or washing dishes, washing clothes or taking a shower, you always have plenty of hot water with an electric hot water heater

Electric water heating saves you money four ways: 1. Costs less to install — short pipe runs, no chimney connections.

Low cost to operate — highly efficient, no heat loss. Costs less to maintain — no valves to stick, nothing to burn out. 4. Low cost to buy — lasts longer, reducing your long-term investment.

Remember, for better living, you can't beat electric living!
