.

"Let's come to the point at once, Cynthia," he began, gravely, ignoring her little exclamation of protest. "If there is anything wrong——"

"You mustn't ask me; indeed, you must not." And she shook her head violently, though her lips were trembling beyond control and her eyes were wistful with shadows.

Davison bit his lips angrily. His voice was several shades deeper than Cynthia had ever heard it, when he spoke.

"I was determined to see you, and drag the truth from you," he said, "deeming it my right to know, but—" He paused and looked at her long and earnestly. "I've reached the conclusion that it is really better for me to go on in ignorance. I shall re-enlist in the army and sail on the next transport for Manila."

"Jack!" The girl stopped short, every atom of color gone from her cheeks. "I won't—I won't hear of it!" The words choked in her throat and her eyes filled. Then, all at once, she pulled herself together and said, resolutely: "I shall tell you the whole truth, Jack. I had made up my mind to keep silent—from pride, with a great, big P. But—but—of course, I cannot let you go, believing me—I hardly know what, or what not. Last night I went into Martin's for supper with Fred Humphrey. At the table, just behind us, were a party of four—the Elwoods and the Thorpes. They were discussing our engagement, and one of the ladies sneeringly observed that it was well that the Davisons knew nothing of the fact that Mrs. Haskell's great uncle was a barber."

"Is that all?" Davison heaved a prodigious sigh of relief.

"Isn't it sufficient?"

"Hardly."

"You don't understand, Jack. It seems an insignificant thing, but it is the keynote of an ever-widening circle in this narrow little social world of ours, and I—well, I did what I thought was best."

Davison made a gesture of disgust. "What kind of love do you call that?" he demanded, curtly. "You give me up for good and all just because—"

"I loved you too much to bring anything disagreeable into your life," interposed Cynthia, gently.

Davison burst into laughter. "You are a Quixotic little idiot, Cynthia. Here is your destination, by the way. Shall I wait around a couple of hours or come to the house at the usual time tonight?"

"Neither. I'll call you up at six." And with a backward smile she disappeared between the flaming beds of flowers.

Davison returned to his office in a rejuvenated frame of mind. The entire day's work had been ruthlessly neglected and he applied himself diligently to the stack of mail on his desk. Six o'clock came even sooner than he expected, and when the bell over his shoulder gave a prolonged, imperative ring he jumped up eagerly.

The girl's first words stunned him. him.

"Good-by," she said. "I'm leaving in fifteen minutes for New Orleans. The Hartreys sail from there on Tuesday, as I told you, and my passage is already engaged."

"My mind was made up, dear, and I didn't dare run the risk of letting you see me again. It—it is for the best, believe me."

Without comment Davison calmly hung up the receiver. He jammed his hat over his eyes and ran down three flights of steps to the street. His runabout stood at the curbing. He stepped in and whizzed off at speed limit toward the station.

Seven minutes later he was elbowing his way through the scurrying crowds toward the lady's waiting room. He found her at a news stand, glancing idly through a periodical.

"What do you mean by running away from me in this fashion?"

"Oh, Jack," she said, reproachfully, "why did you?"

"Because you are mine, and I've a perfect right—"

"I should have written to you and—and explained everything." The girl sat down weakly on the bench nearest her, her face ablaze with scarlet. "You can have no conception of the mortification I was forced to endure—should have had to endure always—"

"This doesn't sound like your old, practical, broad-minded self, Cynthia."

"It is a new side to me, the proud side, dear, which you've never had an opportunity of observing before."

"Pride be dashed. And—you'll never get aboard this train, Cynthia."

"Indeed?" Her black brows went up with a touch of challenge.

"Indeed. I'm going to prove to you how utterly ridiculous your theory is. Would you send me away if you knew my ancestors were plain people?"

"Certainly not."

"But you are relieving me of the burden of yourself—"

"Oh! But the way they said it, Jack—a barber!"

Under cover of the dusk Davison slipped a surreptitious arm about her waist. "My grandfather was a butcher!" he said, happily.

And Cynthia tore up her ticket.

Too Smart.

B. Davis Noxon was one of the ablest lawyers in central New York. A young man entered his office as a student and was given Blackstone to study. At the end of a month he asked Mr. Noxon what he should read next. "Do you understand Blackstone?" "Yes," was his answer. "Read Kent," was the order. In another month he announced that he had finished Kent, and "What next?" "Have you read Blackstone and Kent?" "Yes." "Do you understand them?" "Yes." Well," said Mr. Noxon, "you had better go at some other business, as you are too smart to be a lawyer."—Case and Comment.

