*CLALLAM BAY, Wash.* – The North Olympic Library System (NOLS) invites community members to learn about local salmon habitat restoration efforts during a free presentation by the North Olympic Salmon Coalition (NOSC). The Science Behind Salmon Habitat Restoration will take place on Wednesday, Nov. 18, from 4–5 p.m. at the Clallam Bay Branch Library in the Clallam Bay Community Meeting Room.

Wild salmon populations are experiencing significant declines in the region, largely due to habitat loss. During the presentation, representatives from NOSC will discuss the science behind local restoration projects and how these efforts help protect and restore the natural habitats salmon rely on for feeding, resting, and spawning.

Founded in 1990, the North Olympic Salmon Coalition works with landowners and volunteers to restore salmon habitats across the North Olympic Peninsula. Through restoration projects and education, the organization aims to support healthy wild salmon populations that benefit local families, fishers, and economies.

For more information visit NOLS.org/events, call 360-963-2414, or email discover@nols.org.
