The convenient PANEL TELEPHONE

...with the built-in look of tomorrow

If you're building a new home or remodeling your present one, put the ultramodern built-in Panel Telephone in your plans.

This telephone is as up-to-date as a wall oven or built-in air-conditioner because it mounts flush with the wall where it's always handy, yet out of the way. And it's attractive as well as practical. The panel is brushed aluminum, with color inserts to match almost any room decor. Consider this, too-you can have Panel Telephones prewired into a new house at less cost than if you were to add telephone extensions later. Ask your architect. Builders and Contractors: This fresh concept in telephone convenience belongs in modern construction. Built-in, space-saving Panel Telephones increase sales appeal and add to property value. Consider them for motels, restaurants and commercial
