Crafts to Make in the Fall Kathy Ross

# **Fingerplays**

#### **Autumn Leaves**

By R. Underhill Actions adapted from Whatcom County Library System

I love to watch the autumn leaves as they tumble down (fingers float to the ground)

I love to hear their crackling As my feat trod over the ground. ("walk" fingers on open palm)

I love to rake them in a heap And watch the children play (rake fingers on open palm and pretend to throw some in the air)

For soon the color will be gone Replaced by snow some day. (hug self and shiver)

# **Action Rhymes**

#### Leaf Pile

When the leaves are on the ground (flutter hands to the floor)

Instead of on the trees (arms outstretched and fingers stretched like branches)

I like to make a great big pile, (arch hands over "leaf pile")

Way up to my knees, (hands on knees)

Then I run and jump in them, (jump up and down)

As silly as you please! (act out silly motions)

From <u>childcarelounge.com</u>

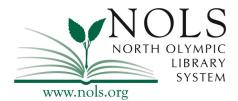

#### Five Little Leaves

Five little leaves up in a tree.
One little leaf said, "Look at me!"
The leaf let go and down he fell.
"EEEEEEEE!"
Ouch! He didn't feel so well.
(Repeat with four, three,...)

From King County Library System

## Songs

#### **Fall Leaves**

Sung to Frere Jacques

Leaves are falling Leaves are falling (fingers flutter down)

Floating down Floating down

Red, brown and orange Falling high in piles Let's jump right in, (jump into leaf pile)

Jump right in.

From The Storytime Sourcebook II

#### Leaves on the Trees

(Sung to "The Wheels on the Bus". Act out the motions.)

The leaves on the trees turn orange and red, orange and red; The leaves on the trees turn orange and red, all through the town.

The leaves on the trees come twirling down, twirling down; The leaves on the trees come twirling down, all through the town.

The leaves on the ground go swish, swish, swish, swish, swish, swish, swish; The leaves on the ground go swish, swish, swish, all through the town.

From King County Library System

#### **Squirrel Song**

they're gone.

Sung to "She'll be Coming Round the Mountain"

I'll be gathering all the acorns till they're gone.
I'll be gathering all the acorns till they're gone.
I'll be gathering all the acorns,
Gathering all the acorns,
Gathering all the acorns till

And I'll put them all inside my little home.
I will put them all inside my little home.
I will put them all inside,
Put them all inside,
Put them all inside my little home.

And I'll eat the nuts until the winter's gone.
I will eat the nuts until the winter's gone
I will eat the nuts until,
Eat the nuts until,
Eat the nuts until the winter's gone.

Then I'll do it all again come next fall.
I will do it all again come next fall.
I will do it all again,
do it all again
Do it all again come next fall.

#### Early literacy take-home:

During your next autumn walk with your child, have him or her make connections between the fall themed books you've read together and what they see on their walk; changing leaves, squirrels looking for food, pumpkins, etc. Making connections between their world and the text they read develops reading comprehension skills.

### **Arts & Crafts**

#### Leaf Rubbings

Gather various leaves with your child (make sure they aren't too crumbly). Place the leaves under a blank sheet of white paper and use the sides of crayons to gently create beautiful leaf rubbings.

#### **Wax Paper Sun Catchers**

Use gathered leaves in varying Autumn shades to create sun catchers. Place leaves between two sheets of wax paper. Place the wax paper between two towels and press with an iron on very low heat. Hang the finished product in your window to see the beautiful colors come to life.

#### Science & Math

# Sort and Discuss Seeds and Leaves

Gather plants that have recently gone to seed and leaves of all shapes, sizes and color. Sort the seeds and leaves by their various attributes; color, shape, size. Ask your child if they can think of any other attributes to sort by.

Spend some time talking about questions and observations your child may have about leaves and seeds in the fall; why they change color, why do plants produce seeds and how do they grow into new plants, etc.