Quite Enough.

"Oh, sir, will you please come at once. There's three brutes jumping on a poor organ grinder."

"Is he a big organ grinder?" queried the old gentleman, calmly.

"No, no, sir, quite a little man. Oh, come at once, or it will be too late!"

"I don't see why I should interfere," replied the old gentleman. "If he's a small man the three men don't need any help."—Tit-Bits.

HOME NURSING

By EDITH B. LOWRY

Bachelor of Science, Graduate Nurse, Physician and Surgeon.

Formerly Superintendent of Jefferson Park and South Chicago Hospitals and Training Schools for Nurses. Author of "Confidences—A Book for Young Girls."

THE SICK ROOM.

The choice of the sick room is very important. A patient in a dark, poorly ventilated one has a harder battle to fight than one in a properly selected room. It should be on the sunny side of the house, well ventilated and as far as possible from the noise of the streets and the odors of the kitchen.

In arranging the room, all unnecessary furniture should be removed, especially bric-a-brac, which forms a repository for stray germs. The floor is preferably bare, although small rugs or strips of carpet should be laid down to deaden the noise of footsteps. Place the bed in a position so that the direct light from a window does not fall on the patient's eyes. Provide an artificial light that also is shaded from the patient's eyes, but which can be turned on brightly in case of necessity. Sudden changes may arise in the night, when a good light is an absolute necessity and a few moment's delay may mean disaster. In cases of diseases of the brain or eyes the physician will probably wish to keep the room darkened. Care should be taken that the curtain or shade does not flap in the wind and so annoy the patient.

The temperature of the room should be kept as even as posible. Remember that the temperature usually falls at night during the time when the vital powers of the patient are at the lowest, that is, in the early morning hours. Because of this, care should be taken to provide extra covers at that time. Unless otherwise directed, it is safe to keep the temperature of the room for a fever patient at about 60 degrees Fahr. For patients afflicted with other diseases, the thermometer should register about 68 degrees Fahr. The temperature of the room must be regulated by turning the artificial heat off or on, not by closing windows that are needed for ventilation. In some cases dry heat from a furnace is very irritating. This may be remedied by keeping a kettle of boiling water in the room. To keep the room cool in hot weather is not always an easy matter. Keeping the blinds down and the windows closed on the sunny side during the day will produce very good results. A wet sheet, hung in the window or where a breeze will blow over it, often is a material aid in cooling the room. If an electric fan is used, care must be taken that the direct current does not strike the patient.

Good ventilation is necessary in every disease. Formerly patients were confined in dark rooms with all doors and windows closed. It is surprising how many recovered under these conditions. Sunshine and fresh air are nature's two most potent remedies. In cold weather it may not be desirable to have the windows open in the patient's room, but in this case windows in an adjoining room should be lowered and the door between the rooms left open. Usually though, the room can be ventilated directly. Raise the window about six inches from the bottom; fit a board tightly under it. Fresh air will then came in between the two sashes and danger of a direct draft on the patient will be avoided. Every morning the room should be thoroughly ventilated by throwing open all windows and doors for a few minutes. Before doing this, the patient should be covered with one or two extra blankets and a light covering thrown over the face. Do not remove this extra covering at once when you close the window, but remove it gradually as the air in the room regains its normal warmth.

It is better not to keep any plants or flowers in the room, but if the patient desires a few during the day they may always be removed at night. Keep all medicine bottles, empty glasses, etc., out of sight and if possible out of the room.

All excreta, soiled linen and dressings should be removed from the room at once, as they pollute the air. In infectious or contagious diseases the urine, feces (bowel movement) and vomited matter should be disinfected with chloride of lime or carbolic acid. Care should be taken not to empty the excreta near a well or any place where the water supply will become contaminated. If no sewerage system is convenient, the feces should be buried or burned after being disinfected. If a patient expectorates he may be supplied with small pieces of cotton to receive the sputum. A paper cone pinned to the side of the mattress, within easy reach of the patient's hand, makes a convenient receptacle for these pieces. A new cone should be provided once or twice a day.

The sweeping of the sick room must be done slowly, keeping the broom always near the floor so the dust will not fly. Before commencing to sweep the broom should be dampened, or moist sawdust or tea leaves be strewn over the floor. The dusting should be done with a damp cloth, never with a feather duster. If there is a fire in the room the coal should be brought in wrapped in paper and gently laid on the fire. The ashes should also be removed noiselessly. The patient's room is the patient's home for the time being, so everything possible should be done to keep it clean, airy and comfortable.

