Narrative

The North Olympic Library System seeks to purchase a dedicated caching server and a supporting UPS Battery Back Up Unit, including related software, hardware, accessories, and rack/cabinet to be dedicated solely to storing information locally so that it is accessible more quickly than if transmitted across a network from a distance. The goals are to speed up internet service and to reduce the network traffic between the branches and the main data center at Port Angeles. The Library intends to purchase this equipment for the Forks and Clallam Bay branches in the first year, and may purchase additional equipment in later years for other locations. The Library is not considering a caching service instead of on-premise equipment owned by the Library at this time.

Please see uploaded RFP for more information on this bidding opportunity. This RFP and any Q and A and updates relating to it will also be posted on the Library's website at <https://www.nols.org/bids-requests/>.

The library is not considering recycled or refurbished products in this bidding process and this requirement is a disqualifying factor for the evaluation of bids.
