Re: Astronomy Day 2016

Celebrate worldwide Astronomy Day by learning about the cosmos and visiting a mobile planetarium on Saturday, October 8 at Sequim Middle School! Award-winning local science teacher John Gallagher will lead 30-minute "Introduction to the Night Sky" sessions between 10:30am and 12:30pm inside the school cafeteria. Attendees are encouraged to register for a session in advance, however drop-ins are welcome at this free, all-ages event.

To register, visit the Sequim Branch Library events calendar at www.nols.org, call the library at 360.683.1161, or send an email to Discover@nols.org. Sequim Middle School is located at 301 West Hendrickson Road in Sequim.

Library telescopes

Another great way to explore the night sky is with one of the telescopes the North Olympic Library System (NOLS) recently added to its fleet of unexpected, non-traditional items available for checkout. Each scope is equipped with accessories to help you view the night sky, including a pocket constellation guide, beginner's instruction manual, and a headlamp to aid in nighttime viewing. Library telescopes may be borrowed for up to one week. To place a hold request, visit the Library [catalog](#) and search for "telescopes." Hold requests can also be made by calling the Library or visiting any of the four NOLS branches in Clallam County.

Additional Information

For more information about this or other programs, contact the Sequim Branch Library at 360.683.1161, send an email to Discover@nols.org, or visit Library homepage at www.nols.org. This program is generously supported by the Friends of Sequim Library.