Evening Slippers.

Just now black velvet slippers are very smart indeed for evening wear. Not only are they very pretty, but they have that advantage which all black footwear possesses—the virtue of making the wearer's foot appear very tidy. And that in itself is enough to win feminine commendation.

They are especially modish for wear with dark-colored street frocks. Sometimes there is a wee satin rosette or perhaps a fluffy bow of tulle or maline is used for adornment. And not infrequently these rosettes have a sparkling rhinestone nestling down in the heart of the rosette.

If milady wishes something even more elaborate, there are great paste buckles which gleam and glitter and look very fetching on a pretty foot.

Gift Necktie Rack.

A birthday gift necktie rack which is substantial as well as ornamental, consists of a hardwood back, covered with heavy natural colored linen bearing a hand embroidered design and supporting a hinged rod of nickel which may be folded backward when the article is to be packed. Another rack which may be easily crowded into a traveling bag consists of a broad strap of leather from which a big ring of metal is suspended. A third tie holder has five ivory arms attached to a brass bar, and a fourth is merely a gold plaited stirrup and leather loop joined by a strip of hand embroidered satin.

FANCIES OF FASHION

White, pink, light yellow and American beauty shades are used for dancing gowns.

Kid gloves on the glace order and usually white are worn with any evening costume.

Polished wood buttons of cloth and silk colors are in great favor for polo and storm coats.

Paris has a new fancy for shading her feathers and even her veils as well as her gowns.

Irish lace bands—carrying out the Irish lace vest or collar so much worn—adorn many sleeves.

A great many velvet bags have come and satin ones outnumber those which appeared last spring.

Big white flowers, poppies, edelweiss, etc., in velvet or in kid, appear upon some of the latest large hats.

Winter Months on the Farm

How to Improve Them

Feeding for Milk

Keeping the Dairy Herd Up to the Maximum Production in Cold Weather

By PROF. G. C. HUMPHREY

Wisconsin College of Agriculture

Copyright, 1910, by Western Newspaper Union

It is easy to make co[illegible] give an abundant flow of milk in spring and summer when pastures are luxuriant and the days warm, but in the severe winter months the greatest skill of the feeder is demanded to keep up the production of the dairy herd. By buying plenty of expensive feeds it is possible to do this, but that removes the profits and the problem is, how to get a large production of milk from an economical system of feeding.

Many dairymen make a great mistake in not keeping enough grain and roughage to carry their herds through the winter. Instead they sell grain and roughage in large amounts and as a result find themselves handicapped for feed before spring pasture is available. Unless a man grows enormous crops, this sale of farm product in its original form not only robs the soil of fertility but also is a false economy, for the reason that in late winter the farmer has to buy feed at high prices when the supply is scarce or has to sell his cattle because of lack of feed for them.

Much wiser is the dairy farmer, who fills his feed bins and his silo or his root cellar and feeds their contents to his herd during the winter. He markets his produce in the form of milk and besides realizing a good profit from it also has the use of the manure from the herd to return to his fields. A money value is realized from the grains and also a fertilizing value in that the mauurial residues of these feeds is returned to the soil. The golden maxim of the dairy farmer should be "Produce as much feed as possible on the farm. Feed the grains and market them as milk and meat, at the same time making use of the manure as fertilizer."

Feed According to Production.

Each farmer should keep the production and expenses of every cow in his herd and should supply feed to the cow in proportion to her production and capacity. An excellent rule used in the Wisconsin College of Agriculture herd is to "feed as many pounds of grain daily as the animal produces pounds of butter fat during the week." Roughage should be supplied in amounts which the cow will clean up thoroughly.

Corn still remains the most valuable winter feed grown in the United States. It can be best fed as silage as in this form the dairy herd relish it best and there is the least waste. Silage which is to the cow what canned vegetables are to the human race, is greatly relished by the dairy herd on account of [illegible] succulence. It should be fed after milking where fears are entertained that it will give an unpleasant flavor to the milk. Silage is rich in carbohydrates and low in protein and should be supplemented by clover hay or some similar leguminous hay as clover, alfalfa, pea or vetch hay in order to provide sufficient protein. Where silage is not available it is advisable to grow root crops as mangels, turnips and rutabagas and use them as part of the ration. These roots can be grown cheaply and can be substituted for a part of the grain in the dairy cow's ration, being especially relished on account of their succulence. Even with silage they furnish variety and are valuable. Alfalfa is very palatable and valuable as a feed on account of its large protein content. It is an excellent food, both for growth and milk elaboration. A very cheap ration for cattle consists of corn silage and alfalfa.

