Sore Throat

Does your throat hurt? If so, you may console yourself with the knowledge that you have plenty of company.

Sore throat is one of the more common physical discomforts that plague most of us from time to time.

Sore throat is nature's warning system that something in your body is out of order.

Other things that trouble you frequently are removed. Tonsilladenoid removal account for half of all surgery performed on children.

Allergies can cause sore throats. Cold, dry winter air can trigger it. So can extreme thirst, excessive smoking or mouth breathing.

Virus infections of many types also are a cause of sore throat, and everyone who has had "flu" knows that this particular virus disease often causes the throat to hurt.

"Strep throat" is a serious infection that occasionally leads to rheumatic fever and possible heart damage. It can be knocked out with penicillin, if it is diagnosed in time.

There is little or nothing you can do to cure a sore throat at home. Use the medications which bring temporary easing of the discomfort but the cure must be launched by your physician.

A Protest From 4th Class Citizens

At the recent legislative hearings in Olympia the small cities were given a fair opportunity to present their views. The hearings were directed specifically toward the "Big City Story."

The proposed basic for distributing state funds to cities is fantastically inequitable. It is based on the gross income of residents of larger cities need or are entitled to more money each than residents of smaller cities.

Our city prepares a budget for the year. It is a statement of our needs and desires. It is a statement of our ability to pay for them.

Our city employees are paid lower wages than those in larger cities, and we have no lavish pension or retirement plans for them.
