Re: Circuitry with the Civil Air Patrol for grades 6-8

The Sequim Library is hosting [Circuitry with the Civil Air Patrol](#), a free workshop designed for middle school students in grades 6-8 to learn about electricity with interactive STEM (science, technology, engineering and math) projects. The Dungeness Composite Squadron of the Civil Air Patrol will guide students through exciting circuitry experiments on Saturday, Feb. 1, from 2:30 to 3:30 p.m. at the Olympic Peninsula Academy gym, 400 N. 2nd Ave., Sequim.

Registration is recommended due to limited space. Sign up at [NOLS.org/events](#) or by calling the library at 360-683-1161.

Learn more about the Dungeness Composite Squadron by visiting [wa091.cap.gov](#). The workshop is part of their volunteering core to share STEM opportunities with youth in the community. It provides leadership opportunities for youth cadets, as well as peer teaching and learning opportunities. There will be no active recruitment at the event.

This program is supported in part by the Friends of Sequim Library.