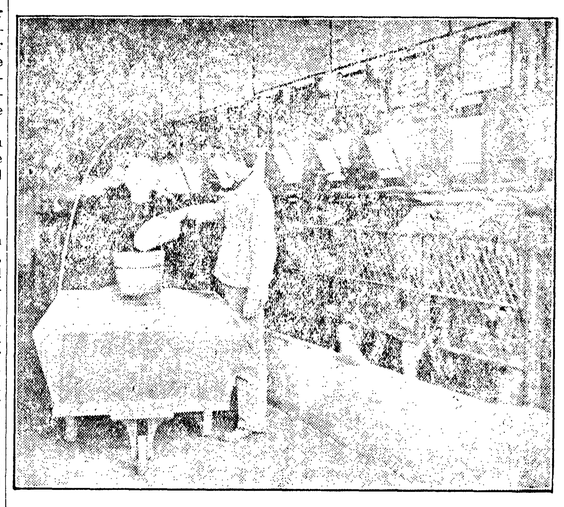
System of Winter Feeding.

During the winter the dairy herd at the Wisconsin College of Agriculture receives per head daily 20 to 40 pounds of corn silage according to the capacity of the animals, 8 to 9 pounds mixed hay, and as many pounds of grain daily as the cow produces pounds of butter fat per week. The grain ration consists of wheat bran 3 parts, oats 3 parts, corn meal 2 parts, and distillers' grains 2 parts. Where the cow requires variation in her feed small amounts of dried brewers grains or oil meal are used occasionally.

Prof. W. A. Henry speaks as follows regarding these feeds; "Wheat bran is especially valuable due to its laxative properties. It furnishes bulk and plenty of protein and ash so essential in milk formation. The combination of bran and corn meal is not excelled as a dairy feed. The bulk of the oat though carrying little nutriment renders this grain a feed of light character which is easily digestible. Oats contain a higher proportion of digestible protein than corn or wheat. This grain in itself is a well-balanced ration. Corn meal is a heavy, rich feed and should always be lightened or extended by the use of bran, shorts, oil meal or some other feed of light character."

Feeding experiments prove that dried distillers' grains are more valuable than oats as a feed for the dairy herd. Cows are fond of brewers grains and their use influences a good milk flow. Because of the sloppy character of wet brewers grains they should be supplemented by some dry feed in the winter ration.

Oil meal is a very healthful feed and brings the animals into good condition, with pliable skins and oily sleek coats. It has a very beneficial effect upon the digestive tract but should not be fed in large quantities due to its concentrated character.



Careful mixing of feeds suited to the individual needs of each cow is the secret of successful feeding for milk. This feed car makes the mixing of rations an easy matter.

The nutritive ratio of a given ration depends upon the character of the feeds which it contains with reference to their protein, carbohydrate and fat content. Some feeds are deficient in protein and such feeds, therefore must be supplemented with feeds rich in protein substances in order that the animals may be supplied with the proper nutrients for nourishing the body and for the production of milk, beef, wool, etc.

An investigation of problems connected with the feeding of the Wisconsin College of Agriculture dairy herd, which has been conducted during the past nine years, furnishes additional evidence with regard to the proper protein supply of rations for dairy cows on Wisconsin farms and in other northwestern states. This investigation and practical feeding experience in this country have shown that a nutritive ration of 1:6 or even 1:7, which is wider than that of 1:5.4 recommended by the German investigators, can be used successfully. The teachings of many carefully planned and conducted experiments and the experience of dairy farmers who have paid special attention to the question of the relative economy of the different kinds of feeds under their particular conditions indicate that a medium wide nutritive ratio is, in general, to be preferred under conditions of dairying in the northwest.

Medium Protein Rations Best.

This investigation mentioned above showed conclusively that the medium protein rations were more economical and produced better results than the high protein rations. On the average there was a gain in the net profit in favor of medium protein rations amounting to nearly 18 per cent. The significance of this result lies in the fact that the medium protein rations were composed largely of farm-grown feeds, supplemented by mill feeds and small amounts of the more expensive high protein feeds. This investigation leads to the conclusion that Wisconsin dairy farmers and others similarly situated will do well to feed their cows rations of medium protein contents which as a general rule will have relatively wide nutritive ratios about 1:7.
