Re: *Computer Security and Privacy Basics* at the Port Angeles Main Library

How safe is it to use your credit card online? How do criminals and fraudsters get into your computer systems? What is privacy in the age of social media? At the Port Angeles Main Library on Wednesday, May 3 at 6:30pm, tech guru Eric Waterkotte will answer these questions. Waterkotte will talk about computer security and privacy basics, and provide best practices to safely navigate your online activity.

This program takes place during the American Library Association's *Choose Privacy Week*. This is an annual campaign encouraging libraries and patrons to think critically and make more informed choices about their online privacy.

About Eric Waterkotte

Eric Waterkotte is currently a faculty member and program coordinator for the Cybersecurity and Computer Forensics program, as well as the Information Technology program at Peninsula College. He earned a B.S.B.A. in Computer Information Systems from Northern Arizona University and a Master's degree in Information Management from the University of Washington. Eric teaches courses on cybersecurity, ethical hacking, web programming, and database design. He is an advocate for a public empowered by tools and knowledge to protect their personal information.

More Information

This program is generously supported by the Port Angeles Friends of the Library. For more information about this and other upcoming programs at your library, visit www.nols.org and select "Events," call 360.417.8500, or email Discover@nols.org. The Port Angeles Main Library is located at 2210 South Peabody Street in Port Angeles.

Computer Security and Privacy Basics at the Port Angeles Main Library, Wednesday, May 3 at 6:30pm.
